The ‘Broomhandle’ Mauser Jonathan Ferguson,2017-10-19 At a time when most handguns were limited to six rounds, the ten-shot Mauser caught the attention of the world for its unprecedented firepower and formidable high-velocity 7.63×25mm cartridge. This saw its ultimate expression in the first-ever select-fire handgun – the ‘Schnellfeuer’ machine pistol, fed by a detachable magazine and offering both full-automatic and single-shot modes. The C 96 was the first semi-automatic pistol to see combat, arming both sides in the Second Anglo-Boer War, and seeing service with the German, Russian, Chinese and other militaries. Widely purchased commercially, it was carried by none other than Winston Churchill in the Sudan and South Africa, became prized by the Irish Republican Army and Soviet revolutionaries, and even armed Han Solo in the ‘Star Wars’ movies. Featuring full-colour artwork and an array of revealing photographs, this is the engrossing story of the C 96 Broomhandle Mauser, the ground-breaking semi-automatic pistol that armed a generation of military personnel, adventurers and revolutionaries at the turn of the 20th century.

Tactics and Procurement in the Habsburg Military, 1866-1918 John A. Dredger,2017-08-11 This book reveals the primary causes of Habsburg defeat both in the Austro-Prussian War and the First World War. The choice of offensive strategy and tactics against an enemy possessing superior weaponry in the Austro-Prussian War, and opponents with superior numbers and weapons in the Great War, resulted in catastrophe. The inferiority of the Habsburg forces in both conflicts stemmed from imprudent spending decisions during peacetime, rather than conservatism or parliamentary stinginess. The desire to restore the sunken prestige of Austria-Hungary and prove Habsburg’s great power status drove the military to waste money on an expensive fleet, and choose offensive tactics to win great victories. This study shows the civil-military interaction in regard to funding and procurement decisions as well as the deep intellectual debates within the army, which refute the idea that the Habsburg military remained opposed to technology or progress

Tools of War Syed Ramsey,2016-09-01 Warfare of the early modern period is associated with the start of the widespread use of gunpowder and the development of suitable weapons to use the explosive, including artillery and handguns; for this reason the era is also referred to as the age of gunpowder warfare (a concept introduced by Michael Roberts in the 1950s). Shock weapons that extend or enhance the deadly force of the humans at close contact. These would include: clubs, axes, tomahawks, knives, swords, sabres, spears, halberds, and pikes. The most important surviving shock weapon today is the bayonet, although some might say it is a shovel doing double duty. Missile weapons that are hurled or projected over various distances to inflict destruction upon the enemy: slingshots, boomerangs, javelins, bows and arrows, crossbows, ballistas, catapults, and Greek fire. This book has been written keeping in view the requirements of undergraduate and postgraduate students and research scholars in the area of weapons and warfare and military history.
