China MRAPS, Armored Cars, Armored Personnel Carriers and Armored Assault Vehicles □□□ (Xīn □□□ (Xīn Shìjiè),2021-01-16 January 2021 This is probably the toughest book I've attempted. Partly due to the lack of open-source information available and partly because of the Covid-19 lockdown. Anyway, I decided to go ahead and publish what I have since there are so few books on the subject out there. This is just the start as there are a lot of vehicles out there and I plan to add the ones I missed. Please let me know which I

missed and I will add them. I would like to crowd source this book and ask that readers go to our web site (USGOVPUB.com) and send me comments to fill in the information gaps. Rather than writing a negative review, how about sending me the suggested changes and improvements and I then update the text as soon as I get your comments? I plan to upload updates on the last day of the month if I get input. In any event, I will continue to research the missing information myself and make corrections as I find them. Note that the pictures on the cover are a graphical Table of Contents. The page number is written before the vehicle name. Also, I hate to see blank pages, so I placed the cover page for a few suggested titles you may be interested in looking at. If you have ideas for future titles, let me know and I will see how much info is out there and try and publish suggested titles. Thank you for your continued support. 4th Watch publishing is a SDVOSB. Russia Land-Based Electronic Warfare/RUMINT Alexandre Zanfirov, 2020-08-18

Aug 18 2020 Printed in COLOR Electronic Warfare (EW) is considered a relatively inexpensive way to curb an opponent's ability to communicate and exercise control within a battlespace. By now, everyone is aware that the incident where a Su-24 bomber allegedly flew over the American destroyer 'Donald Cook' described in practically all Russian media, during which the Russian aircraft supposedly employed its newest 'Khibiny' system to disable the ship's electronics is RUMINT (RUMINT - RUmor INTelligence [military]). RUMINT can be described as single-source disinformation that obfuscates or puffs up an adversary's capabilities. The text in RED thruout the book is RUMINT. Russia's electronic warfare equipment specifications are a closely held SECRET so a lot is missing, but I was able to find quite a bit thru open sources. I will update as I find more. The systems included in this book typically have their own specialization. For example, the Divnomorye complex suppresses locators and other avionics of aircraft, helicopters and drones. The station also creates powerful interference for flying radars - E-3 AWACS, E-2 Hawkeye and E-8 JSTAR. It can hide objects within a radius of several hundred kilometers from radar detection. The Murmansk-BN complex suppresses communication and control channels within a radius of up to eight thousand kilometers. This technique is able to strip communications of warships, aircraft, drones and headquarters of the troops of a potential enemy. Electronic warfare systems Moskva-1, Krasukha-20 and Krasukha-4 are often called aircraft systems. They are designed to deal with aviation radars, as

well as communications and information transfer technology. Moskva-1 detects the enemy, determines the type and characteristics of its electronic warfare. Data is transferred to other systems. Krasukha-20 is responsible for the fight against early warning radar aircraft and Kraukha-4 interferes with other types of aircraft. Thanks to experiences in conflicts in Georgia, Ukraine and Syria, Russia's EW systems and tactics are evolving. The systems are more mobile, intelligent, and automated with a transition from narrowly specialized equipment to multifunction complexes, for the disruption of many types of electronic systems-radars, radio communications, navigation and others. The tactics are changing as well. For instance, Russian forces in Ukraine have been using small unmanned aircraft with electro-optical cameras and electronic direction finders to specifically locate and then jam counter-battery radars ahead of mortar and other artillery strikes. According to Ukrainian General Kremenetskyi, Russian armed forces have developed their EW doctrines and they have been adept at learning lessons from recent conflicts and adapted their systems accordingly. The speed with which the Russians have adapted their EW tactics has been very quick. Of course, Russian EW operators (occasionally) also simultaneously jam their own forces' equipment. If you have any of the missing information, or if you see information that needs to be corrected, please send message thru our website USGOVPUB.com. 4th Watch Publishing is a SDVOSB.

Standard Military Motor Vehicles United States. War Department, 1943

Third Axis, Fourth Ally Mark Axworthy, Corneliu I. Scafes, Cristian Crăciunoiu, 1995 Describes Romania's role in World War II, first allied with the Nazis, and then fighting on the side of the Allies from mid-1944 onwards

World War Two Military Vehicles G. N. Georgano, 1994-01-01 In 1939 the allies faced a major conflict with few specialised military vehicles, as spending had been severely restricted during the twenty years of peace. Germany, by contrast, had a programme of specialised transport well under way. Though the vehicles were too complex and were soon replaced by more basic designs. This comprehensive book covers the problems faced by the eight countries involved in the war, Great Britain, the British Commonwealth, the United States, Germany, Italy, France, the Soviet Union and Japan, and the many and diverse vehicles which were developed, from 1/4-ton jeeps, half-tracks and amphibians, to tank transporters with a gross weight of 92 tons.

Russia MRAPs, Armored Cars, Armored Personnel Carriers & Armored Assault Vehicles Alexandre Zanfirov, 2021-03 1 March 2021 This book is intended as a primer with summary specifications for the various armored vehicles in the present-day Russian military. For more complete specifications of these vehicles, I recommend the TRADOC Worldwide Equipment Guide (WEG). Unfortunately, the WEG is only available online, so we downloaded (most) of the information and publish an extract of the Russian vehicles only (including tanks) as a separate title (search Russia ground combat vehicles). That book is available on Amazon.com. Note that the pictures on the cover are

a graphical Table of Contents. The page number is written before the vehicle name. If you have ideas for future titles, let me know and I will see how much info is out there and try and publish suggested titles. The Road to Victory David P. Colley, 2014-06-10 This “important contribution to WWII history” reveals the trucking convoy, manned by unsung black soldiers, who helped defeat the Nazis (Publishers Weekly). After the D-Day landings in Normandy, Allied forces faced a golden opportunity—and a critical challenge. They had broken across enemy lines, but there was no infrastructure to supply troops as they pushed into Germany. The US Army improvised a perilous solution: a convoy of trucks marked with red balls that would carry desperately needed ammunition, rations, and fuel deep into occupied Europe. The so-called Red Ball Express lasted eighty-one days and, at its height, numbered nearly six thousand trucks. The mission risked attacks by the Luftwaffe and German ground forces, making it one of the GIs’ most daring gambits. Without the soldiers who successfully executed this operation, World War II would have dragged on in Europe at a terrible cost of Allied lives. Yet the service of these brave drivers, most of whom were African American, has been largely overlooked by history. The first book-length study of the subject, *The Road to Victory* chronicles the exploits of these soldiers in vivid detail. It’s a story of a fight not only against the

Nazis, but against an enemy closer to home: racism.

The Fighting First Flint Whitlock, 2009-04-29 The Fighting First tells the untold story of the 1st Infantry Division's part in the D-Day invasion of France at Normandy. Using a variety of primary sources, official records, interviews, and unpublished memoirs by the veterans themselves, author Flint Whitlock has crafted a riveting, gut-wrenching, personal story of courage under fire. Operation Overlord - the Allied invasion of Normandy on 6 June 1944 - was arguably the most important battle of World War II, and Omaha Beach was the hottest spot in the entire operation. Leading the amphibious assault on the Easy Red and Fox Green sectors of Omaha Beach was the U.S. Army's 1st Infantry Division - The Big Red One - a tough, swaggering outfit with a fine battle record. The saga of the Big Red One, however, did not end with the storming of the beachhead. The author concludes with an account of the 1st in their fight across France, Belgium, and into Germany itself, playing pivotal roles in the bloody battles for Aachen, the Huertgen Forest, and the Battle of the Bulge. The Fighting First is an inspiring, graphic, and often heartbreaking story of young American soldiers performing their D-Day missions with spirit, humor, and determination.
