Through Siberia Henry Lansdell,1882

The Archaeology and Geomorphology of Northern Asia Henry N. Michael,1964-12-15 The eighteen articles appearing in this, the fifth, number of Anthropology of the North: Translations from Russian Sources, were mostly published between the years 1957 and 1963. The exceptions are S.I. Rudenko's The culture of the prehistoric population of Kamchatka, published in 1948, and A.P. Okladnikov's Paleolithic remains in the Lena river basin, published in 1953. Thirteen of the articles deal with the archaeology and five with the geomorphology of selected areas of northern Asia. Dr. Chester S. Chard of the University of Wisconsin analyzes the contents and meaning of these articles in his Introduction to the book and fruitfully correlates them with other sources which have been made available to the English-reading specialist over the past few years. In the Notes and References attached to each article, editorial reference has sometimes been added about the availability in English translation of a cited article.

Through Siberia Henry Lansdell,2014-04-17 Anglican missionary Henry Lansdell (1841-1919) published this popular two-volume account of his travels through Russia and Siberia in 1882.

Defending Putin's Empire Mihajlo S Mihajlović,2023-08-26 During the Cold War, the Soviet Union invested heavily in its air defense systems. As a result, Russia now possesses the most advanced air and ballistic missile defense systems in the world. Russian air defense systems are also highly proliferated and are currently in use by many countries. Since the end of the Cold War and the breakup of the USSR, it has become increasingly possible to study Russian air defense, but Russia is by no means an open book on defense-related subjects. Some information circulates in the media, but for the time being, air defense systems are still subject to a degree of speculation. Air and ballistic missile defense programs in the Soviet Union and Russia have a very long history. Soviet engineers started working on both programs in the 1950s, and by 1960 they had built the first successful systems able to intercept enemy aircraft and intermediate-range ballistic missiles. Current Russian air defense doctrine follows a layered multi-level approach providing in depth coverage from any aerial or ballistic missile attack. This layered system allows Russian air defense forces to create zones that can be very difficult to penetrate. The highest level of these defensive networks uses long-range systems providing air defense umbrellas potentially up to 500+ km. The second level includes medium-range systems like the S-350 and Buk variants (infamous for downing Malaysian Airline's flight MH17 over the Ukraine in 2014). This medium-range level is intended to provide air defense zones which are also covered under the long-range systems but are more cost-effective in this envelope. The third level presents mobile short-range systems which are intended to provide extra protection for the long-range systems as well as stationary objects. These systems, along with highly mobile systems like the Buk are often also attached to ground forces formations such as armored and mechanized divisions and brigades. What are the abilities of these systems against NATO? President Putin emphasized the need to strengthen the country's air defenses amid NATO's military activities near Russia's borders. One of the key new concept developments is counter-stealth detection and interception. The other is to counter future hypersonic missile threats. It is, as the author reveals, Russia that is leading the way in these races.

Manchuria Alexander Hosie,2018-12-12 First published in 1901, this volume emerged in the aftermath of the Russian invasion of Manchuria. Its author had been in charge of the British Consulate at Newchwang in Manchuria for two periods between 1894 and 1900. The book contains an account of journeys in Eastern and Northern Manchuria, followed by chapters on recent events in Manchuria along with its climate, people, administration and industry.

Travels in the Regions of the Upper and Lower Amoor, and the Russian Acquisitions on the Confines of India and China ... Thomas Witlam Atkinson,1860 Atkinson had received approval from Nicholas I to travel through and describe the Asiatic domains of the Russian Empire. The first account of his journey was published in 1858 in Oriental and Western Siberia: A narrative of seven years exploration. The present work is a continuation of his observations while travelling in the eastern portions of the Russian Empire, focusing on the natural history and ethnography of the region.
