France in the World Sean M. Kennedy, 2023-01-15 André

Siegfried (1875–1959) was a leading figure in French academic and cultural life for over five decades. A world traveller who trained as a geographer, Siegfried became a leading political scientist and prominent newspaper columnist. As a long-time professor at Sciences Po, he shaped generations of his country's elite. *France in the World* explores the life and career of André Siegfried. An innovator in the field of political science, he established himself as France's leading interpreter of the English-speaking world. Often likened to Alexis de Tocqueville, Siegfried published influential studies of the United States, Canada, Great Britain, and New Zealand, striving to understand France's place in a changing global context. Siegfried was a cosmopolitan promoter of liberalism and individual freedom. But at the same time he perceived France to be the core of a Western civilization whose leadership and values were threatened by Americanization, anti-imperial nationalism, and non-white immigration. By following Siegfried's long career and examining the breadth of his writings, Sean Kennedy shows how his racial and ethnic essentialism was a unifying aspect of his life's work. That these ideas were considered unremarkable for most of

his lifetime offers a powerful illustration of how racist thinking permeated mainstream French republicanism. Exploring the many facets of Siegfried's career, *France in the World* examines the entanglement of liberal and racist thinking during an era that witnessed political extremism and a rapidly changing international order.

Versioning Cultural Objects Roman Bleier, Winslow Sean M., 2020-01-02 This volume approaches an understanding of the term versioning in the broadest sense, discussing ideas about how versions differ across forms of media, including text, image, and sound. Versions of cultural objects are identified, defined, articulated, and analysed through diverse mechanisms in different fields of research. The study of versions allows for the investigation of the creative processes behind the conception of works, a closer inspection of their socio-political contexts, and promotes investigation of their provenance and circulation. Chapters in this volume include discussion of what a version means in different fields, case studies implementing digital versioning techniques, conceptual models for representing versions digitally, and computational and management issues for digital projects.

Men and Apparitions Lynne Tillman,2018-03-01 Today we live in a “glut of images.” What does that mean? *Men and Apparitions* takes on a central question of our era through the wild musings and eventful life of Ezekiel Hooper Stark, cultural anthropologist, ethnographer, specialist in family photographs. We are the Picture People. I name us Picture People because most special and obvious about the species is, our kind lives on and for pictures, lives as and for images, our species takes pictures, makes pix, thinks in pix. What is behind the human drive to create, remake, and keep images from and of everything? What does it mean that we now live in a “glut of images?” *Men and Apparitions* takes on a central question of our era through the wild musings and eventful

life of Ezekiel Hooper Stark, cultural anthropologist, ethnographer, specialist in family photographs. As Ezekiel progresses from a child obsessed with his family's photo albums to a young and passionate researcher to a man devastated by betrayal in love, his academic fascinations determine and reflect his course, touching on such various subjects as discarded images, pet pictures, spirit mediums, the tragic life of his long-dead cousin the semi-famous socialite Clover Adams, and the nature of contemporary masculinity. Kaleidoscopic and encyclopedic, madcap and wry, this book that showcases Lynne Tillman not only as a brilliant original novelist but also as one of our most prominent thinkers on culture and visual culture today.

Computational Toxicology Sean Ekins,2007-06-30 A comprehensive analysis of state-of-the-art molecular modeling approaches and strategies applied to risk assessment for pharmaceutical and environmental chemicals This unique volume describes how the interaction of molecules with toxicologically relevant targets can be predicted using computer-based tools utilizing X-ray crystal structures or homology, receptor, pharmacophore, and quantitative structure activity relationship (QSAR) models of human proteins. It covers the in vitro models used, newer technologies, and regulatory aspects. The book offers a complete systems perspective to risk assessment prediction, discussing experimental and computational approaches in detail, with: * An introduction to toxicology methods and an explanation of computational methods * In-depth reviews of QSAR methods applied to enzymes, transporters, nuclear receptors, and ion

channels * Sections on applying computers to toxicology assessment in the pharmaceutical industry and in the environmental arena * Chapters written by leading international experts * Figures that illustrate computational models and references for further information This is a key resource for toxicologists and scientists in the pharmaceutical industry and environmental sciences as well as researchers involved in ADMET, drug discovery, and technology and software development.

Beyond Testimony and Trauma Steven High, 2015-03-15

Survivors of terrible events are often portrayed as unsung heroes or tragic victims but rarely as complex human beings whose lives extend beyond the stories they have told. The contributors to *Beyond Testimony and Trauma* consider other ways to engage with survivors and their accounts based on valuable insights gained from their work on long-term oral history projects. While the contexts vary widely, they demonstrate that through deep listening, long-term relationship building, and collaborative research design, it is possible to move beyond the problematic aspects of “testimony” to shine a light on the more nuanced lives of survivors of mass violence.

Narrating the Closet Tony E Adams, 2016-06-03 Motivated by the death of his partner, Adams seeks to redefine the closet as a relational construct between all people and all sexualities. The closet is explored at each stage—entering it, inhabiting it, and coming out of it—and strategies are offered for reframing difficult closet experiences. Adams makes use of interviews, personal narratives, and autoethnography to analyze lived, relational experiences of sexuality. This is a must have for scholars and students of gender studies, qualitative research, and for any reader who has felt the closet's reach.

Data-Intensive Text Processing with MapReduce Jimmy Lin, Chris Dyer, 2022-05-31 Our world is being revolutionized by data-driven methods: access to large amounts of data has generated new insights and opened exciting new opportunities in commerce, science, and computing applications. Processing the enormous quantities of data necessary for these advances requires large clusters, making distributed computing paradigms more crucial than ever. MapReduce is a programming model for expressing distributed computations on massive datasets and an execution framework for large-scale data processing on clusters of commodity servers. The programming model provides an easy-to-

understand abstraction for designing scalable algorithms, while the execution framework transparently handles many system-level details, ranging from scheduling to synchronization to fault tolerance. This book focuses on MapReduce algorithm design, with an emphasis on text processing algorithms common in natural language processing, information retrieval, and machine learning. We introduce the notion of MapReduce design patterns, which represent general reusable solutions to commonly occurring problems across a variety of problem domains. This book not only intends to help the reader think in MapReduce, but also discusses limitations of the programming model as well. Table of Contents: Introduction / MapReduce Basics / MapReduce Algorithm Design / Inverted Indexing for Text Retrieval / Graph Algorithms / EM Algorithms for Text Processing / Closing Remarks

First Avenue Chris Riemenschneider, 2022-11 Where Prince and Minnesota made rock 'n' roll history--a glorious look back at one of rock's most storied clubs and the thousands of musicians who took the stage there. One of the longest running rock clubs in America, First Avenue in Minneapolis gets the rock-star treatment it deserves with this glorious celebration of a true rock 'n' roll landmark. Revised and updated through the club's 50th anniversary

celebrations, the book chronicles the club's storied past--from its impressive inaugural show in April 1970 (Joe Cocker's Mad Dogs & Englishmen tour) up through the latest acts to take the stage at this beloved venue. In its initial incarnation as the Depot, the club hosted music legends as varied as the Kinks, Ike and Tina Turner, Alice Cooper, and B. B. King before transforming into a disco club known as Uncle Sam's. In the '80s, First Avenue catapulted to the global stage as the hub of Prince's Purple Rain and the incubator for widely revered, wild-eyed indie-rock bands such as the Replacements, Hüsker Dü, Soul Asylum, and Babes in Toyland. During the past half-century, First Avenue and 7th Street Entry have hosted everyone from the Ramones to R.E.M., Wilco to the Wu-Tang Clan, Billy Idol to Billie Eilish, Lizz Winstead to Lizzo, and hundreds more--all immortalized in this volume. Over the decades, First Avenue survived corporate competitors, bankruptcy, a bitter ownership battle, and most recently, a global pandemic to become one of the most successful independent clubs in the country and ground zero to Minneapolis's thriving community of hip-hop and indie-rock acts. Amidst all that history, the book is interlaced with anecdotes, quotes, and occasionally cloudy memories from musicians, employees, and regulars--many of whom are as unique

as the club itself. Chock full of concert photos and memorabilia collected from professional photographers and average fans alike, the book is a lavish tribute to a rock 'n' roll landmark.

Why Solange Matters Stephanie Phillips, 2021-04-20 Growing up in the shadow of her superstar sister, Solange Knowles became a pivotal musician in her own right. Defying an industry that attempted to bend her to its rigid image of a Black woman, Solange continually experimented with her sound and embarked on a metamorphosis in her art that continues to this day. In *Why Solange Matters*, Stephanie Phillips chronicles the creative journey of an artist who became a beloved voice for the Black Lives Matter generation. A Black feminist punk musician herself, Phillips addresses not only the unpredictable trajectory of Solange Knowles's career but also how she and other Black women see themselves through the musician's repertoire. First, she traces Solange's progress through an inflexible industry, charting the artist's development up to 2016, when the release of her third album, *A Seat at the Table*, redefined her career. Then, with *A Seat at the Table* and 2019's *When I Get Home*, Phillips describes how Solange embraced activism, anger, Black womanhood, and intergenerational trauma to inform her remarkable art. *Why*

Solange Matters not only cements the place of its subject in the pantheon of world-changing twenty-first century musicians, it introduces its writer as an important new voice.

Behind the Big House Jodi Skipper, 2022-03-22 When residents and tourists visit plantation sites, whose stories are told? All too often the lives of slaveowners are centered, obscuring the lives of enslaved people and making it impossible for their descendants to process the meanings of these sites. *Behind the Big House* gives readers a candid, behind the scenes look at what it really takes to interpret the difficult history of slavery in the U.S. South. The book explores Jodi Skipper's eight-year collaboration with the *Behind the Big House* program, a community-based model used at local historic sites around the country to address slavery in the collective narrative of U.S. history and culture. Part memoir and part ethnography, the book interweaves Skipper's experiences as a Black woman and a southerner to imagine more sustainable and healthy spaces for interracial collaborations around historic preservation and slavery tourism in the U.S. South. Skipper considers the growing need among professional and lay communities to address slavery and its impacts through interpretations of local historic sites. In laying out her experiences

through an autoethnographic approach, Skipper seeks to help other activist scholars of color negotiate the nuances of place, the academic public sphere, and its ambiguous systems of reward, recognition, and evaluation. By directly speaking to a failed integration of teaching, research, and service as a crisis in academia, she strives not to give others answers, but to model another way of being--

It bridges the gap

between the technique of drawing characters and the theory of good character design in a practical, hands-on way - learn how to use story and archetypes to develop compelling, new characters.
