Sd. Kfz. 161 Pz. Kpfw. IV Ausf. F/F2/G Waldemar Trocja,2002

Sd. Kfz. 161 Panzer IV Krzysztof Mucha,2015-09-19
In June 1943 the production of Pz.Kpfw. IV Ausf. H began in order to increase the armor piercing capabilities of its main armament. Although the new model received the modified 75-mm KwK43 L/48 tank gun, the Ausf. H was still sharing many components with the previous version. This Panzer IV version first saw combat in the summer of 1943 during the German retreat on the Eastern front. The tank proved to be quite complicated and labor-consuming in production which led to simplifying its design. As a result, the less complex Ausf. J model was introduced into production in June 1944.

SD.Kfz.161 Panzer IV Ausf.J Krzysztof Mucha,2010-03-15 Exceptional reference tool for modelers Free decals, masking foil and photo-etched brass This book features the monstrous Ausf H variant of the Panzerkampfwagen IV, designated the SD.KFZ 161. This

variant saw the integrity of the glacis armor improved by manufacturing it as a single 80-millimeter (3.15 in) plate. To prevent adhesion of magnetic anti-tank mines, which the Germans feared would be used in large numbers by the Allies, Zimmerit paste was added to all the vertical surfaces of the tank's armor. The vehicle's side and turret were further protected by the addition of 5-millimeter (0.20 in) side-skirts and 8-millimeter (0.31 in) turret skirts. These modifications meant its weight shot up, making it a far slower adversary, but a less precarious one. The Ausf J variant, the final production version of the Panzer IV the Ausf. J was considered a retrograde from the Ausf. H. Born of German necessity to replace heavy losses, it was greatly simplified to speed production. By late 1944, Zimmerit was no longer being applied to German armored vehicles, and the Ausf. J's side-skirts had been replaced by wire mesh, while to further speed production the number of return rollers was reduced from four to three. About the series This series of highly illustrated books present detailed scale drawings of aircraft and vehicles, with supporting color profile artwork. With detailed captions on the history, combat action and development of each machine, each volume is an exceptional reference tool for modelers, with extras such as free decals, masking foil and photo-etched brass.

German Tanks of World War Two Craig

Moore, 2022-02-28 In World War Two, allied armies were issued with identification guides to the enemy armor they might encounter on the battlefield. These black and white printed books were a vital aide for soldiers dealing with the confusion of fighting and the difficulty of identification at distance or in all weathers. The German tanks were often lethal to become entangled with and known to be formidable pieces of military engineering. The German

army deployed a wide variety of tanks in many different variants and forms of camouflage. The likes of the Tiger have become famous and continue to be fascinating examples of World War Two firepower. This book features a unique collection of color illustrations, showing in detail the vehicles' development and differences in design. The artwork is accompanied by descriptions and technical information about each tank, written by respected expert Craig Moore, making this an essential handbook for anyone interested in the German armed forces and World War Two armor.

German Late War Armored Fighting Vehicles

George Bradford, 2007 Filled with fine-scale drawings of Germany's late war armored vehicles including: Pz. Kpfw. V Panther Tank Pz. Kpfw. VI Tiger I and II Pz. Jäger Elephant Tank Destroyer Sd.Kfz. 234/2 Puma Armored Car Jagdtiger with Henschel suspension And dozens more . . .

Hitler's Army David Stone, 2014-04-15 'I swear by God this sacred oath that I shall render unconditional obedience to Adolf Hitler, the Führer of the German Reich, supreme commander of the armed forces, and that I shall at all times be prepared, as a brave soldier, to give my life for this oath.' (German armed forces oath of loyalty, instituted 2 August 1934) This extensively illustrated new title from renowned historian, David Stone, describes and analyses every significant aspect of the rise and fall of 'Hitler's Army' within the Wehrmacht from 1933 to 1945, including its creation, organisation, weapons, equipment, training and tactics. The book also considers its conduct in battle and its strengths and weaknesses, together with the motivation, lifestyle, performance and nature of its officers and soldiers, both prior to and during the conflict. Hitler's Army is an essential reference for anyone seeking a

definitive explanation and analysis of one of Europe's most formidable fighting forces. It is also a balanced and indispensable aid for those wishing to understand how the much vaunted and apparently unbeatable German army that went to war in 1939 and so speedily achieved military pre-eminence in Europe, was consigned just over five years later to total military defeat and the ignominy of unconditional surrender in a devastated, demoralised and shattered Germany.

The Armour of Rommel's Afrika Korps Ian

Baxter, 2019-05-30 A pictorial history of the armoured vehicles used by the Nazis during their occupation of North Africa in World War II. The Deutsche Afrika Korps (best known as simply Afrika Korps) earned a well-deserved reputation as a superb fighting machine. While this was founded on the leadership and tactical genius of its legendary commander Erwin Rommel and the fighting skills of its officers and men, another vital element was its equipment and armour. This superbly illustrated Images of War book reveals the full range of German armored vehicles that saw service in North Africa from 1941 to mid-1943. As well as the formidable panzers, such as the Tiger and Panther tanks, there were Sturmartillerie equipments, reconnaissance vehicles, half-tracks, armored cars, Panzerkampfwagens, and motorcycles. All had their roles to play. While the Allies ultimately triumphed in North Africa, the combination of German design and engineering with superb generalship and fighting spirit, very nearly changed the course of the Second World War in 1942. Military historians and equipment enthusiasts will find this a fascinating and authoritative book. "Another great addition to [the Images of War] series A must have for anyone with an interest in the Afrika Korps during World War Two." —Armorama.com

A Tank Gunner's Story Louis G. Gruntz, 2017-01-24 A 712th Tank Battalion veteran of Patton's Third Army returned home after the Second World War, but for over fifty years rarely speaks of his wartime experiences. His son grows to manhood with only a perception of combat gleaned from the movies of his youth and knowing little of his father's wartime ordeals. During a difficult time in his son's life, the father breaks his silence as they travel across Europe along the battle route of the 712th Tank Battalion from the hedgerows of Normandy, across France to Metz, and through Luxembourg and Germany. This is not only a story of the father's wartime experiences, but also of the father and son's journey, the bond that developed between them as well as the son's change in perception of combat. *A Soldier's Story: Gunner Gruntz of the 712th Tank Battalion* tells the gripping yet emotional account of his father's firsthand experiences while standing on the sites where he battled, was wounded, saw friends killed in Normandy and during the Battle of the Bulge, and where he earned the Bronze Star in bloody combat. An exhaustive and essential account of the horrors of war where Gruntz took on the might of the Third Reich and Tiger panzers in his Sherman, *A Soldier's Story: Gunner Gruntz of the 712th Tank Battalion* is also lavishly illustrated with unpublished period photographs.

Axis Armoured Fighting Vehicles of the Second World War Michael Green, 2018-03-30 During the Second World War the Axis powers, most prolifically the Germans, deployed a vast array of armored fighting vehicles to support their tanks and infantry. These included tank destroyers, reconnaissance vehicles, flame-thrower vehicles, and self-propelled artillery pieces. Armored tank destroyers, such as the Marder series, the Nashorn, Jagdpanther, Jagdtiger and the turretless German Stu III

series (based on the Panzer III medium tank), helped the Nazis overcome their shortage of tanks. Copying the Stu III series the Italians created the turretless Semovente da 75/18 assault gun and the Hungarians the turretless Zrinyi. In the role of self-propelled artillery the German fielded the Hummel, the Wespe and the Grille while the Brummbär and the Sturmsturm performed in the dedicated assault gun role. For armored reconnaissance German industry came up with a series of capable armored cars; examples were the eight-wheel Puma and the full-tracked Luchs reconnaissance tank. The Italians developed the impressive four-wheel Autoblinda armored cars. Specialized anti-aircraft tanks such as the Möbelwagen, Wirbelwind and the Ostwind gave some protection against the ever more powerful Allied air forces. This fine book covers all these variants and many more besides in words and rare images and will delight readers, collectors, model-makers and war-gamers.

Modelling the Late Panzerkampfwagen IV Tom Cockle, Gary Edmundson, 2012-02-20 The Panzerkampfwagen IV has often been referred to as the 'workhorse' of the German Army in World War II. This important weapon went through several upgrades and improvements during its lifetime and is the only German tank to have been produced continuously throughout the entire war. In his previous title, *Modelling the Early Panzerkampfwagen IV*, Tom Cockle covered the early production Panzer IV. This book will cover the later versions of the tank from those that were initially equipped with the 7.5cm KwK 40 L/43 to later versions which were mounted with the L/48 gun. Step-by-step photographs show how to model this tank across various scales and at various skill levels, making this book ideal for both beginners as well as advanced modellers interested in

minuscule detail, scratch built extras and rare tank markings.

Operation Barbarossa: the Complete Organisational and Statistical Analysis, and Military Simulation Volume IIA Nigel Askey, 2013-11-01 Operation Barbarossa: Volume IIA concerns the Wehrmacht. All the significant German weapon systems and combat squads used in the campaign are analysed using the quantitative methodology detailed in Volume I, along with the contextual history. An assessment of each weapon system's inherent 'combat power' is provided, as well as attributes such as the relative anti-tank, anti-personnel and anti-aircraft values. Volume IIA then focuses on the detailed Kriegstarkenachweisungen (KStN, or TOE) for German land units (including those in the West), as well as the unit's actual organisation and equipment. All significant units in the German Army (Heer), Waffen SS, Luftwaffe and security forces are included; ranging from the largest panzer divisions, down to small anti-aircraft companies, military-police units, Landeschützen battalions, and rail-road and construction companies. In all cases the data is presented in detailed tables, using the weapon systems and combat squads previously analysed.
