Dean Crawford

*Shark* Dean Crawford,2008-08-01 A sleek hunter of the seas, the shark has struck fear into the hearts of men since the days of the first fishermen. Dean Crawford now explores here the long relationship between shark and man, revealing that behind the fearsome caricature is a complex animal that deserves a thoughtful reconsideration. With a lineage stretching back over 100 million years, the shark has evolved into 350 different species, from the great white to the pike-bearing goblin to the tiny cookie-cutter. Crawford compiles here a fascinating narrative that analyzes how and why the animal looms large in our cultural psyche. While sharks have played a prominent part in religion and mythology, they are more commonly perceived as deadly predators—in such films as *Jaws* and *Dr. No*—or as symbols of natural violence, as in Hemingway's *Islands in the Stream*. *Shark* ultimately argues, however, that our ill-informed emotional responses, spurred by such representations, have encouraged the wholesale slaughter of sharks—and our ignorance endangers the very existence of the shark today. Both a celebration of their lethal beauty and plea for their conservation, *Shark* urges us to shed our fears and appreciate the magnificence of this majestic animal.

**Sharks** Joyce Pope,2003 Diagrams, charts, and facts about various sharks.

*Shark* David Jefferis,Tony Allan,2001 Describes the characteristics and behavior of sharks and discusses why some sharks are dangerous.

Shark Dean Crawford,2008-08 In *Shark*, Dean Crawford explores the long relationship between shark and man, revealing that behind the fearsome caricature is a complex animal that deserves a thoughtful reconsideration.

**101 Amazing Facts about Sharks** Jack Goldstein,2014-04-24 Did you know that most sharks have an excellent sense of hearing? Or that fear of sharks is known as galeophobia? This fantastic quick-read eBook features over one hundred facts split into categories such as shark attacks, conservation, myths, record breakers and many more. So if you want to know how long a whale shark can live for, or what the Aztecs used to ward off sharks, then this is the book for you! Find the information you want, fast.

Shark Meish Goldish,2009-08-01 If you see a shark lurking beneath the ocean's surface, get out of the water! These lethal predators have powerful jaws and sharp teeth that can shred flesh and cut through bone. Given this fact, it's no surprise that a shark bite can be deadly. Each year, unsuspecting swimmers die from attacks. Packed with spectacular photos and interesting facts, *Shark: The Shredder* introduces kids to the natural habitat, physical characteristics, diet, and behavior of these dangerous fish. A narrative format will keep readers turning the pages for more.

*The Shark Whisperer* Ellen Prager,2014-04-21 After his most klutzy move ever, falling into a pool of sharks, things for Tristan Hunt begin to look up. Tristan is invited to an ocean-themed summer camp in the Florida Keys where he discovers that he and the other young teens there have very special and rare talents when it comes to the ocean. After the camp receives a distress call from ocean animals, Tristan and his new friends get pulled into a daring rescue in the Bahamas. With the help of sharks, dolphins, a quick-escape artist octopus, and some seabird bombers, the campers must use their young talents in an attempt to outwit an evil shark-finning, reef-blasting billionaire.

The Shark Chronicles John A. Musick,Beverly McMillan,2003-06 A scientific exploration of sharks draws on the latest research to profile the shark's unique navigation instincts, body chemistry, and behaviors, while considering factors that are compromising their survival.

*Shark Week 2* Steve Hutchison,2023-02-23 Nothing puts a smile on a shark's face like *Shark Week*. Getting your leg bitten off is trendier than getting a tattoo, nowadays. It makes a great story to tell and you can even make a movie about it. When they are not exploring space, growing five additional heads, or traveling by means of tornadoes, sharks

are busy getting turned into robots, lava, sand, ice, or ghosts. Sharks are our friends, except when they're hungry, which they usually are. If you show signs of weakness or hostility, you will be attacked. If you bleed, you will be attacked. Shark Week is the time of the year when you do not want to be swimming with sharks. In this second edition of Shark Week, I review 78 shark movies and rank them from pathetic to great. Watch them in order; they will only get better!

**Sharks in the Shallows** W. Clay Creswell, 2021-06-14 A detailed account of over one hundred shark-related incidents on the coast of the Carolinas from a shark-bite investigator Powerful and mysterious, sharks inspire both fascination and fear. Worldwide, oceans are home to some five-hundred species, and of those, fifty-six are known to reside in or pass through the waters off the coast of both North and South Carolina. At any given time, waders, swimmers, and surfers enjoying these waters are frequently within just one-hundred feet of a shark. While it's unnerving to know that sharks often swim just below the surface in the shallows, W. Clay Creswell, a shark-bite investigator for the Shark Research Institute's Global Shark Attack File, explains that attacks on humans are extremely rare. In 2019 the International Shark Attack File confirmed sixty-four unprovoked attacks on humans, including three in North Carolina and one in South Carolina. While acknowledging that they pose real dangers to humans, Creswell believes the fear of sharks is greatly exaggerated. During his sixteen-year association with the Shark Research Institute, he has investigated more than one hundred shark-related incidents and has maintained a database of all shark-human encounters along the Carolina coastlines back to 1817. Creswell uses this data to expose the truth and history of this often-sensationalized topic. Beyond the statistics related to attacks in the Carolina waters, *Sharks in the Shallows* offers a history of shark-human interactions and an introduction to the world of shark attacks. Creswell details the conditions that increase a person's chances of an encounter, profiles the three species most often involved in attacks, and reveals the months and time of day with the highest probability of an encounter. With a better understanding of sharks' responses to their environment, and what motivates them to attack humans, he hopes people will develop a greater appreciation of the invaluable role sharks play in our marine environment.

**Awesome Facts about Sharks** Claire Llewellyn, 1998 Provides information about the diet, anatomy, habits, and reproduction of sharks.

**Great White Shark** Deborah Nuzzolo, 2009 Great white sharks are skilled hunters with lots of sharp teeth. Dive into the exciting world of great white sharks.

**The Hammerhead Shark** Sara Green, 2008-01-01 There's no mistaking the hammerhead shark. Its wide-set eyes are separated by a mallet-shaped snout equipped with sensors for tracking down the trickiest prey. The hammerhead's favorite quarry is the stingray, which it pins to the ocean floor with the help of its built-in tool. Discover more about the popular predator in this title for young readers.

**Eaten by a Shark** Sue L. Hamilton, 2010-01-01 In *Eaten by a Shark*, readers learn of actual human-wildlife encounters, creature information, survival strategies, and attack statistics. True survivor stories and quotes show the reality of sharing our world with one of Earth's most cunning and powerful species. *Abdo & Daughters* is an imprint of Abdo Publishing, a division of ABDO.

**The Mako Shark** Sara Green, 2011-08-01 Said to be the fastest shark of all, the mako shark can cut through water at 40 miles per hour. Perhaps more impressive is the hang time achieved when the torpedo-shaped fish launches up to 20 feet above the surface of the water. This book explores all the stunts of the speedy mako shark.

**Weird Sharks** David Thompson, 2021-12-15 All Earth's creatures are unique, but some...well, they're just plain weird! In this entertaining volume, readers will learn more about some of the planet's weirdest sharks and sharklike creatures, including the bizarre-

looking goblin shark, the giant guitarfish, and the oddly flat Pacific angel shark. Full-color photos highlight these creatures’ strange shapes, while fact boxes and statistics tell more about their habits, habitats, and diets.

*The Shark Attack Files* Paul Mason,2018-01-01 A dark, triangular fin slicing through the water can be a terrifying sight. Read the stories of the brave (and lucky) people who have survived real-life shark attacks, such as spearfisher Rodney Fox, who was grabbed by a great white, and Mick Fanning, attacked during a surfing contest. Find out which shark species are involved, what causes attacks, how dolphins have saved people, how to fight back, and much more. Fascinating facts and brilliant photography capture the drama, but don't worry—you are more likely to be struck by lightning than to be bitten by a shark!

*Shark Wars* EJ Altbacker,2022-05-24 Since the dawn of time, prehistoric shark clans called Shivers have ruled over the earth's oceans, fierce protectors of all who swim. For eons, the Big Blue has prospered under Shiver Law, and the delicate balance of sea life kept sacred. Until now. Rising sea temperatures and overfishing have caused food to become scarce, and the battle for new hunting grounds has brought with it corruption and warfare. Now, with the ocean on the brink of chaos, a young reef shark named Gray - exiled from the safety of his peaceful reef home - must venture deep into Open Water to unlock the secrets of his destiny and bring peace back to the ocean. But first, he'll have to discover the truth about who - and what - he really is.
