The Age of the Ship of the Line Jonathan R. Dull,2009-01-01 For nearly two hundred years huge wooden warships called ships of the line dominated war at sea and were thus instrumental in the European struggle for power and the spread of imperialism. Foremost among the great naval powers were Great Britain and France, whose advanced economies could support large numbers of these expensive ships. This book, the first joint history of these great navies, offers a uniquely impartial and comprehensive picture of the two forces their shipbuilding programs, naval campaigns, and battles, and their wartime strategies and diplomacy. Jonathan R. Dull is the author of two award-winning histories of the French navy. Bringing to bear years of study of war and diplomacy, his book conveys the fine details and the high drama of the age of grand and decisive naval conflict. Dull delves into the seven wars that Great Britain and France, often in alliance with lesser naval powers such as Spain and the Netherlands, fought between 1688 and 1815. Viewing war as most statesmen of the time saw it as a contest of endurance he also treats the tragic side of the Franco-British wars, which shattered the greater security and prosperity the two powers enjoyed during their brief period as allies.

A Ship of the Line C.S. Forester,2011-09-01 May, 1810 — and thirty-nine-year-old Captain Horatio Hornblower has been handed his first ship of the line ... Though the seventy-four-gun HMS Sutherland is 'the ugliest and least desirable two-decker in the Navy' and a crew shortage means he must recruit two hundred and fifty landlubbers, Hornblower knows that by the time Sutherland and her squadron reach the blockaded Catalonian coast every seaman will do his duty. But with daring raids against the French army and navy to be made, it will take all Hornblower's seamanship — and stewardship — to steer a steady course to victory and home ... This is the sixth of eleven books chronicling the adventures of C. S. Forester's inimitable nautical hero, Horatio Hornblower.

Ship of the Line Brian Lavery,1984 This definitive work is a major step forward in the study of the sailing warship. For the first time, the development of the line-of-battle ship is described precisely, in terms of individual ships and classes, highlighting the factors influencing specific changes in design. This sophisticated approach allows the author to tackle a great many myths-such as the static nature of eighteenth century design, or the pre-eminence of French naval architecture-and his conclusions challenge the accepted view in many areas of naval history. For the enthusiast and academic historian alike, The Ship of the Line is essential reading for a better understanding of the navy in the age of sail.Volume II is devoted to technical developments in hull design, construction, rigging, armament and fittings. The definitive work on the subject, a major step forward in the understanding of the sailing warship in the Royal NavyProvides a detailed account of changes in approaches to design over two hundred years A complete description of how ships of the line were constructed in the dockyard and what different types of fittings were applied to the shipso100 line drawings, plus 94 black-and-white illustrationsBrian Lavery is a leading authority on the sailing fighting ship, and is the author of a series of critically acclaimed works, each of which was a major step forward in the understanding of the subject. These include The Arming and Fitting of English Ships of War, Nelson's Navy and Building the Wooden Walls. He is currently Curator of Ship Technology at the National Maritime Museum, Greenwich

The Line of Battle Robert Gardiner,2004 Although purpose built fighting ships had existed earlier, the principal characteristics of the classic sailing warship were defined in the mid-seventeenth century, and the line of battle ship became ever more distinct. Alongside came the greater specialisation of the fleets and the evolution of the frigate and the adaptation of myriad types of craft for naval use. The story of these developments is clearly elucidated in this paperback volume.

British Napoleonic Ship-of-the-Line Angus Konstam,2001-11-25 The French Revolutionary and Napoleonic Wars encompassed a period when rival European fleets vied for naval supremacy, and naval tactics were evolving. The British Royal Navy emerged triumphant as the leading world sea power, and the epitome of Britannic naval strength was the Ship-of-the-Line. These 'wooden walls' were more than merely floating gun batteries: they contained a crew of up to 800 men, and often had to remain at sea for extended periods. This book offers detailed coverage of the complex vessels that were the largest man-made structures produced in the pre-Industrial era.

The Ship of the Line Brian Lavery,2015-01-14 "A beautiful book . . . a goldmine of information to anyone interested in the capital ships of the sailing navy of the 17th and 19th Centuries."—Ships in Scale The National Maritime Museum in Greenwich houses the largest collection of scale ship models in the world, many of which are official, contemporary artifacts made by the craftsmen of the navy or the shipbuilders themselves, and ranging from the mid-seventeenth century to the present day. As such they represent a three-dimensional archive of unique importance and authority. Treated as historical evidence, they offer more detail than even the best plans, and demonstrate exactly what the ships looked like in a way that even the finest marine painter could not achieve. The Ship of the Line is the second of a new series that takes selections of the best models to tell the story of specific ship types—in this case, the evolution of the ship of the line, the capital ship of its day, and the epitome of British seapower during its heyday from 1650-1850. This period also coincided with the golden age of ship modelling. Each volume depicts a wide range of models, all shown in full color, including many close-up and detail views. These are captioned in depth, but many are also annotated to focus attention on interesting or unusual features, and the book weaves the pictures into an authoritative text, producing a unique form of technical history. The series is of particular interest to ship modellers, but all those with an enthusiasm for the ship design and development in the sailing era will attracted to the in-depth analysis of these beautifully presented books.

The Ship of the Line in Battle Sir Reginald Neville Custance,2006

Victory vs Redoutable Gregory Fremont-Barnes,2008-05-20 Late in the morning on October 21, 1805, warships from the British and combined French and Spanish fleets clashed off Cape Trafalgar on the Spanish coast. After a six month game of cat and mouse across the Atlantic, 27 British ships of the line engaged the Allied force of 33 ships of the line. This was a duel of skill, tenacity and bravery as captains and crews battled for mastery of the seas. This book is an opportunity to relive the action at Trafalgar - read the accounts of sailors who were there, and who experienced the sound of scraping cutlasses and bombarding cannons at one of the most important naval engagements of history. Understand how the guns were operated, learn about the training of crews and study the design and development of the incredible ships which dominated naval warfare of the period, as Gregory Fremont-Barnes reveals the revolutionary tactics used by Nelson to secure a victory that saved Britain from the threat of invasion and ensured British naval dominance for over a century.

A Brief History of Fighting Ships David Davies,2002 This introduction to the years of the Napoleonic wars (1793 to 1815) tells the story of one of the keys to that great conflict, the Ship of the Line - the deadly battleships that played such a vital role in the battles. The author describes the ships' construction and armaments, the daily life of the men who served and the problems faced by commanders of the time in battles that include the Glorious First of June, the Battle of the Nile and Trafalgar.

Building the Wooden Fighting Ship James Dodds,James Moore,2022-01-30 A fascinating account of the building of an historic ship, as well as a vivid and often surprising account of life and labour in the eighteenth century. In an age before industrialisation, the warship was the most complex object built by man and employed the most advanced technology of its time. Naval vessels of the period were, not surprisingly, so expensive to construct that meticulous records were kept, from the purchasing of timbers to the last details of their furnishings and armament, including even the individual names of some of the shipwrights and craftsmen. By carefully studying these records, the authors of Building the Wooden Fighting Ship have reconstructed, in extraordinary detail, the building of HMS Thunderer—a two-decked, 74-gun ship-of-the-line. In words and specially drawn illustrations, contemporary prints and paintings, the authors show every stage of the building of this ship, from the purchase and cutting of timbers right through to the launch in 1760. There are descriptions of Woolwich dockyard where she was built and details of all the skills and trades involved in her construction. First published in 1984, this book is a beautiful and highly informative work on a significant aspect of the Royal Navy and will appeal to enthusiasts, modellers, historians, and anyone with an interest in traditional crafts. Praise for Building the Wooden Fighting Ship "This book will appeal to model builders who focus on the Age of Sail and anyone interested in how these incredible pieces of art and engineering were constructed." —Nautical Research Journal "Dodds is both a shipwright and an artist, whose black and white drawings provide readers with a clear understanding of each facet along the way. Moore sails yachts and writes books about ships. Their expertise shines through, turning what might be a ho-hum dry treatise on shipbuilding into a fascinating and easy-to-understand narrative. Originally published in 1984, this new edition is beautifully rendered and well worth the price. There are so many details presented that even those familiar with ship construction will discover new tidbits of information, while those with little understanding of the industry will come away with a deeper appreciation of what it took to build one wooden fighting ship out of more than 3,400 oak trees." —Pirates and Privateers

A Ship of the Line Cecil Louis Troughton Smith, Cecil Louis Troughton,2018-01-17 Plot: May 1810, seventeen years deep into the Napoleonic Wars. Captain Horatio Hornblower is newly in command of his first ship of the line, the seventy-four-gun HMS Sutherland, which he deems the ugliest and least desirable two-decker in the Navy List. Moreover, she is 250 men short of a full crew, so Hornblower must enlist and train poachers, bigamists, sheepstealers, and other landlubbers. By the time the Sutherland reaches the blockaded Catalonian coast of Spain, the crew is capable of staging five astonishing solo raids against the French. But the grisly prospect of defeat and capture looms for both captain and crew as the Sutherland single-handedly takes on four French ships.
