Sheldon's Roommate Agreement Sheldon Cooper,2015-03-03 The Roommate Agreement was written by Sheldon and was signed by Leonard when they first became roommates. These events were shown during a flashback in The Staircase Implementation (S03E22). Sheldon starts mentioning paragraphs from the Roommate Agreement in the episode The Cooper-Nowitzki Theorem (S02E06) and continues to do so throughout the series, usually when one of the clauses is being violated. This Roommate Agreement is one you could also use in real life. It is complete and coherent with real legal clauses used in real agreements. The first 42 sections form a roommate agreement you might have even signed. The last sections contain Sheldon's special clauses to suit his quirks. They come with foot notes so you can find the references. Contents: Roommate Agreement Sheldon's Schedule Relationship Agreement

Exquisite Trouble Ann Mayburn,2016-12-05 Book One in the bestselling Iron Horse MC series Before I met Smoke I'd never been kissed, really kissed, by a man, let alone a biker sex god bent on taking my virginity and my heart. I got dragged into the deadly world of the Iron Horse MC by my crazy twin sister who is engaged to the club's President and even crazier mom who only cares about herself. Smoke has been assigned by the club to keep me safe even though he's everything that I should be afraid of. He's the kind of man who lives by his own rules and does whatever he wants whenever he wants, but he treats me like I'm something rare and precious, not a socially dysfunctional basket case who has no idea how to love, but needs him more than her next breath. Not that my feelings matter, because if we don't find my mother soon, the only thing I'll have to be worried about is who is going to kill me first. Note- This is Part One of Two for Smoke and Swan's story. The second book, Exquisite Danger, is out now and is the conclusion of Smoke and Swan's story within the Iron Horse MC series.

Look Me in the Eye John Elder Robison,2008-09-09 NEW YORK TIMES BESTSELLER “As sweet and funny and sad and true and heartfelt a memoir as one could find.” —from the foreword by Augusten Burroughs Ever since he was young, John Robison longed to connect with other people, but by the time he was a teenager, his odd habits—an inclination to blurt out non sequiturs, avoid eye contact, dismantle radios, and dig five-foot holes (and stick his younger brother, Augusten Burroughs, in them)—had earned him the label “social deviant.” It was not until he was forty that he was diagnosed with a form of autism called Asperger’s syndrome. That understanding transformed the way he saw himself—and the world. A born storyteller, Robison has written a moving, darkly funny memoir about a life that has taken him from developing exploding guitars for KISS to building a family of his own. It’s a strange, sly, indelible account—sometimes alien yet always deeply human.

Teaching "The Big Bang Theory". Countering Stereotypes about Foreign Cultures by Using TV Series as Part of Web 2.0 Cultures in the EFLC Olesja Yaniv,2016-10-04 Seminar paper from the year 2016 in the subject Didactics for the subject English - Pedagogy, Literature Studies, grade: 1,3, , course: Teaching English as a Foreign Language, language: English, abstract: The television and internet, which enables permanent access to television shows, are two of the most popular media of our millennium and, thus, play a significant part in people's private life as well as in the occupational area. Thus, a transition of industrial society into an information society has been fulfilled since the end of the 1960s and includes a digitalized and interconnected world for the greatest extend. Those changes affect the whole everyday reality; an increasing number of all ages spend their time in front of monitors inside a virtual reality. The kind of learning has changed as well. For the young generation - the so called "digital natives" - the constant networking and opportunity of gaining knowledge easily became obvious. The digital learners should not "consume" rehashed knowledge anymore but need to be able to have the ability to use available knowledge and information, screen those usefully and thus, reach efficient learning outcomes. Hence, media literacy becomes a key qualification to participate in the information society. The combination of both, the television as a part of our lives and new digital learning, enables absorption and participation in foreign cultures, values and perceptions by the digital learners. Especially American lifestyle is influencing us in our everyday life. We see films and series from America and we use American products; but students are not always aware of how they adapt to the American lifestyle through watching American films or series. "The Big Bang Theory" is a good example of how the Americans and foreigners who live in America present themselves and how we get prejudices against other cultures with different cultural background which are presented in episodes of the series. In the course of lifelong learning and concomitant increasing compulsion to flexibility of learning, series as a form of e-learning can represent an efficient media to realize a new culture of teaching and learning about cultures. By considering the aspects of education and intercultural learning written in the scholastic standards, it is necessary to examine the series "The Big Bang Theory" concerning its features and potentials, possible applications in the English foreign language classroom.

The New Celebrity Scientists Declan Fahy,2015-03-06 A new cultural icon strode the world stage at the turn of the twenty-first century: the celebrity scientist, as comfortable in Vanity Fair and Vogue as Smithsonian. Declan Fahy profiles eight of these eloquent, controversial, and compelling sellers of science to investigate how they achieved celebrity in the United States and

internationally—and explores how their ideas influence our understanding of the world. Fahy traces the career trajectories of Richard Dawkins, Stephen Hawking, Steven Pinker, Neil deGrasse Tyson, Brian Greene, Stephen Jay Gould, Susan Greenfield, and James Lovelock. He demonstrates how each scientist embraced the power of promotion and popularization to stimulate thinking, impact policy, influence research, drive controversies, and mobilize social movements. He also considers critical claims that they speak beyond their expertise and for personal gain. The result is a fascinating look into how celebrity scientists help determine what it means to be human, the nature of reality, and how to prepare for society's uncertain future.
