The Last Flight of the Scarlet Macaw Bruce Barcott, 2009-01-13 "The first time we came here I didn't know what to expect," she told me as we paddled

upstream. "What we found just blew me away. Jaguars, pumas, river otters, howler monkeys. The place was like a Noah's Ark for all the endangered species driven out of the rest of Central America. There was so much life! That expedition was when I first saw the macaws." As a young woman, Sharon Matola lived many lives. She was a mushroom expert, an Air Force survival specialist, and an Iowa housewife. She hopped freight trains for fun and starred as a tiger tamer in a traveling Mexican circus. Finally she found her one true calling: caring for orphaned animals at her own zoo in the Central American country of Belize. Beloved as "the Zoo Lady" in her adopted land, Matola became one of Central America's greatest wildlife defenders. And when powerful outside forces conspired with the local government to build a dam that would flood the nesting ground of the last scarlet macaws in Belize, Sharon Matola was drawn into the fight of her life. In *The Last Flight of the Scarlet Macaw*, award-winning author Bruce Barcott chronicles Sharon Matola's inspiring crusade to stop a multinational corporation in its tracks. Ferocious in her passion, she and her confederates—a ragtag army of courageous locals and eccentric expatriates—endure slander and reprisals and take the fight to the courtroom and the boardroom, from local village streets to protests around the world. As the dramatic story unfolds, Barcott addresses the realities of economic survival in Third World countries, explores the tension between environmental conservation and human development, and puts a human face on the battle over globalization. In this

marvelous and spirited book, Barcott shows us how one unwavering woman risked her life to save the most beautiful bird in the world. Barcott's compelling narrative is suspenseful right up to the last moment. –Publisher's Weekly An engrossing but sad account of a brave and quirky champion of nature. –Kirkus “...A riveting account of one woman's fight to save one of the last bastions of an endangered Species. . . Barcott writes of international politics, ecology and endangered species, and human relations with equal facility. This real page-turner of narrative nonfiction is hard to put down.” –Booklist

The Scarlet Macaw Scandal Carolyn Keene, 2012-05-01 Bess, George, and I volunteered to go to Costa Rica for some R&R: rest and research. See, Corcovado Ecologica, a popular resort and preserve, isn't only a beautiful getaway; it's also a great place to study three species of monkeys. Or so we thought. When we arrived on the scene, we found the place in a shambles, and the monkeys were few and far between. And if the problem gets worse, the resort's going to be in trouble. Scarlet Macaw As Pet (For Starters) Leanne Hazel,2020-08-29 HOW TO COMPLETELY CARE FOR SCARLET MACAW AS A PET(ITS HOUSING, BEHAVIOUR AND FACTS) There's nothing flashier than a scarlet macaw, making it a popular large bird among fanciers and novices alike. It's not unusual for someone to begin his or her pet bird journey with a scarlet, though this bird is often not a great choice for the novice. The scarlet is just so gorgeous and filled with personality, it's tough for someone with a few extra bucks in their pocket to refuse.The scarlet ranges in size from 32 to 39 inches in length, and is primarily red, as its name implies, with a band of yellow in the center of

the wings, followed by a band of blue leading to the flight feathers. In some birds, there may be a band of green where the yellow meets the blue. Some people confuse the scarlet and the green-winged macaw, though there are prominent differences. The green-winged, in general, is a much larger bird and has a large band of green on the wing. The primary difference, however, is in the face - the scarlet has a naked face, and the green winged macaw has tiny red lines of feathers circling down from the eyes onto the face patch. Both birds have a similarly colored beak, a black lower mandible and a horn-colored upper mandible (with a little bit of black where the two parts of the beak meet). In this Guide, you'll be learning everything that you need to know about Scarlet Macaw in order to care for one as a pet. GRAB YOURS NOW by clicking BUY NOW

Gilman, 2022-03-15 Scarlet macaws are native to tropical forests ranging from the Gulf Coast and southern regions of Mexico to Bolivia, but they are present at numerous archaeological sites in the U.S. Southwest and Mexican Northwest. Although these birds have been noted and marveled at through the decades, new syntheses of early excavations, new analytical methods, and new approaches to understanding the past now allow us to explore the significance and distribution of scarlet macaws to a degree that was previously impossible. *Birds of the Sun* explores the many aspects of macaws, especially scarlet macaws, that have made them important to Native peoples living in this region for thousands of years. Leading experts discuss the significance of these birds, including perspectives from a Zuni author, a cultural anthropologist specializing in historic Pueblo societies, and archaeologists who have studied pre-Hispanic societies in Mesoamerica and the U.S. Southwest and Mexican Northwest. Chapters examine the highly variable distribution and frequency of macaws in the past, their presence on rock art and kiva murals, the human experience of living with and transporting macaws, macaw biology and life history, and what skeletal remains suggest about the health of macaws in the past. Experts provide an extensive, region-by-region analysis,

from early to late periods, of what we know about the presence, health, and depositional contexts of macaws and parrots, with specific case studies from the Hohokam, Chaco, Mimbres, Mogollon Highlands, Northern Sinagua, and Casas Grandes regions, where these birds are most abundant. The expertise offered in this stunning new volume, which includes eight full color pages, will lay the groundwork for future research for years to come. Contributors Katelyn J. Bishop Patricia L. Rose wants to fly and learn to be like her parents but she is stuck in a very drabby room, with only dry brown seeds to eat and a mean human who won't teach her anything.
