Sight Jessie Greengrass,2018-08-21 SHORTLISTED FOR THE WOMEN'S PRIZE FOR FICTION 2018 'A dazzling obsessive entry in a burgeoning genre. Unusual and absorbing... the novel as a whole exudes a strange consoling power.' – The New Yorker 'Sight delves into a lot in under 200 pages: mothers and daughters, birth and death, loss and grief, finding one's balance, the ardor and arduousness of scientific discovery. Readers willing to give themselves over to Greengrass' penetrating vision will surely expand theirs.' – NPR 'With visceral, elegantly wrought truths of life and loss, this is an exciting companion to Sheila Heti's recent Motherhood (2018).' – Booklist In Jessie Greengrass' dazzlingly brilliant debut novel, our unnamed narrator recounts her progress to motherhood, while remembering the death of her own mother ten years before, and the childhood summers she spent with her psychoanalyst grandmother. Woven among these personal recollections are significant events in medical history: Wilhelm Röntgen's discovery of the X-ray; Sigmund Freud's development of psychoanalysis and the work that he did with his daughter, Anna; and the origins of modern surgery and the anatomy of pregnant bodies. Sight is a novel about being a parent and a child: what it is like to bring a person in to the world, and what it is to let one go. Exquisitely written and fiercely intelligent, it is an incisive exploration of how we see others, and how we might know ourselves.

Sight Adrienne Maria Vrettos,2010-05-11 Fifteen-year-old Dylan has horrific visions of the last moments of a child's life -- a child who has been abducted, kidnapped, or worse. Dylan gives the police valuable clues that help them to find children's bodies, but she keeps the most personal information about these young victims to herself. Dylan has become used to withholding her sight abilities -- even from her best friend, Pilar -- but the weight of that secret is becoming almost more than she can bear. Then Cate moves into Dylan's mountain town. Enthusiastic and friendly, Cate seems genuinely interested in Dylan, who begins to reveal a bit about herself. But is Cate all that she seems to be? It's not entirely clear...and it takes the disappearance of Pilar's little sister to finally open Dylan's eyes. In a race against time to save a life, and desperate to focus her abilities so that she herself can survive, Dylan is forced to see more clearly than she ever has before. Sight is a powerful and haunting story from the author of the highly acclaimed debut novel Skin. It will open the eyes of readers everywhere.

Saving Sight Andrew Lam,2013-05-20 In Saving Sight, Dr. Andrew Lam explains the intricacies of human sight and shines a light on the heroes who fought to save it, while also revealing the personal side of life as an eye surgeon - the stress and joy of a man who, on his best days, can turn darkness into light. Many remarkable life stories illuminate this autobiographical/biographical/historical work. Included are Louis Braille, Judah Folkman, Harold Ridley and many others who have enabled us to see in all kinds of unimaginable ways.

Sight and the Ancient Senses Michael Squire,2015-12-22 It is to Greek critical thinking about seeing that we owe our conceptual framework for theorizing the senses, and it is also to such thinking that we owe the lasting legacy of Greco-Roman imagery. Sight and the Ancient Senses is the first thorough introduction to the conceptualization of sight in the history, visual culture, literature and philosophy of classical antiquity. Examining how the Greeks and Romans interpreted what they saw, the collection also considers sight in relation to the other senses. This volume brings together a number of interdisciplinary perspectives to deliver a broad and balanced coverage of this subject. Contributors explore the cultural, social and intellectual backdrops that gave rise to ancient theories of seeing, from Archaic Greece through to the advent of Christianity in late antiquity. This series of specially commissioned thematic chapters demonstrate how theories about sight informed Graeco-Roman philosophy, science, poetry rhetoric and art. The collection also reaches beyond its Graeco-Roman visual framework, showcasing how ancient ideas have influenced the *longue durée* of western sensory thinking. Richly illustrated throughout, including a section of color plates, Sight and the Ancient Senses is a wide-ranging introduction to ancient theories of seeing which will be an invaluable resource for students and scholars of classical antiquity.

**The Sense of Sight** John Berger, 2011-07-13 With this provocative and infinitely moving collection of essays, a preeminent critic of our time responds to the profound questions posed by the visual world. For when John Berger writes about Cubism, he writes not only of Braque, Léger, Picasso, and Gris, but of that incredible moment early in this century when the world converged around a marvelous sense of promise. When he looks at the Modigliani, he sees a man's infinite love revealed in the elongated lines of the painted figure. Ranging from the Renaissance to the conflagration of Hiroshima; from the Bosphorus to Manhattan; from the woodcarvers of a French village to Goya, Dürer, and Van Gogh; and from private experiences of love and of loss to the major political upheavals of our time, *The Sense of Sight* encourages us to see with the same breadth, courage, and moral engagement that its author does.

**Perfect Sight Without Glasses** William Horatio Bates, 2021-04-11 According to this book, patients with eye conditions like unclear close and distant vision, astigmatism, crossed/wandering eyes, cataracts, and glaucoma can relieve their symptoms by performing some physical practices or eye gymnastics. The methods presented here are safe and can be used by children. The practices are based on the principle of multiple repetitive relaxations of eye muscles, which we don't have a habit of practicing on a daily basis. This historical book is especially interesting today when sight issues have become a common problem, and the burden on our eyes has increased tenfold.

Second Sight J. F. Althouse,2010 Jordan Wright, former Navy Seal turned architect, has made the discovery of a lifetime. He is maroon in the Second Age of Man--the Age of Atlantis. Hailed as a prophet, he is thrown into the midst of a brutal war of epic proportions.
