**GE and EMD Locomotives** Brian Solomon, 2014-08-01 The complete history of the world's foremost locomotive builders. With roots stretching back to the turn of the twentieth century, General Electric and Electro-Motive have designed some of the most iconic locomotives in the history of North American railroading. Now, for the first time, acclaimed rail author Brian Solomon's landmark historical accounts of these manufacturers' North American machines (GE Locomotives, 2003, and EMD Locomotives, 2006) are available in a single photo-packed volume. In *GE and EMD Locomotives: The Illustrated History*, nearly 400 rare photographs (more than 300 of them in color) are accompanied by thorough histories of the two manufacturers, beginning with their earliest efforts in the 1890s and 1930s, respectively. Solomon brings the story up to date with afterwords detailing such recent developments as GE's revolutionary Evolution locomotives and EMD's SD70ACe and SD70M-2. From General Electric's electrical legends - the Pennsylvania Railroad's E44s, Amtrak's E60s, and Milwaukee Road's Little Joes - to EMD's mid-century F units, workhorse GP and SD locomotives, and Dash series, all the way through to the rivals' most cutting-edge modern green designs, *GE and EMD Locomotives: The Illustrated History* leaves nothing unexamined in the important histories of these industrial giants and the competition that continues to drive them forward.

**Santa Fe Railway** Brian Solomon,

Athearn Collector's Companion Tim Blaisdell, Ed Urmston, 2023-08-22 Irvin R. Athearn was a pioneer in model trains beginning in the late 1940s. He started in his garage putting together O Gauge metal car kits then expanded them to include HO Scale kits. Around the mid-1950s, as a result of the purchase of Globe models, he began producing the iconic F-7 A and B Units in molded plastic. Soon after that came a whole line of plastic freight cars and locomotives. Our first book, *The Standard Guide to Athearn Model Trains*, documented the production of those models from the beginning of the plastic models through 1997. *The Athearn Collector's Companion* covers the original Guide, including models discovered since publication that book, plus all the kits produced until the end of production in October 2009. The original Guide contained approximately 4,000 entries; this book contains about 9,500. We believe you will enjoy the results of our labors as much as we have enjoyed documenting all these model kits...

**The Aerodynamics of Heavy Vehicles II: Trucks, Buses, and Trains** Fred Browand, Rose McCallen, James Ross, 2008-09-30 It is our pleasure to present these proceedings for "The Aerodynamics of Heavy Vehicles II: Trucks, Buses and Trains" International Conference held in Lake Tahoe, California, August 26-31, 2007 by Engineering Conferences International (ECI). Brought together were the world's leading scientists and engineers from industry, universities, and research laboratories, including truck and high-speed train manufacturers and operators. All were gathered to discuss computer simulation and experimental techniques to be applied for the design of the more

efficient trucks, buses and high-speed trains required in future years. This was the second conference in the series. The focus of the first conference in 2002 was the interplay between computations and experiment in minimizing aerodynamic drag. The present proceedings, from the 2007 conference, address the development and application of advanced aerodynamic simulation and experimental methods for state-of-the-art analysis and design, as well as the development of new ideas and trends holding promise for the coming 10-year time span. Also included, are studies of heavy vehicle aerodynamic tractor and trailer add-on devices, studies of schemes to delay undesirable flow separation, and studies of underhood thermal management.

**The Spiral Tunnels and the Big Hill - An Illustrated Railway History** Graeme

Pole, 2024-01-18 When the Canadian Pacific Railway (CPR) built through the Rockies in 1884 it laid track straight down the west slope of Kicking Horse Pass. Dropping 1,140 feet in 7.1 railway miles, this section of railway was a construction worker's horror and a railroader's nightmare that soon became known as the Big Hill. Intended to be temporary, the 4.5 percent grade, more than 3 miles long, saw use for 25 years until completion of the Spiral Tunnels in 1909. The two tunnels - unique in North America - loop over themselves, doubling the length of track and halving the grade. Incorporating more than 100 photographs, *The Spiral Tunnels and the Big Hill - An Illustrated Railway History* describes the construction of the CPR and recounts the tales of daring, defiance, and disaster on the second-steepest mainline track ever operated in North America. Maps and diagrams reveal how the Spiral Tunnels create a safer grade for trains. The text provides up-to-date descriptions of today's locomotives and explains the many challenges of operating trains on mountain grades. A Canadian bestseller for three decades, this revised edition will be informative reading for railfans, for travellers in the Rockies, and for those with an interest in Canadian history.

North American Locomotives Brian Solomon, 2012-12-15 Spanning more than one and a half centuries, this treasure trove examines the steam, diesel, and electric locomotives that have kept North American commerce on the rails since the middle of the nineteenth century. Prolific rail author Brian Solomon takes an encyclopedic approach and describes every major type. And because locomotive-building has long been a made-to-order business, the book is arranged alphabetically by railroads from across the United States and Canada to show the variant technologies that railroads ordered to best suit their specific needs, whether for freight or passenger operations. The 75-plus railroads covered range from the best known historical lines such as Canadian Pacific, Santa Fe, Union Pacific, and Baltimore & Ohio, to today's giant Class I roads, commuter lines, and selected short lines. The result is a profusely illustrated and beautifully presented reference guide that features more than 400 locomotive gems from throughout the ages, including historic machines such as New York Central's J3a Hudsons, Pennsylvania Railroad's GG1 electrics, and EMD's classic E- and F-Units, to today's most powerful modern diesels. All the major builders' past and present are represented, including such heavyweights as Baldwin, Alco, Lima, EMD, GE, and more.
