The SBC and the 21st Century Jason K. Allen, 2019-05-15 The Southern Baptist Convention is currently facing issues that challenge its identity, heritage, and future. In *The SBC and the 21st Century*, Revised Edition, key leaders address critical issues such as: · Will the SBC grow more unified around shared convictions and mission or will it fragment over secondary concerns and tertiary doctrinal differences? · Will the SBC be able to maintain a distinct Baptist identity while engaging and partnering with the broader evangelical community? · Will the SBC be willing to reimagine its structures, programs, and efforts to effectively reach the world for Christ or will it risk being a past-tense denomination? This volume not only promotes meaningful dialogue, it calls leaders throughout the SBC into action. Extensive thought, research, assessment, and wisdom from some of the SBC’s brightest minds have been poured into this volume with the intent of rendering a helpful contribution to SBC life that will propel forward the collective work of Southern Baptists well into the 21st century.

United States Marine Corps Aircraft Since 1913 E.R. Johnson, 2018-04-04 Among the world’s military air arms, United States Marine Corps Aviation occupies a unique tactical niche. As the air component of a combined-arms expeditionary force, it exists primarily to support Marine combat forces on the ground in their amphibious assault mission. From the “Banana Wars” of the 1920s to the present day “War on Terror,” Marine aviation has undergone a lengthy fine-tuning process not only in terms of warfare doctrines and

tactics, but also in the types of aircraft needed to accomplish the mission. This comprehensive survey provides the history, technical specifications, drawings, and photographs of every type of fixed and rotary-wing aircraft used by Marine Air from its origins prior to World War I up to current operations.

Air Power in the Maritime Environment David Gates,Ben Jones,2016-05-20 This book explores the mingling of two rather different perspectives, those of the naval and aeronautical schools of thought, and the impact that they had upon one another in natural, professional and geopolitical settings. To explain the manner in which air power was incorporated into warfare between 1914 and 1945 it studies the deeds of practitioners, the limitations of technology, the realities of combat and the varying institutional dynamics and strategic priorities of the major maritime powers. It is underpinned by an appreciation of the geostrategic setting of the key maritime states, while addressing the challenges of operating in this multifaceted environment and the major technological developments which enabled air power to play an ever greater role in the maritime sphere. The potential for air power to influence warfare in the maritime environment was fully realised during the Second World War and its impact is demonstrated through an analysis of a wide range of the fleet operations and how it was utilised in the defence of trade and sea lanes. As such this book will be of interest to both naval and air power historians and those wanting a fuller perspective on maritime strategy in this period.

Advanced Data Mining and Applications Xue Li,Shuliang Wang,2005-07-12 This book constitutes the refereed proceedings of the First International Conference on Advanced Data Mining and Applications, ADMA 2005, held in Wuhan, China in July 2005. The conference was focused on sophisticated techniques and tools that can handle new fields of data mining, e.g. spatial data mining, biomedical data mining, and mining on high-speed and time-variant data streams; an expansion of data mining to new applications is also strived for. The 25 revised full papers and 75 revised short papers presented were carefully peer-reviewed

and selected from over 600 submissions. The papers are organized in topical sections on association rules, classification, clustering, novel algorithms, text mining, multimedia mining, sequential data mining and time series mining, web mining, biomedical mining, advanced applications, security and privacy issues, spatial data mining, and streaming data mining.

Lloyd's Register Technical Association 1976-1977 Lloyd's Register Foundation, 1976-01-01 The Lloyd's Register Technical Association (LRTA) was established in 1920 with the primary objective of sharing technical expertise and knowledge within Lloyd's Register. Publications have consistently been released on a yearly basis, with a brief interruption between 1938 and 1946. These publications serve as a key reference point for best practices and were initially reserved for internal use to maximise LR's competitive advantage. Today, the LRTA takes a fresh approach, focusing on collaboration by combining professional expertise from across LRF & Group to ensure a frequent output of fresh perspectives and relevant content. The LRTA has evolved into a Group-wide initiative that identifies, captures, and shares knowledge spanning various business streams and functions. To support this modern approach, the LRTA has adopted a new structure featuring representatives and senior governance across the business streams and the LR Foundation. The Lloyd's Register Technical Association Papers should be seen as historical documents representing earlier viewpoints and are not reflective of current thinking and perspectives by the current LR Technical Association.
