*Cole Porter* William McBrien, 2011-05-04 In his life and in his music, Cole Porter was the top—the pinnacle of wit and sophistication. From the 1910s through the '50s, from Yale pep rallies through the Broadway triumphs of *Anything Goes* and *Kiss Me, Kate*, he delighted audiences with a glittering torrent of song: "I Get a Kick Out of You," "Night and Day," "Love for Sale," and "Just One of Those Things." The bright surface of these gems—their catchy melodies and ingenious lyrics—made them instant pop hits. Their more subtle qualities and their musical and emotional depth have made them lasting standards, among the greatest glories of the American songbook. In *Cole Porter*, William McBrien has thoroughly captured the creator of these songs, whose life was one not only of wealth and privilege but also of tragedy, secrecy, and courage. A prodigal young man, Porter found his aesthetic and emotional anchor in a long, loving, if sexless marriage, while continuing to maintain many discreet affairs with men. In 1937, at the height of his success, he suffered a near-fatal riding accident; his last eighteen years were marked by pain, drugs, and repeated operations on his legs, years of physical agony but unstinting artistic achievement. Here is the book that Porter's fans have long hoped for—a life that informs the great music and lyrics though illuminating glimpses of the hidden, complicated, private man.

**Global Space Governance: An International Study** Ram S. Jakhu, Joseph N. Pelton, 2017-09-12

This book is based on the findings, conclusions and recommendations of the Global Space Governance study commissioned by the 2014 Montreal Declaration that called upon civil society, academics, governments, the private sector, and other stakeholders to undertake an international interdisciplinary study. The study took three years to complete. It examines the drivers of space

regulations and standards, key regulatory problems, and especially addresses possible improvements in global space governance. The world's leading experts led the drafting of chapters, with input from academics and knowledgeable professionals in the public and private sectors, intergovernmental organizations, and nongovernmental organizations from all the regions of the world with over 80 total participants. This book and areas identified for priority action are to be presented to the UN Committee on the Peaceful Uses of Outer Space and it is hoped will be considered directly or indirectly at the UNISPACE+50 event in Vienna, Austria, in 2018. The report, a collective work of all the contributors, includes objective analysis and frank statements expressed without pressure of political, national, and occupational concerns or interest. It is peer-reviewed and carefully edited to ensure its accuracy, preciseness, and readability. It is expected that the study and derivative recommendations will form the basis for deliberations and decisions at international conferences and meetings around the world on the theme of global space governance. This will hopefully include future discussion at the UN Committee on the Peaceful Uses of Outer Space.

Scramble for the Skies Namrata Goswami,Peter A. Garretson,2020-10-06 With a focus on China, the United States, and India, this book examines the economic ambitions of the second space race. The authors argue that space ambitions are informed by a combination of factors, including available resources, capability, elite preferences, and talent pool. The authors demonstrate how these influences affect the development of national space programs as well as policy and law.

*Space Fostering African Societies* Annette Froehlich,2023-01-03 This peer-reviewed book provides detailed insights into how space and its applications are, and can be used to support the development

of the full range and diversity of African societies, as encapsulated in the African Union's Agenda 2063. Following on from Part 1 to Part 3, which was highly acclaimed by the space community, it focuses on the role of space in supporting the UN Sustainable Development Goals in Africa, but covers an even more extensive array of relevant and timely topics addressing all facets of African development. It demonstrates that, while there have been significant achievements in recent years in terms of economic and social development, which have lifted many of Africa's people out of poverty, there is still a great deal that needs to be done to fulfill the basic needs of Africa's citizens and afford them the dignity they deserve. To this end, space is already being employed in diverse fields of human endeavor to serve Africa's goals for its future, but there is much room for further incorporation of space systems and data. Providing a comprehensive overview of the role space is playing in helping Africa achieve its developmental aspirations, the book will appeal to both students and professionals in fields such as space studies, international relations, governance, social, rural and technical development.

*Economic Transition and International Business* Eric Milliot,Sophie Nivoix,2019-08-22 *Economic Transition and International Business* brings together academic experts in International Business and sheds new light on the international phenomenon of transitions in the worldwide economy. It includes both academic investigations as well as in-depth empirical studies. The purpose of the book is to investigate how international transitions reshape the environment, as they reallocate and renew activities, and create new strategies for actors and stakeholders. It provides essential insights into a number of contextual changes that organisations are facing internationally, and is structured around three complementary themes. In the first part, recent economic and financial crises are analysed and

presented as revealing transitions for the business world. In the second part, the impact of these transitions is assessed at the level of various key economic players in today's societies (states, business networks, companies, associations, etc.). In the third part, certain decision-making and managerial transitions are retained to illustrate the new deal linked to international transitions. This book is recommended reading for scholars and students in management and economics, as well as international business managers. They will find insightful information, either theoretical or practical, including various countries impacted by socio-economic transitions.

**The League of Wives** Heath Hardage Lee,2019-04-02 With astonishing verve, *The League of Wives* persisted to speak truth to power to bring their POW/MIA husbands home from Vietnam. And with astonishing verve, Heath Hardage Lee has chronicled their little-known story — a profile of courage that spotlights 1960s-era military wives who forge secret codes with bravery,chutzpah and style. Honestly, I couldn't put it down. — Beth Macy, author of *Dopesick* and *Factory Man* The true story of the fierce band of women who battled Washington—and Hanoi—to bring their husbands home from the jungles of Vietnam. On February 12, 1973, one hundred and sixteen men who, just six years earlier, had been high flying Navy and Air Force pilots, shuffled, limped, or were carried off a huge military transport plane at Clark Air Base in the Philippines. These American servicemen had endured years of brutal torture, kept shackled and starving in solitary confinement, in rat-infested, mosquito-

laden prisons, the worst of which was The Hanoi Hilton. Months later, the first Vietnam POWs to return home would learn that their rescuers were their wives, a group of women that included Jane Denton, Sybil Stockdale, Louise Mulligan, Andrea Rander, Phyllis Galanti, and Helene Knapp. These women, who formed The National League of Families, would never have called themselves “feminists,” but they had become the POW and MIAs most fervent advocates, going to extraordinary lengths to facilitate their husbands’ freedom—and to account for missing military men—by relentlessly lobbying government leaders, conducting a savvy media campaign, conducting covert meetings with antiwar activists, and most astonishingly, helping to code secret letters to their imprisoned husbands. In a page-turning work of narrative non-fiction, Heath Hardage Lee tells the story of these remarkable women for the first time. The League of Wives is certain to be on everyone’s must-read list.

**Space 2.0** Joseph N. Pelton, 2019-04-26 A true revolution has rocked the space industry, as Silicon Valley and new startup companies around the world have shaken up the status quo. This has in turn triggered a hefty response among traditional aerospace companies, launching the sector into the new Space 2.0. This book explains how and why this remarkable change has happened, starting from the industry’s origins during the Space Age and working its way to the present day. No other industry in the world has experienced the dramatic shift in technology and services as rapidly as the field of satellite services and rocket launch systems has. This book analyzes the dynamic shift over the past decade in how satellites are designed, manufactured, launched, and operated. It also turns an eye to the future, discussing the amazing feats and potential issues we can expect from this shifting arena by 2030. With its beginner-friendly writing style and plethora of illustrations, this book serves as a perfect introductory text to students and professionals alike wishing to learn more about the key trends in the field of space applications and launch systems.

*RoboCup 2007: Robot Soccer World Cup XI* Ubbo Visser, Fernando Ribeiro, Takeshi Ohashi, Frank Dellaert, 2008-07-04 This book constitutes the proceedings of the 11th RoboCup International Symposium, held in Atlanta, GA, USA, in July 2007, immediately after the 2007 RoboCup Soccer, RoboCup Rescue and RoboCup Junior competitions. Papers presented at the symposium focused on topics related to these three events and to artificial intelligence and robotics in general. The 18 revised full papers and 42 revised poster papers included in the book were selected from 133 submissions. Each paper was reviewed by at least three program committee members. The program committee also nominated two papers for the Best Paper and Best Student Paper awards, respectively. The book provides a valuable source of reference and inspiration for R&D professionals and educationalists active or interested in robotics and artificial intelligence.

**Perspektiven der SBSP-Forschung** Norman Richter, 2014-06-04 Studienarbeit aus dem Jahr 2013 im Fachbereich Politik - Internationale Politik - Klima- und Umweltpolitik, Technische Universität Chemnitz (Professur Europäische Integration), Sprache: Deutsch, Abstract: Da unsere Weltbevölkerung bis 2050 auf 8,9 Mrd. prognostiziert wird und unser Energiebedarf bis 2030 um 44 % steigen soll, ist es unausweichlich, sich mit der Frage zu beschäftigen, wie dieser Mehrverbrauch kompensiert werden kann. Diese Belegarbeit wird sich mit Weltraumsolarkraftwerken auseinandersetzen, welche ich bereits in meinem Vortrag für „Europäische Weltraumpolitik bis 2050“ ansprach. Das Advanced Concept Team (ACT) führt unter der ESA ein akademisches Netzwerk mit verschiedenen Hochschulen, zum Austausch von Informationen und zur internationalen Zusammenarbeit. Die europäische Weltraumagentur schreibt dazu verschiedenste Themen zur aktuellen und zukünftigen Forschungen aus, worauf sich die Hochschulen bewerben können. Die Themengebiete sind mannigfaltig. Von künstlicher Intelligenz, über Robotik bis hin zu

Energiesystemen ist alles vertreten. Die Weltraumsolarkraft, bzw. SBSP (Solar Based Satellite Power) fällt dabei unter die Rubrik der zu erforschenden Energiesysteme der ESA. Auf dieses Projekt werde ich später tiefer eingehen. 2010 erschien in den Medien ein Artikel darüber, dass die japanische Weltraumagentur ein 15 Mrd. \$ Projekt begann, um einen SBPS (Solar Based Power Satellite) in der geostationären Umlaufbahn, bis 2020 in Betrieb zu nehmen. Im Vergleich zum Bau eines Kernkraftwerkes, erscheinen SBPS günstig. Denn die Kosten für die Installation eines Reaktors belaufen sich auf etwa 20 Mrd. €. Es gibt dabei jedoch zusätzlich einen nicht zu vernachlässigen öffentlichen Finanzierungsanteil von gescheiterten Projekten, wie dem WAA Wackersdorf, THTR Hamm-Uentrop oder dem AKW Mülheim-Kärlich. Die Kosten hierfür belaufen sich auf etwa neun Mrd. € zuzüglich Castortransporte mit einem Kostenanteil von drei Mrd. €. Offenbar scheinen Weltraumsolarkraftwerke für die Erde kein Science Fiction zu sein, doch was verbirgt sich hinter dem System der SBPS, welche Vorteile hat es Solaranlagen im Weltall zu errichten, welche rechtlichen Aspekte müssen hierbei beachtet werden und mit welchen Gefahren muss durch den Bau eines SBPS gerechnet werden? Welchen Wirkungsgrad können Solaranlagen erreichen, wie stehen sie in Konkurrenz mit anderen Kraftwerken und sind sie wirtschaftlich rentabel? Um diese Fragen zu beantworten werde ich im Folgenden einen Überblick über ausgewählte Optionen, zur Nutzung der Weltraumsolarenergie, aufzeigen und die verschiedenen Projekte der größten Weltraumagenturen erörtern. *Private Law, Public Law, Metalaw and Public Policy in Space* Patricia Margaret Sterns, Leslie I. Tennen, 2016-05-10 The law of outer space is rapidly evolving to adapt to changes in the economic drivers as well as advancements in technological capabilities. The contents of this book are a reflection of this changing environment as evidenced in the writings of the second and third

generations of space lawyers. Theoretical aspects of space law are explored by chapters relating to fundamental concepts central to the corpus juris spatialis. Practical aspects of space law are probed by examinations into international and domestic regulation of commercial activities, with particular emphasis on African, Asian, and European perspectives. International policy considerations are scrutinized in relation to military uses of outer space. The scientific Search for Extraterrestrial Intelligence (SETI) is the subject of a concise history of the discipline vis-a-vis the role of the SETI Permanent Committee of the International Academy of Astronautics (IAA), and also of a study of the policy and other ramifications of social media in the event of the discovery of intelligent extraterrestrial beings. The book concludes with the republication of the seminal and highly influential Relations With Alien Intelligences The Scientific Basis of Metalaw by Dr. Ernst Fasan, first published in 1970. Scholar, author, and attorney Ernst Fasan was among the original space lawyers, a small, pioneering group of visionaries who recognized that the movement of man into space must be accomplished without the shackles of history and in an environment free from the threat of the use of space as an instrument of armed aggression. The influence of Dr. Fasan has extended beyond the international legal community to the broader scientific community, especially to the field of astrobiology, as he pursued groundbreaking investigations into what could be the ultimate in legal relationships - metalaw - the interaction of sentient beings from different planets. The contributors to this Liber Amicorum are among those who can trace their own work to the foundations of space law placed in part by Ernst Fasan.

*Energy of the Future* Ophelia Maitland, Benedict Townsend, Mason Hartley, Günkut Akyıldız, Oswald Penrith, Honor Blackaries, BookademyEN, Bookademy, Dive into the future of energy with “Energy of the Future - Fusion, Solar Energy and Science for a Sustainable Planet”. This insightful book explores

cutting-edge developments in fusion and solar energy technologies, alongside innovative approaches to achieving a sustainable planet. From the latest advancements in fusion reactors to the potential of space-based solar power, each chapter delves into key topics shaping the energy landscape. Discover the importance of international collaboration, public perception, and grid modernization in driving the transition towards renewable energy sources. Engaging and informative, this book is essential reading for anyone interested in the science and technology driving our sustainable energy future.

*Solar Energy* David E. Newton, 2015-10-26 This book provides an outstanding single-volume resource on the topic of solar energy for young adults and general audiences. While how much longer the world's supply of fossil fuels will last is debatable, it is a fact that the fossil fuels that we depend on so heavily today are non-renewable resources that will inevitably be exhausted—making the need to shift to alternative sources of energy such as solar extremely important. *Solar Energy: A Reference Handbook* presents encyclopedic coverage of the social, political, economic, and environmental issues associated with the development and use of solar energy in the United States and around the world. This book provides an in-depth description of the ways solar power has been used for at least 2,000 years. It outlines how humankind has utilized various forms of energy from the sun by way of photovoltaic cells, concentrating or focusing solar power, active and passive solar heating, and other mechanisms; and provides perspectives on today's solar energy issues from a variety of subject experts. Readers will better understand not only the advantages and disadvantages of solar power but also the critical nature of energy production to sustaining life on earth, thereby underscoring the importance of developing solar power and other alternative sources of energy to meet the world's energy needs in coming decades. The book also includes profiles of key individuals and organizations related to the field of solar energy, a chronology of important events in the history of solar energy,

and a glossary that defines the key terms used in discussing the topic of solar energy.

Proceedings of the 13th Reinventing Space Conference Scott Hatton, 2018-04-28 Reinventing Space is the largest global conference and exhibition for one of the space industry's fastest growing sectors. Over its 82-year history, the British Interplanetary Society has acted as a forum for new and innovative ideas and developments in astronautics, low-cost access and utilization of space. These conference proceedings reflect the work done at the 13th Reinventing Space Conference, the second biggest space event in the UK during 2015. The global economic climate is creating demand to reduce expenditure, leading to new challenges and opportunities in the world's space industry. The need to create more responsive systems and launchers that are capable of delivering to space quickly, cheaply and reliably has never been more vital. This collection from RIspace brings together industry, agency, government, financiers, academia and end users. It focuses on the commercialization of space and addresses a range of topics including low-cost launch opportunities, the rebirth of constellations, beyond LEO activities and novel technologies. These papers encourage and promote forward-thinking ideas and concepts for the future exploration and utilization of space. The proceedings address:

- New ways of doing business in space – how do we make money on affordable and responsive space missions?
- Tactical space systems – how do we best serve the needs of defense missions; civilian missions; the needs of emergency responders?
- Interplanetary missions – can we use new technology to explore the Solar System at dramatically lower cost?
- What are the methods, processes, and technologies that we can use to make major reductions in the cost of space missions?
- New application areas for low-cost space systems – which ones can take advantage of newer, much lower-cost systems?
- How do we educate and motivate the coming generation, without whom there won't be a space industry?

*Meta-Geopolitics of Outer Space* N. Al-Rodhan, 2012-05-11 Al-Rodhan sheds new light on the debate about the geopolitics of outer space, going beyond applying traditional International Relations approaches to space power and security by introducing a multidimensional spatial framework. The meta-geopolitics framework includes space and expands classical power considerations to cover seven state capacities.
