The Story of Loganair Iain Hutchison, 1987 Written from the outside looking in, this book seeks to provide an insight into the growth and operations of a unique airline.

Monthly Summary of Commerce and Finance of the United States United States. Bureau of the Census, 1911

Gone but Not Forgotten Alan Phillips, 2017-09-16 The British airliners we see today in our airports are the result of numerous takeovers and mergers, involving large and small companies. This book covers some of these airlines that have ceased operating since 1946: some collapsed because of financial difficulties, some were taken over by larger airlines, and some ceased operating altogether. In post-war Britain, several small airlines were founded and equipped with surplus military aircraft, the most popular being the Douglas Dakota. The book is a guide to each airline, accompanied by a brief historical account, and interesting images of the aircraft in their distinctive colour schemes. The airlines covered are a selection of large and small aircraft, who flew international and regional routes, as well as airlines involved in inclusive tours business.

On the Way Back Montague Kobbé, 2016-03-15 A British businessman woos a Caribbean woman—and her disapproving family—in this “engrossing novel” (Insight). Nathaniel Jones, a middle-aged businessman from England, travels to the Caribbean island of Anguilla to spend a fortnight on

holiday—and finds himself captivated by a brilliant and beautiful member of the local community, Sheila Rawlingson. After a secret, intense hundred-day courtship, Nathaniel proposes to Sheila, whose agreement to marry this white man is seen as a betrayal by her family and fellow Anguillans. Recognizing the value Anguillan society places on economic projects, Nathaniel attempts to set up an airline business to gain the support and favor of the Rawlingsons. He sends for his son, Dragon, to travel to Anguilla and cofound Dragon Wings, the nation's first commercial airline. Nathaniel, Dragon, and Sheila turn to her uncle for financial backing. But Sheila's uncle will do his best to foil Nathaniel's best-laid plans at every turn . . . "There is something for every reader in this engrossing novel depicting the complexities of inner and outer Caribbean and Latin lives—from the seemingly placid but often privately turbulent world of a small island such as Anguilla to the overwhelming large urban chaos of Caracas, Venezuela—and in its observation of the inevitable connection between public and private spheres. On the Way Back delves fearlessly into the mind and spirit of its main characters with authenticity, humor and an understated compassion but does not flinch in observing human flaws and the death of dreams that result when deep-rooted attitudes prevail." —Insight

Heroes and Landmarks of British Aviation Richard Edwards, Peter J. Edwards, 2012-10-24
Heroes and Landmarks of British Aviation tells the dramatic story of a world leading aviation industry, from the sweat and grease of the workshop, to the board rooms and government nationalisations that ultimately fashioned its destiny. The heroes are Britain's most innovative aviation pioneers and their aircraft, the men and women who persevered to be the first into the air, to fly the fastest, the highest and the furthest. This broad and highly accessible book ranges from the first man to fly across the

English Channel from England to France to the development of the Spitfire and from the disastrous R101 airship to the development of the jet engine and ultimately the worlds first supersonic airliner. Each chapter looks at a different aviation pioneer and the flying machines that they designed, their engineering landmarks, their triumphs in the air and on occasion their disasters too. The book explores the great air races that were won and lost, the government contracts and political short-sightedness that cut short the development of leading aircraft designs and many of the dramatic air raids and sea battles from the First World War to the Falklands and the Middle East. Many of the industrys most prominent names are profiled, including Ernest Willows, the Short brothers, Geoffrey de Havilland, Vincent Richmond, George White, Thomas Sopwith, Harry Hawker, RJ Mitchell, Herbert Smith, Charles Rolls, Henry Royce, Reginald Pierson, Alliott Verdon-Roe, Frederick Handley Page, Robert Watson-Watt, Robert Blackburn and Frank Whittle. Behind the personal stories are the histories of the aircraft companies that these pioneers created, from those that went bankrupt to those that lasted the test of time and have become indivisible from British aviation folklore, such names as Sopwith, Handley Page, Avro, Supermarine, Blackburn, Bristol, Fairey and Rolls-Royce. The book covers the mergers and acquisitions that led to the creation of two major aircraft manufacturers, Hawker Siddeley Group and the British Aircraft Corporation, and how barely two decades later, before the century was out, they were nationalised to form British Aerospace.

Maggie's Farm Clive Radford,2020-03-14 Cody and Carolyn Redford enjoy a carefree lifestyle in Kent County, with friends Gavin and Melanie Maynard. In Cornwall, the Redfords encounter a soothsayer predicting a bleak future for mankind. The foursome then notes some unexplained changes in the behaviour of wild animals and migrating birds, giving credence to the prediction. When a terrorist outrage in South Africa leads to further major atrocities in Israel and India, détente finally fails. Global nuclear war is sparked off by an unforeseen source, resulting in the superpowers

exchanging H-bomb punches like drunken boxers. In the midst of survival, Cody Redford becomes aware of the artificial insemination and incubation (AI2) programme, an initiative hatched in the Cold War years to store the sperm of prominent scientists with the objective of using surrogate hosts to factory farm children in a post-holocaust world. Though appalled, nonetheless, he resigns himself to supporting the programme, unaware of the significant down the road consequences to the nature of human life.

Airliner Models Anthony J Lawler, 2019-10-08 For most of the past century, beautiful models of airliners have been made to promote their airlines' services in travel agents and their own shops. The models also illustrate the evolution of airliner design over these decades: the wood and fabric biplanes of the 1920s, the broad adoption of all-metal airliners in the 1930s, the first jet airliners of the 1950s, the first wide-body airliners of the 1970s and the pioneering small steps in supersonic air travel are all covered. The increasingly colourful exterior schemes adopted by the airlines, to ensure recognition by aspiring passengers, provide an interesting subtext. For model collectors, the airliner type, makers name, scale, approximate age and the materials used are detailed for each model illustrated. A short history of significant model-making companies is covered. With the onset of online bookings and the closure of airline offices and travel agents, the use of models is fast vanishing forever. The focus of this book is to preserve this fascinating era when models were a significant marketing tool, and to ensure that these models, at least in photographic form, survive as a record for future generations.
