Wayne G. Miller

A Shipyard in Maine Ralph Linwood Snow, Douglas K. Lee, 1999 Toward the end of the nineteenth century, a new firm was established in Bath, Maine, at a time when established yards in the City of Ships were turning to steel construction. Percy & Small would set unrivaled records for wooden shipbuilding and ship management, launching 22 giant five-- and six--masted schooners (along with 16 four--masters) in two decades. Not just builders, Percy & Small also demonstrated an unusual knack for making money as managing owners of a large fleet of schooners, and the stories of their ships are told in these pages in wonderful detail. Doug Lee's meticulously researched construction drawings add immeasurably to the technical information presented in this book. Maritime enthusiasts and modelmakers will find a wealth of information here.

THE SHIPYARD Dave Drummond, 2003-06-03 Senator Ted Kennedy said, My father worked here. The Fore River Shipyard will once again be a symbol of our leadership. And I will do all I can to insure that this leadership continues to thrive. The shipbuilding industry has been struggling in this country as a whole. Employment has dropped to a 40 year low. American-built ships carry less than one percent of world trade. That is unacceptable. Senator John McCain said, We have an obligation to protect the taxpayers' dollars by ensuring that this is a viable project. It is my desire that the Quincy shipyard, into which the state of Massachusetts and the city of Quincy have invested significant resources, will be a successful venture. President Clinton said about shipbuilding and the Quincy yard in particular, Shipbuilding is one of the keys to America's national defense and helping our shipbuilders succeed commercially is an important goal of defense conversion. This administration is committed to preserving highly skilled American jobs and we believe that American shipbuilding can compete and win in world markets. What happened ? SHIPBUILDING USED TO BE ONE OF THE TOP FIVE INDUSTRIES IN THE U.S.A.

A Cornfield Shipyard Andrew Clark, 2019-07-11 Between the years 1942 and 1945, the Missouri Valley Bridge and Iron Company, Shipbuilding Division, constructed 167 LST's (Landing Ship, Tank) at the Evansville Shipyards. This book details the history of the shipyard, it tells the stories of the ships built there, and the brave crews who sailed them off to war. The book contains significant historical text, and is illustrated with diagrams and photographs, many never before published. The book is now in its fourth printing and continues to be popular with former shipyard workers, former LST crewmen, and the families of these men and women. In July, 2003, the USS LST 325 sailed majestically up the Ohio River to Evansville, Indiana. During her 11-day visit over 35,000 people toured this historic ship. While the LST 325 was a product of a Philadelphia shipyard, it is virtually identical to the LSTs that were constructed in Evansville's Cornfield Shipyard. The return of an LST to Evansville's riverfront sparked a renewed interest in the Evansville Shipyard and the 167 LSTs built here. Therefore, in honor of the over 70,000 men and women who worked at the Evansville Shipyard and the thousands of brave men who served on the ships in World War II, Korea, and Viet Nam, we are proud to present this edition of *A Cornfield Shipyard* by Andrew L. Clark. 12? x 9? 136 Pages

The Shipyard Juan Carlos Onetti, 1992 'I am an excellent judge of men and I am sure I will not regret my choice. But it is essential you get to know the company as soon as possible. The post I am

offering you is that of General Manager of Jeremias Petrus Ltd.' With all the enthusiasm of a man condemned to be hanged, Larsen takes up his new post. Like the other workers at the shipyard, he routinely goes through the motions. Every so often, his sense of reality is shaken by a tremor of self-deception and then it is possible for him to believe that the yard's glory is not just a thing of the past. Like Faulkner, a writer he greatly admires, with his imaginary county of Yoknapatawpha, Onetti has created his own, starkly real region of Santa Maria. By the end of the novel we know, love and care for all its despairing inhabitants.

Philadelphia Naval Shipyard Joseph-James Ahern,1997 The first government-owned navy yard in Philadelphia, the birthplace of the nation and the largest city in the young republic, was started with two docks in 1798. The area was enlarged and shipbuilding at this site increased, notably during the War of 1812 and the Civil War. The yard's area was not dramatically increased, however, until the federal government purchased the 800-acre League Island and closed the former facility in 1868. The golden age of the Philadelphia Naval Shipyard came during World War II, when it built fifty-three ships and converted or overhauled some twelve hundred more. Workers at the yard numbered seventy thousand at its peak. After the 1970s, however, shipbuilding was discontinued. The yard continued to serve its country through the modernization of existing craft, but it was closed by the government in 1990 and officially decommissioned in 1996.

The Wilmington Shipyard Ralph L. Scott,2007 As the nation launched into World War II, the North Carolina Shipbuilding Corporation began building the vessels to ensure victory. Although the brief life of the North Carolina Shipbuilding Company was surrounded by controversy, including location and labor disputes, some 243 Liberty- and Victory-class ships were built in Wilmington between 1942 and 1946 to bolster the United States Navy's World War II fleet. Author Ralph Lee Scott examines the impact of this shipyard and its effect on Wilmington's transformation from a sleepy post-Depression coastal town into a major state industrial center. Workers from around the Southeast pitched in and pulled together to build the ships that would help win the largest global conflict of the twentieth century.

Her Finest Hour: Shipbuilding in the Portland Area during World War II Robert La Du,2017-01-05 This work describes the monumental accomplishments of the World War II shipyards in Portland, Oregon, and Vancouver, Washington. Working twenty-four hours a day, seven days a week, they built and launched thousands of vessels—Liberty ships, Victory ships, tankers, aircraft carriers, submarine chasers, and many kinds of landing craft—to help defeat the Axis powers and preserve the way of life of the free world. Robert La Du viewed firsthand these activities from his home overlooking shipyards on the Willamette River. His father worked at Albina shipyard, his sister worked at Henry Kaiser's Swan Island shipyard, and he himself, as a high school student, worked nights at Commercial Iron and Steel shipyard. These experiences inform and enhance the pages of *Her Finest Hour*.

World War II Shipyards by the Bay Nicholas Veronico,2007 In the dark, frenzied years of World War II, the San Francisco Bay Area was the geographic center of a \$6.3 billion West Coast shipbuilding industry. Stretching from the Golden Gate to Vallejo to Sunnyvale, 14 Bay Area yards launched many of the ships that helped save the free world. Basalt Rock of Napa, Bethlehem Steel of San Francisco and Alameda, Hunters Point and Mare Island Naval Shipyards, Joshua Hendy Iron Works of Sunnyvale, Marinship of Sausalito, Permanente Metals in Richmond, and Western Pipe and Steel in South San Francisco are names that still conjure memories for many locals of one of the most impassioned war efforts in human history. Offering new opportunities for African Americans

and women, recruiters searched the nation for workers who relocated here by the thousands. These motivated men and women delivered Liberty cargo ships like the SS Robert E. Peary, built in seven and a half days, a shipbuilding record that stands to this day.

Fleeting Opportunities Amy Kesselman,2016-02-24 This book tells the story of the daily lives of women industrial workers in World War II shipyards. It focuses on their struggle against the persistence of occupational segregation, the sexual and racial hierarchy of the shipyard work force, and the pervasive emphasis on female sexuality which served as a constant reminder that women were transient and marginal imposters. In addition, *Fleeting Opportunities* demonstrates that despite the myth that these women yearned to return to their kitchens, in fact many wanted to continue using their wartime skills in the postwar period. However, finding themselves excluded from jobs by union and management, those who continued to work ended up in low-paying, predominantly female occupations.
