Shark Handbook Gregory Skomal, 2014-02-04 Greg Skomal is one of the world's leading shark experts: many thousands of viewers know him as the "Shark Guy" on Discovery Channel and he's affiliated with the Woods Hole Oceanographic Institute. So if you're dreaming of swimming with sharks, there's no one better to take you—and that's exactly what he does in this comprehensive, stunning field guide. In addition to an awesome gatefold poster of a Great White (with all its distinguishing features shown in detail), plus amazing original images from Skomal and award-winning National Geographic photographer Nick Caloyianis, it contains a complete listing of every known shark in existence as well as some extinct species. *Shark* Dean Crawford, 2008-08-01 A sleek hunter of the seas, the shark has struck fear into the hearts of men since the days of the first fishermen. Dean Crawford now explores here the long relationship between shark and man, revealing that behind the fearsome caricature is a complex animal that deserves a thoughtful reconsideration. With a lineage stretching back over 100 million years, the shark has evolved into 350 different species, from the great white to the pike-bearing goblin to the tiny cookie-cutter. Crawford compiles here a fascinating narrative that analyzes how and why the animal looms large in our cultural psyche. While sharks have played a prominent part in religion and mythology, they are more commonly perceived as deadly predators—in such films as *Jaws* and *Dr. No*—or as symbols of natural violence, as in Hemingway's *Islands in the Stream*. *Shark* ultimately argues, however, that our ill-informed emotional responses, spurred by such representations, have encouraged the wholesale slaughter of sharks—and our ignorance endangers the very existence of the shark today. Both a celebration of their lethal beauty and plea for their conservation, *Shark* urges us to shed our fears and appreciate the magnificence of this majestic animal.

*Shark* Brian Skerry, 2017 For decades, Skerry has braved ocean depths to capture portraits of sharks around the world. fascinating ocean habitat.

Mr. Fitzgerald said sharks like to circle their food while they decide if it looks tasty. I must have left my scooter in the yard. The shark started riding it around our house. And around. And around. On his third time around, I knew. He was circling me. When Benny learns about sharks at school, he immediately feels worried. He definitely can't go in the ocean, because sharks live there. But even simply staying out of the water isn't enough, because a shark named Mr. Chompers follows him home! What will Benny do?
