Sea Dragon - Book Two of the Dragon Stone Trilogy Debra McIntyre,2005-10-12 The second installment of the Dragon Stone Trilogy

Sea Dragon Bianca D'Arc, A blind dragon who just wants to be left alone... Sir Hrandorr was once the mightiest of fighters. Now he's blind and useless. His knight is dead and he can't even go into proper mourning because he needs help just to get around. Part sea dragon, he decides to go to the Southern Lair to rusticate by the coast. He can fly out over the open water and dive into the sea, where he still has at least some ability to hunt on his own. He doesn't expect to meet a human woman out on the water, fishing in her small sailboat, but he does, and unexpectedly, they become friends. A young man who gave up the sword to help the Lair's healer... Seth grew up in the Lair and has long had a crush on the most beautiful girl in the town, Livia. But she is the famous sea captain's daughter, and far, far above him. It'd be one thing if he was a knight or at least a candidate to be one, but Seth gave up all dreams of knighthood when he chose to apprentice himself to the Lair's elderly healer—the closest thing to a grandmother he'd ever had. His gentle heart has changed the course of his entire life and he's not sure it's for the better, but he sees no other option. A newly made knight who doesn't know how to be one... Sir Gowan is a warrior. He was a teacher of fighting when he caught the dragoness's eye and she chose him as her new knight. Genlitha is a stubborn female and though Gowan tried to refuse, he found he could not turn down the magnificent dragoness, even though he knows nothing about being a knight. They have come to the Southern Lair so Genlitha can teach young fliers how to best navigate the tricky winds off the ocean, and to gain time for Gowan to learn how to be her proper partner. Three humans. Two dragons. Attraction that cannot be denied... Both Seth and Gowan are drawn to the lovely Livia, and Genlitha finds the attraction she had for Hrandorr when they were still both dragonets has only grown stronger over the years, but there are obstacles. Hrandorr has sworn to never choose another knight. Seth has sworn to be a healer, even though it's not his true calling. Gowan is just trying to figure out how to survive in this new world of knights and dragons. And then they are attacked from the sea by a mighty fleet with dragon-killing weapons, and the town and Lair find themselves totally unprepared to fight. It will be up to the five of them to save the town...if they can. It seems impossible, but they have to at least try. The Dragon Knights series consists of: Daughters of the Dragon 1. Secret of the Dragon's Scales Derek Hart,2011-06-14 Secret of the Dragons Scales continues the adventures of Gavin Kane, Emily Scott, and Bunty Digby, fifteen-year-olds who make the best of their young lives in England during the autumn of 1943. World War II rages on, but the tide seems to have turned in favor of the Allies. Three times previously, the teens have defeated Nazi plans to defeat England using evil magic, and three times, there have been new alliances formed with creatures from the hidden worlds of legend and fable. Yet once again, Heinrich Himmler is determined to unleash another strange and horrible weapon from deep within Nazi Germany, while halfway across the world, Allied armies are now tenaciously fighting the Japanese Empire. Secret of the Dragons Scales continues to develop the ongoing influence of Thaddeus Osbert. The dragon has become indispensable in assisting his teenaged charges, as they inadvertently aid the Allied efforts against Nazi Germany. However, the dragon also takes quite seriously his responsibility to instruct Gavin Kane in the ways of justice, honor and above all - compassion. Sir Osbert manages to negotiate a steady source of sugar for his persistent sweet tooth, in exchange for supplying something Winston Churchill needs as well. Once again faced with danger and intrigue, the teens call upon their dragon friend to help them battle the Nazis, who finally commit their own winged monstrosity, with unexpected results.

Domesticated: Evolution in a Man-Made World Richard C. Francis,2015-05-25 “An essential read for anyone interested in the stories of the animals in our home or on our plate.”—BBC Focus Without our domesticated plants and animals, human civilization as we know it would not exist. We would still be living at subsistence level as hunter-gatherers if not for domestication. It is no accident that the cradle of civilization—the Middle East—is where sheep, goats, pigs, cattle, and cats commenced their fatefully intimate association with humans. Before the agricultural revolution, there were perhaps 10 million humans on earth. Now there are more than 7 billion of us. Our domesticated species have also thrived, in stark contrast to their wild ancestors. In a human-constructed environment—or man-made world—it pays to be domesticated. Domestication is an evolutionary process first and foremost. What most distinguishes domesticated animals from their wild ancestors are genetic alterations resulting in tameness, the capacity to tolerate close human proximity. But selection for tameness often results in a host of seemingly unrelated by-products, including floppy ears, skeletal alterations, reduced aggression, increased sociality, and reduced brain size. It's a package deal known as the domestication syndrome. Elements of the domestication syndrome can be found in every domesticated species—not only cats, dogs, pigs, sheep, cattle, and horses but also more recent human creations, such as domesticated camels, reindeer, and laboratory rats. That domestication results in this suite of changes in such a wide variety of mammals is a fascinating evolutionary story, one that sheds much light on the evolutionary process in general. We humans, too, show signs of the domestication syndrome, which some believe was key to our evolutionary success. By this view, human evolution parallels the evolution of dogs from wolves, in particular. A natural storyteller, Richard C. Francis weaves history, archaeology, and anthropology to create a fascinating narrative while seamlessly integrating the most cutting-edge ideas in twenty-first-century biology, from genomics to evo-devo.

How the Top Pursues the Bottom Shi Xi,2020-05-25 If there was a new breed of flower, it would grow roots and bear fruit every day with their blood carefully watering it. When the flower was ripe and tender, the baby would come out of its shell. Forcefully attacking and rooting away Yi Shengli was not like luring him away with weakness. It would lead him astray and give him tenderness. It would give him sincerity, wait for the two of them to share their feelings before turning the tables.
