The Life of a Ship R. M. Ballantyne,2023-02-23 'The Life of a Ship' is a classic adventure tale about a young boy named Davy who has always dreamt about going to sea and living the life of an fearless fisherman. A perfect escape from the drudgery of everyday life. After years of watching ships being built at the docks and going on short excursions with his father and grandfather, he finally gets the chance to go on a great fishing expedition. But is Davy up for the challenge? A perfect fit for fans of exciting 19th century adventure stories complete with a potent take on morality. Recommended for fans of Daniel Defoe's adventure novel 'Robinson Crusoe' and Walt Disney's 1960 movie 'Swiss Family Robinson' starring John Mills, Dorothy McGuire, James MacArthur and Janet Munro. Nobel-Prize winning author William Golding also drew inspiration from Ballantyne's seafaring and adventure prose for his cult novel 'The Lord of The Flies'. R. M. Ballantyne was a Scottish writer specialising in the juvenile fiction genre. He was born as Robert Michael Ballantyne into a family of well-known printers and publishers in Edinburgh. At age 16 he travelled to Canada where he served with the Hudson's Bay Company for six years. He returned to Scotland in 1847 and published his first book the next year, 'Hudson's Bay: or Life in the Wilds of North America'. For several years he was employed by the publishing house Messrs Constable. But in 1856 he decided to leave the literature business. Instead he began writing a series of adventure stories for young readers.

The Ship's Company and Other Sea People James Douglas Jerrold Kelley,1896

The History of the Ship Richard Woodman,2002 This book takes a comprehensive look at the ships of all ages, from dugout canoes to Nelson's ships-of-the-line, from great battleships and ocean liners to today's most sophisticated container ships, aircraft carriers, and supertankers. Intertwined with the history of ships and the men who sailed them is the story of the technological, political, and economic developments that have shaped the evolution of nautical vessels, which Woodman succinctly places within their proper contexts, creating one of the most fascinating histories of man as inventor, trader, and warrior ever written.

Cruise Ships The Small Scale Fleet Peter C Smith,2014-03-31 Peter C. Smith presents us here with the second release in his visually splendid Cruise Ships series. Whilst his first book concerned itself with the large-scale ships currently cruising through our seas (those weighing 40,000 GT and more) this volume focusses on the other end of the market; the ships that weigh in at less than 40,000 GT, but which are often much more stylish and aesthetically pleasing than their larger-scale counterparts. The elegant interiors and luxurious features on display in today's vast fleet of cruise liners remain unrecorded in all but holiday brochures. This book carries on in the tradition of Peter's last release, giving a complete overview of the best of these ships, the cream of the crop, so to speak.??Each colour profile includes external and interior views of the featured ship. Details of the design, building and service history of each vessel are provided with vital statistics of the ship and its facilities.??This is a book of reference for maritime enthusiasts, would-be holiday cruisers and those who have been passengers. It serves as an impressive visual tribute to the best of the smaller scale fleet currently cruising globally.??As seen in the Bedford Times & Citizen.

The USS Ward Richard P. Klobuchar,2015-05-20 In 1940, the threat of war in the Pacific forced the United States to expand its fleet quickly. This effort included reconditioning and recommissioning “four stackers” from the navy’s reserve fleet. Built in 1918 to fight German submarines, the USS Ward earned at Pearl Harbor the distinction of firing the first shot in America’s war against Japan. In the three years that followed, it was bombed, shelled, strafed, and finally sunk (on December 7, 1944), yet none of her crew of 125 men ever lost a life in combat. Information is drawn from naval records as well as from interviews with surviving crewmen. Appendices provide Ward technical data, a chronology of major events, listings of citations earned in World War II and of amphibious landings, and a roster of personnel.

Ships of the American Revolutionary Navy Mark Lardas,2012-01-20 Mark Lardas explores the origins of American warships, primarily light and medium frigates, built for the Continental Navy during the years 1776-1783. This was the first navy of the United States and much of the fleet was comprised of ships that had been modified from existing vessels, converted into warships to provide a crucial service during the American Revolutionary War. Despite having no real funding, this unique fleet had a surprising amount of success against the might of the Royal Navy, and this title discusses the strengths and weaknesses of each design, and the differences between European and American warships of the time. With a close look at how these ships performed in key battles, as well as the exploits of John Paul Jones – the founding father of the United States Navy – this is a complete, illustrated overview of the ships' service and development until France's entry into the war and the subsequent decline in importance of the Continental Navy.

The Good Ship Ian Friel,1995 Traces the momentous advances in ship design during the Middle Ages that made possible the wars, explorations, and trade that followed. Focuses on two innovations, the lateen rig, which uses two or more masts in place of the single-masted square-rigger; and the change from clinker to carvel, or skeleton, construction. Also describes the economic and social forces that shaped the shipbuilding industry, the shipyards, and the workers. Illustrated with drawings and woodcuts. Night Ship Mattie McClane,2003 Night ship, a voyage of discovery, is a short novel with a two-part structure. Six women, unknown to each other by day, join each other in a common dream or mythos aboard a fifteenth century sailing ship. Each character narrates a twenty-first century story and also a fantasy story on the boat. The sailing ship is meant to represent the Lacanian concept of desire for the mother and is further

influenced by Julia Kristeva's theory of the semiotic. The fantasy section constitutes the maternal division of language. The collective dream is fluid and rhythmic; the mythos is the realm of color and aspects of visual language. It is the realm of both spirituality and sexuality. It is the place of lesbian desire.--Author's preface, p. viii-ix.
