The Boardgamer Volume 9 Bruce A. Monnin, The Boardgamer magazine was a quarterly magazine devoted primarily, but not exclusively, to the coverage of Avalon Hill / Victory Games titles and to other aspects of the boardgaming hobby. Initially, The Boardgamer's publication ran concurrently with Avalon Hill's house magazine, The General, but instead of focusing on new releases, it devoted coverage to those classic, Avalon Hill games which no longer graced the pages of The General. Following the cessation of The General in June 1998, The Boardgamer was the primary periodical dedicated to the titles from AH/VG, until its final issue in 2004. The contents of this volume consists of: Obstacles On The Rocky Road To Kingmaking - New Cards For Kingmaker A Three Hour Tour - An Analysis of the Victory In The Pacific Sea Areas Battle Cry - An Introduction to the Hasbro / Avalon Hill Game The Napoleonic Wars - As a Six (or More) Player Game Jutland In The Mediterranean - Germans, Austrians, British and French Maharaja Rules Adjustments - Addressing Game

Tip of the Spear Robert J. Edwards, 2015-11-15 During World War II, German armored reconnaissance laid the groundwork--often through small-unit actions--for the stunning tank and infantry operations that made the German military famous. Robert Edwards's follow-up to *Scouts Out*, the first extensive treatment of the subject in English, focuses on the battles and personalities found in ranks of the Waffen-SS, Luftwaffe, and other divisions.

Swinging the Sledgehammer U.S. Army Command and General Staff College, 2014-07-01 This thesis is a historical analysis of the combat effectiveness of the German schwere Panzer-Abteilung or Heavy Tank Battalions during World War II. During the course of World War II, the German Army developed heavy tank battalions to fulfill the concept of breaking through enemy defenses so faster, lighter mechanized forces could exploit the rupture. These heavy tank battalions had several different tables of organization, but were always centered around either the Tiger or the Tiger II tank. They fought in virtually every theater of Europe against every enemy of Germany. Ultimately, the German military created eleven Army and three Waffen-SS heavy tank battalions. Of the Army battalions, the German command fielded ten as independent battalions, which were allocated to Army Groups as needed. The German Army assigned the last heavy tank battalion as an organic unit of the elite Panzer Grenadier Division Grossdeutschland. The Waffen-SS allocated all of their battalions to a different Waffen-SS Corps. Because these units were not fielded until late in 1942, they did not participate in Germany's major offensive operations that dominated the early part of World War II. Germany's strategic situation after mid-1943 forced their military onto

the defensive. Consequently, there are very few instances when heavy tank battalions attacked as a breakthrough force. During the latter part of the war, they were used in many different ways to provide defensive assistance along very wide frontages. This study assesses the German heavy tank battalions as generally effective, primarily because of the high kill ratio they achieved. However, based upon observations from a wide variety of examples, this study also outlines several areas where changes may have increased their effectiveness.

Italian Armoured & Reconnaissance Cars 1911–45 Filippo

Cappellano, Pier Paolo Battistelli, 2018-07-26 The first Italian armoured cars were used in the war in Libya in 1911-12 against the Ottoman Empire. With few tanks being developed, the Italians relied instead on the development of more mobile armoured cars like the Ansaldo Lancia 1 Z, during World War I, but post-war the army, focusing on the Alpine battlegrounds of Italy's northern borders, did not consider armoured cars suitable for reconnaissance duties. The experience of the Spanish Civil War would provide the much needed last push for the Italians to develop modern armoured cars. The result were the famous AB 41-43 models, which fought against the British in North Africa and Marshall Tito's forces in Yugoslavia, along with other vehicles such as the AS 36 light armoured car. Using detailed colour plates and contemporary photographs, this book examines the development of the Italian armoured car in the two world wars and the inter-war years, from the deserts of North Africa to the slopes of the Alps.

Panzer Tracts No. 2-2 - Panzerkampfwagen II Ausf. G, H, J, L, and M Thomas L. Jentz, 2007 Panzer Tracts No. 2-2 - Panzerkampfwagen II Ausf. G, H, J, L, and M development and

production from 1938 to 1943. As a result of digging through public and private archives for 38 years, we are able to create this accurate history of the very rare variants from the Pz.Kpfw.II family - the VK 901, VK 903, VK 1301, VK 1303, and VK 1601. Original drawings, documented measurements, and original wartime photographs were used to create four-view drawings of the VK 901 and VK 1601 (printed at 1/35th scale). Over a thousand hours were spent precisely measuring external details of the Luchs in order to create as-built drawings of all six views (including right side and belly) with both the VK 1301 and VK 1303 turrets in 1/24th scale. Even the smallest details are clearly discernable in the component drawings at 1/10th scale including the surprise feature of an Orterkompass mounted on the turret roof. This 56 page book is illustrated with over 50 drawings and 41 clean/rare photos.

Scouts Out Robert J. Edwards, 2014-01-01 Scouts Out is the definitive account of German armored reconnaissance in World War II, essential for historians, armor buffs, collectors, modelers, and wargamers, and the first extensive treatment of the subject in English.

Operation Barbarossa: the Complete Organisational and Statistical Analysis, and Military Simulation Volume IIA Nigel Askey, 2013-11-01 Operation Barbarossa: Volume IIA concerns the Wehrmacht. All the significant German weapon systems and combat squads used in the campaign are analysed using the quantitative methodology detailed in Volume I, along with the contextual history. An assessment of each weapon system's inherent 'combat power' is provided, as well as attributes such as the relative anti-tank, anti-personnel and anti-aircraft values. Volume IIA then focuses on the detailed Kriegstarkenachweisungen (KStN, or TOE) for German land

units (including those in the West), as well as the unit's actual organisation and equipment. All significant units in the German Army (Heer), Waffen SS, Luftwaffe and security forces are included; ranging from the largest panzer divisions, down to small anti-aircraft companies, military-police units, Landeschützen battalions, and rail-road and construction companies. In all cases the data is presented in detailed tables, using the weapon systems and combat squads previously analysed.

Michael Wittmann Massimiliano Afiero, 2020-10-12 Michael Wittmann (Vogelthal, 22 April 1914 – Caen, 8 August 1944) was a famous officer of the Waffen-SS, he is considered one of the most legendary and combative tank commanders of the Second World War. He achieved his tactical masterpiece immediately after the Allied landings in Normandy on 13 June 1944, when in just an hour he destroyed 21 tanks and 28 other armored vehicles of the British 7th Armored Division in the village of Villers-Bocage. Less than a month later, on August 8, during Operation Totalize, Wittmann died along with four other members of his crew, not before achieving the most victories in history for a tank crew, with the destruction of nearly 300 enemy vehicles. For a long time the remains of the mythical commander were not found, giving rise to a legend that lasted until 1983 when the mystery was revealed with the discovery of his remains. Wittmann is still considered a legend in Germany today and is sometimes known as the “Black Baron”, a clear reference to the Red Baron Manfred Von Richtofen.

Panzerwrecks 8 Lee Archer, William Auerbach, 2009-04 This eighth volume focuses on the German resistance to the Allied landings in Normandy in June 1944 with 123 photos of German armor derived from Polish, Canadian, British and American sources. Features

include 'Operation Cobra,' German Guns on French vehicles, rocket firing half tracks, and loads of Tiger photos, with most images printed one to a page for maximum clarity. Concise captions remark on unit and vehicle identification, colors and camouflage. This is Part One of a two part series.

Operation Barbarossa: the Complete Organisational and Statistical Analysis, and Military Simulation Volume IIB Nigel

Askey, 2018-04-25 Volume IIB is the second volume relating to (and completing) the Wehrmacht, and the German mobilisation and war-economy, from June to December 1941. It includes the most detailed Orders of Battle ever published on the German Heer, Luftwaffe, Waffen SS and Kriegsmarine, in all areas of the Reich, between 22nd June and 4th July 1941. Even small and obscure units are included, such as: flak companies, artillery HQs, observation battalions, bridging columns, Landeschützen battalions, MP battalions, railroad companies, and Luftwaffe Kurierstaffeln, Verbindungsstaffeln and Sanitätsflugbereitschaften. The Luftwaffe OOBs also include details on aircraft types and strengths in each air unit.

Axis Armoured Fighting Vehicles of the Second World War

Michael Green, 2018-03-30 During the Second World War the Axis powers, most prolifically the Germans, deployed a vast array of armored fighting vehicles to support their tanks and infantry. These included tank destroyers, reconnaissance vehicles, flame-thrower vehicles, and self-propelled artillery pieces. Armored tank destroyers, such as the Marder series, the Nashorn, Jagdpanther, Jagdtiger and the turretless German Stu III series (based on the Panzer III medium tank), helped the Nazis overcome their shortage of tanks. Copying the Stu III series the Italians created the turretless Semovente da 75/18 assault gun and the Hungarians the turretless Zrinyi. In the role of

self-propelled artillery the German fielded the Hummel, the Wespe and the Grille while the Brummbär and the Sturmtiger performed in the dedicated assault gun role. For armored reconnaissance German industry came up with a series of capable armored cars; examples were the eight-wheel Puma and the full-tracked Luchs reconnaissance tank. The Italians developed the impressive four-wheel Autoblinda armored cars. Specialized anti-aircraft tanks such as the Möbelwagen, Wirbelwind and the Ostwind gave some protection against the ever more powerful Allied air forces. This fine book covers all these variants and many more besides in words and rare images and will delight readers, collectors, model-makers and war-gamers.

Panzers Forward Robert Edwards, 2018-10-01 *Panzers Forward* collects photos of all varieties of German armor, from the smaller tanks of the early war to the gigantic Tigers that came later, on all fronts—North Africa, Sicily and Italy, France, and of course the Eastern Front. Written by a trio of experts who have lived and breathed panzers for decades, the captions identify vehicles as well as their location and units, explain markings and camouflage, and give background information on the vehicles and their battles.

AK271 D.A.K. PROFILE GUIDE , This book shows the original German camouflage of vehicles used by the Deutsche Afrika Korps, with color variants throughout the war. We look at German Army vehicle colours for the African campaign, including the European Dark Gray (RAL 7021) in which they arrived to Libya. This continues through to the initial camouflage colours, Yellow-Brown RAL 8000 with Green-Gray spots RAL 7008 (in 1941), and the new Yellow-Brown RAL 8020 and Sand Gray RAL 7027, used from 1942. We also include a selection of Italian vehicles, often forgotten, which fought alongside the Germans against the Allies from 1941 to 1943. This is supplemented by the addition of allied vehicles serving with the Axis troops, with some curious American halftracks on a doublepage spread, with distinctive German markings, from 1943. Over 170 profiles cover schemes from the most common camouflage to the most original and unusual vehicles used by the DAK and Regio Esercito, including major artillery pieces used in Africa, highlighting above all the powerful 88 mm Flak 18/36/37. Through the 108 pages of this book, you will find inspiration for your next African modelling project; projects that you can enhance further with the AK 550 Africa Korps Colors Acrylic Set, and the AK 068 DAK Weathering Set.
