Scania 112 and 142: at Work Patrick W. Dyer,2014-05-16 In the eight years from 1980 when Scania introduced the 2-series trucks covered in Patrick Dyer's new book, they produced no less than 135,311 units. For much of that time the 142 held the title of the most powerful production truck in Europe. Why was this range so successful? One reason was that the Scania's advanced modular manufacturing system allowed it to cover weight categories from 16 to 174 tons without any special types. Operators could specify exactly the right truck for their needs and Scania's production and efficiency were streamlined. Scania got both the engineering and design just right, matching improved versions of their tried and tested running gear with new frames and a modern, class-leading cab designed by Italian stylist, Giorgetto Giugiaro. Scania 112 and 142 at Work is Patrick Dyer's seventh book in the series. Once more he has been able to draw on two hundred fine photographs, some from Scania's own archive, as well as working shots by truck enthusiasts.

Scania 113 and 143 at Work Patrick W. Dyer,2017-05-10 Patrick Dyer's ninth book in the 'at work' series marks a return to Scania to study the 3-series trucks produced between 1988 and 1996, with the emphasis on the 113 and 143 models. In much the same way as these trucks evolved from the previous 2-series and LB (1-series) so too does the book, taking the story forward from the previous titles covering those ranges. For Scania, masters of the modular system and evolutionary engineering processes, the 3-series represented the pinnacle of development for designs born decades earlier. Industry recognition of its achievement came early with the range being awarded the Truck of the Year title in 1989. With over 200 photographs provided by the manufacturer and enthusiasts, Scania 113 & 143 at Work charts the story of the 3-series through informative text in the popular and familiar style of previous 'at work' titles from the same author.

**Scania at Work** Patrick W. Dyer,2009 In this highly illustrated book Patrick Dyer shows how the model developed from the L75. It's a story of careful attention to trends in the transport market and equally thorough commitment to engineering detail and driver comfort. Scania's enterprise, together with Volvo, led to the demise of the previously invincible British truck industry.

**Volvo F88 and F89 at Work** Patrick W. Dyer,2012-05 First released in 2005, Patrick Dyer's popular title has been revised, extended and reformatted for this new edition. Between 1965 and 1977 the Swedish manufacturer Volvo produced a staggering 40,000 F88 trucks. Along with Scania, Volvo came to dominate the European truck market. Before this revolution trucks were often noisy, uncomfortable and liable to break down. Volvo transformed engines, gearboxes, frames, brakes, drives and shafts, bringing all these components under their own control. This unique position gave them an enviable edge over rivals for quality control and supply. Development work, too, could proceed without interruption. Wherever trucking work was needed on substantial loads or for long-haul work the F88 was bound to be a serious contender. Patrick Dyer presents the predecessors to the F88, a photographic record of the truck at work in all manner of situations and then deals with the successor F89. His second edition includes all the original photographs as well as 53 new ones - including some rarities - mainly from the Volvo archives. He has added 7,000 words to the text. Patrick Dyer works in motor sport and also holds a Class 1 HGV licence. In companion books for Old Pond he has covered other iconic machines from Scania, DAF and Ford.

*DAF at Work* Patrick W. Dyer,2010-07 Following the success of his previous book, Scania at Work, Patrick Dyer takes a close look at another

favourite of long haul drivers, DAF. Although now owned by the American company, PACCAR, and with links to Leyland, the roots of DAF trucks are firmly in Eindhoven, Holland. The company started truck manufacture relatively late, but in the early 1970s it took an industry lead with its flagship 2800. The 'Supercontinental' version, with its wide tilt sleeper cab with two full-size bunks and its powerful 11.6-litre DAF engine was a natural for long-haul work. The successor 3300 and 3600 models took the company into the 1980s, running alongside Scania and Volvo as a long-distance driver's favourite. The 330 hp engine suited it for the heavy-duty special transport that became a feature of the period. Patrick W Dyer, author of two books for Old Pond - Scania at Work and Know Your Trucks - works in the automotive industry and is based in Essex. His new book is rich in photographs from the 1970s and '80s.

**Robert Walker Haulage Ltd: The History of the UK's Largest Fork Truck Transport Company** Carl Jarman,2016-08-05 This book tells the story of Robert Walker Haulage. Established in 1935, Robert Walker never intended to run a haulage business; he initially bought a lorry to carry the produce from his market garden to the local markets. He then branched out into other types of transport work including carrying prisoners of war! Later, his forward thinking sons Brian and Eric saw a niche market in the transport of fork lift trucks and decided to try converting an old R.A.F. trailer into an early fork lift truck carrier. Today the company is in the hands of the third and fourth generations of the family and despite its humble beginnings, it is now the largest fork truck transporter in the UK. The book details the history of the company's success including anecdotes from people that have worked for or with the company over the years. It details how Walkers carried Donald Campbell's Bluebird around on his exhibition tour of 1965 after setting his land speed records between 1955 and 1964, and shows how ERF played a major role in the expansion of the fork truck transport business. Including 229 previously un-printed pictures of the four wheel basic lorries that Robert used in the early days, to the latest vehicles operated by this specialist haulier, this book will be of interest to truck drivers and other transport enthusiasts.
