Long Haul Pioneers, The: A Celebration of Astran: Leaders in Overland Transport to the Middle East for Over 40 Years Ashley Coghill, 2010-01-01 It all started in 1964 when two friends gave up promising medical careers to embark upon a journey which few hardened truckers would have considered. In so doing, they were solely responsible for creating the first long haul overland route, across Europe and deep into the Middle East to Kabul. The men had started the 'Middle East Run' was to become a phenomenon in the road haulage industry, an image which it still holds today. This book is about the company founded by one of those men, from its fledgling days as Asian Transport to the thriving Astran Cargo Services Ltd that it is today. In this book Ashley Coghill documents the complete history of the company to date with the focus predominantly on the early days when the men were fighting for something and revelling in the adventure. These early long haul drivers would think nothing of a 10,000 mile round trip to Iran or the Arabian Gulf and being stranded at 6,000 feet on a mountain pass with temperatures below -40 was just all in a day's work. Ashley Coghill has an immense enthusiasm for his subject and has given his research total dedication. He has also tracked down past and present employees to gather first hand information which he has illustrated with over 300 carefully selected images. The end result is a detailed, comprehensive and fascinating account of an extraordinary company.

Scania at Work Patrick W. Dyer, 2009 In this highly illustrated book Patrick Dyer shows how the model developed from the L75. It's a story of careful attention to trends in the transport market and equally thorough commitment to engineering detail and driver comfort. Scania's enterprise, together with Volvo, led to the demise of the previously invincible British truck industry.

Scania 113 and 143 at Work Patrick W. Dyer, 2017-05-10 Patrick Dyer's ninth book in the 'at work' series marks a return to Scania to study the 3-series trucks produced between 1988 and 1996, with the emphasis on the 113 and 143 models. In much the same way as these trucks evolved from the previous 2-series and LB (1-series) so too does the book, taking the story forward from the previous titles covering those ranges. For Scania, masters of the modular system and evolutionary engineering processes, the 3-series represented the pinnacle of development for designs born decades earlier. Industry recognition of its achievement came early with the range being awarded the Truck of the Year title in 1989. With over 200 photographs provided by the manufacturer and enthusiasts, Scania 113 & 143 at Work charts the story of the 3-series through informative text in the popular and familiar style of previous 'at work' titles from the same author.

The Metal Hoard from Pile in Scania, Sweden Helle Vandkilde, 2017-08-01 In 1864, a large metal hoard of copper, bronze and silver objects was discovered at Pile in the southern Swedish region of Scania. The hoard has been dated to the onset of the rich Nordic Bronze Age, and emerges as the earliest, finest and one of the largest of the Nordic sacrificial deposits of metalwork in or near water. The Metal Hoard from Pile in Scania, Sweden provides the first detailed documentation, scientific examination and historical interpretation of the assemblage. Around 2000 BCE the site of Pile was networked with places near and far in a manner that boosted the political economy of Southern Scandinavia, adding to an atmosphere of tensions and charge - and it made history. The chapters unfold as a 'history from beneath' beginning with place, Things and time and concluding with metals and the worlds that

intersected in Pile at the threshold of the long Bronze Age.

Surrender Nicholas Comfort, 2012-02-23 British industry at the start of the New Elizabethan Age was a world leader. The first - British - jet airliner was taking to the skies, the first nuclear power station was under construction at Calder Hall and British firms were pioneering the computer. Our shipyards reigned almost supreme, and from Britain's factories came cars, lorries, buses, heavy machinery, aircraft and locomotives, exported all over the world. Sixty years on, many of these industries and millions of jobs have disappeared, while competitors have flourished. Much of what remains is under foreign ownership. Britain has lost many export markets, and essential goods have to be imported. How did all this happen? Britain's loss of competitiveness has traditionally been blamed on outdated working practices, failure to invest and modernise, poor management, bloody-minded unions, the loss of Empire and the ability of post-war Germany and Japan to rebuild from scratch. All this is true, but the picture is far more complex. The role of Whitehall and successive governments, Britain's relationship with Europe,

corporate greed, misjudgement and even suicide, and sheer bad luck all play a part. In *Surrender*, Nicholas Comfort revisits the past six decades and identifies some of the factors behind the greatest mass extinction since the dinosaurs.

Beyond the Bosphorus: British Drivers on the Middle-East Routes Dave Bowers, 2015-07-01 The Middle East has always been one of the most challenging destinations for lorry drivers. In the 1970s and 80s, many drivers may not have even heard of the destinations they were sent to before heading out eastwards. Along the way they endured extreme weather conditions, bureaucratic nightmares, and the physical trials of keeping themselves and their trucks operational over many thousands of miles of poorly maintained and dangerous roads. Their adventures have become legendary within the trucking world. In this book Dave Bowers tells with humour and insight the amazing stories of people driving to Middle East destinations, battling against all the odds to deliver their loads. The inspiration comes from his own experience through those routes and in particular on one adventurous journey homewards from Tehran in 1975, when he happened to be stranded in Iran, with no cash to speak of and spending many nights sleeping in abandoned trailers along the way. Dave travelled homewards after he was given lifts in trucks returning to Europe. These were driven by drivers who had many tales to tell, and this book was motivated by the need to keep these fascinating stories alive. Illustrated with photographs of the drivers and vehicles taken at the time, *Beyond the Bosphorus* records what it was like for ordinary HGV drivers to get involved in something so dramatically different from their everyday working lives in the UK. It will be of interest to lorry drivers, general vehicle enthusiasts and also those with a historical and social interest in the Middle East alike.

Trucks in the 1980s: The Photos of David Wakefield Nick Ireland, 2015-07-20 Many would argue that the 1980s were a better time for truck drivers than nowadays: there were no cell phones, there was less traffic on the road, CB radio was all the rage, and stickers were the simple heart of truck customizing. However, the transport industry is constantly evolving and companies must adapt their vehicles to keep pace with the developments. As a result, vehicle design and liveries regularly change. Many of the companies around in the 1980s have expired and been forgotten. Most of the trucks from that time are long gone to the great scrapyard in the sky! David Wakefield has been working in the transport industry for over 30 years and has been taking photographs of trucks since the early 1980s. He has amassed thousands of high-quality images, producing one of the most comprehensive photographic collections of the time, but many of his photographs have never been previously published. In this vivid compilation, Nick Ireland has collated 300 of David's images from the 1980s in order to preserve them and make them publicly available for the first time. The book features trucks from all over the world, and it is a must-have for current and former truckers who will enjoy being reminded of 'the good old days, ' as well as anyone else with an interest in transport history. Wind Power in View Martin Pasqualetti, Paul Gipe, Robert Righter, 2002-02-15 More than ever, travelers are encountering a different sort of landscape, one not only of nature but of technology. *Wind Power in View* is the first authoritative discourse on the aesthetic impact of wind turbines on the landscape and what can be done about it. It is a detailed and thoroughly

illustrated discussion of the issue from several different perspectives. The book also provides an overview of the status of wind energy at the dawn of the new millennium, examines some of the ongoing battles, and offers guidelines on minimizing its visual impact. Taking examples from the United States, Germany, Denmark, Great Britain, and Sweden, *Wind Power in View* is the first book to tackle the thorny land use questions raised by wind energy's hard won respectability. What will be the future of wind energy? Will it be welcomed as savior, or will it be opposed as a new-age intrusion on open space and landscape preservation? These 11 essays, international in nature and written by objective experts, address landscape issues in creative, original ways.

Fifty Shades of Tarmac: Adventures with a Mack R600 in 1970s Europe Andy MacLean, 2015-08-12 It was 1972. It was summer - and the living was easy! Arthur Jackson has a good job, no ties and no responsibilities, but it is not enough - he wants adventure and he wants to see the world! Based on the author's real life experiences and illustrated with photographs from the time, *Fifty Shades of Tarmac* tells the fictional story of how a naive young British truck driver obtains his first job driving a Mack on the continent of Europe. His first trip with all its pitfalls and novel experiences takes him from Rotterdam to Bremerhaven via Moutiers and Salzburg and then back to Rotterdam. It is told with humour, introducing a number of colourful characters, and providing a personal and unusual insight into the life of a truck driver in the 70s at a time when Europe still had frontier posts and custom restrictions. It will be of interest to truck drivers, Mack fans and other transport enthusiasts and those who simply want to learn more about the social history of Europe in the 1970s.

The Silk Road and Beyond Ivor Whitall, 2021-02-01 True accounts of one man's long-distance trucking career that began in the late 1960s, these adventurous anecdotes are told by one of the first pioneers in long-distance trucking to the Middle East, Ivor Whittall. From traveling overseas to Kuwait, driving the desert trek between Jordan and Saudi Arabia, and surviving the infamously dangerous (and sometimes deadly) Tahir Pass in Eastern Turkey that has claimed the lives of truckers with its haphazard landslides and avalanches and tricky mountainous terrain, readers get a driver's seat perspective to Whittall's daring career. With 72 contemporary color photos of trucks, drivers, passports, visas, and custom forms, readers will be thrust into what it was like being a long-distance trucker in the 1970s. Full of disastrous near misses, border control mishaps, intense home sickness, mechanical failures, cultural misunderstandings, and so much more, this book will urge you to buckle up.

You Call, We Haul Mat Ireland, 2017-06-01 Best known for founding international haulier, Trans UK, Bob Carter was involved in the ground-breaking changes occurring in British transport of the 60s and 70s. Beginning in the army, where he witnessed nuclear testing on Christmas Island in the 1950s, Carter went on to be a driver, office worker, and, finally, company owner. Never afraid to get his hands dirty, Bob was able to turn his hand to any aspect of his business operation, from repairing mechanical defects to operating forklifts, and driving his own trucks. In 1975, he set out on Trans UK's maiden run to Iran in his Humber Sceptre with four of his trucks in convoy-the first trip of many for the company. The denationalization of BRS and the implementation of the 'O' licence, the rapid growth of privately

owned haulage companies, combined with the Middle East oil boom of the 70s, all helped Bob to develop a successful British and international transport operation. Including nearly 300 previously unpublished photos, *You Call, We Haul* is an inspirational story which will appeal to those with an interest in the heyday of Middle-East travel, and those with a general love of great British transport companies.
