The Sentinel, Published by the Junior Class, Montana State University... Hardpress,2013-12 Unlike some other reproductions of classic texts (1) We have not used OCR(Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

Optical and SAR Remote Sensing of Urban Areas Courage Kamusoko,2021-12-02 This book introduces remotely sensed image processing for urban areas using optical and synthetic aperture radar (SAR) data and assists students, researchers, and remote sensing practitioners who are interested in land cover mapping using such data. There are many introductory and advanced books on optical and SAR remote sensing image processing, but most of them do not serve as good practical guides. However, this book is designed as a practical guide and a hands-on workbook, where users can explore data and methods to improve their land cover mapping skills for urban areas. Although there are many freely available earth observation data, the focus is on land cover mapping using Sentinel-1 C-band SAR and Sentinel-2 data. All remotely sensed image processing and classification procedures are based on open-source software

applications such as QGIS and R as well as cloud-based platforms such as Google Earth Engine (GEE). The book is organized into six chapters. Chapter 1 introduces geospatial machine learning, and Chapter 2 covers exploratory image analysis and transformation. Chapters 3 and 4 focus on mapping urban land cover using multi-seasonal Sentinel-2 imagery and multi-seasonal Sentinel-1 imagery, respectively. Chapter 5 discusses mapping urban land cover using multi-seasonal Sentinel-1 and Sentinel-2 imagery as well as other derived data such as spectral and texture indices. Chapter 6 concludes the book with land cover classification accuracy assessment.

Tales of the Sentinel Jason Farmer,2023-02-09 The aeons passed on Earth, its evolving simians unaware of a strange artefact that patiently waited for them to make their introduction. Inevitably, as the ancient guest continued its orbit around the Sun in the void between Venus and the blue world the humans noticed its presence. However, would their inquisitive nature truly want to know the story recorded within the artefact? Was humanity prepared for the revelations that the ancient object had to offer? A set of ideas and mathematical understanding that would gift them a means to take control of their technological destiny. Yet as a notable human once said, nothing is free. So what price would have to be paid to claim their quarry?
