

Sikorsky

William Schweizer, Paul H. Schweizer

The Sikorsky Legacy Sergei I. Sikorsky, The Igor I. Sikorsky Historical Archives, 2007 This book traces the history of Sikorsky aviation and its founder, Igor I. Sikorsky, one of the most talented and versatile aeronautical pioneers in history. Sikorsky's aviation career spanned over 60 years and was highlighted by three major achievements: the creation of the world's first four-engine airliner; the record-breaking Clipper Ships, with which Pan American Airways explored transpacific and transatlantic airline service; and the development of the helicopter. Sikorsky then led his engineers out of the piston-engine era and into the jet age with the design and development of some of the most widely used turbine-powered helicopters in aviation history. More than 200 photographs, many from the Sikorsky family archives, document the genius of Sikorsky's intuitive engineering and his lifelong interest in the challenge of the helicopter, which many historians consider to be his crowning achievement.

The Lindbergh-Sikorsky Connection Igor I. Sikorsky Sr., Vincent J. Tanner, 2021-06-21 Aviation grew from a pioneering and experimental group into an industry in the Golden Era of aviation in the 1930s providing commercial passenger service worldwide. Two aviation pioneers had a role in this development. While Igor Sikorsky is primarily known for his development of the helicopter, he was a leading designer of amphibian aircraft before that. These flying boats established passenger travel by air, first through the Caribbean, then South America, and ultimately the Pacific. Charles Lindbergh found his central role in transforming aviation from a barnstorming stunt into an industry through his epic solo flight across the Atlantic. As a consultant to Pan America, he charted international commercial routes for Juan Trippe's Airline. For the decade of 1930s, these two brilliant minds interacted to create an aircraft industry. This is their story, how they interacted and how they helped shape aviation history.

The Sikorsky Aircraft Centennial John Bulakowski, Frank Colucci, Igor I Sikorsky Historical Archives, 2024-02-06 Igor Sikorsky was a pioneering Russian engineer and aviator driven from his home by revolution. The Sikorsky Aircraft Centennial 1923-2023, a Tribute by the Igor I. Sikorsky Historical Archives, documents his work in the United States and that of the pioneering American company that he founded. It traces the growth of Sikorsky Aircraft from a struggling fixed-wing aviation concern started on a Long Island farm to a world-leading helicopter manufacturer today headquartered in Connecticut. The book draws on archival documents, photos, and interviews to trace Sikorsky's early contributions to commercial aviation and the revolution he brought about in vertical flight. Igor Sikorsky arrived in New York City in 1919 determined to advance aviation technology and later wrote, The United States seemed to me the only place which offered a real opportunity in what was then a rather precarious profession. I had been inspired by the work of Edison and Ford, the realization that a man in this country, with ideas of value -- and I hoped that mine were -- might have a chance to succeed. He launched Sikorsky Aero Engineering Corporation in 1923 and ultimately designed, built, and delivered fixed-wing land planes, amphibians, and flying boats, including the Pan American Airways Clippers that established the first trans-Atlantic and trans-Pacific passenger routes. With demand for his big flying boats declining, Sikorsky turned his engineering genius to rotary-wing flight and piloted his one-of-a-kind VS-300 helicopter in 1939. Recollections from Igor Sikorsky and his son Sergei describe the trial-and-error testing and improvements that made the VS-300 so important. The senior Sikorsky later told his son, The jet may have made the world smaller. The helicopter made it bigger by allowing mankind to live and work in areas that would have been inaccessible by any other vehicle. From Sikorsky's first American fixed-wing aircraft, the S-29A, to the latest helicopter design, the S-102 Raider-X, this book tells the story of every model produced by Sikorsky Aircraft. It traces the development of helicopter air mobility in the U.S. Army and Marine Corps, antisubmarine warfare in the U.S. Navy, combat rescue in the U.S. Air Force, and air-sea rescue in the U.S. Coast Guard. The story also covers the introduction of helicopters in scheduled airlines and the oil industry, and it describes the digital design and manufacturing developments that shape how future aircraft will be designed, built and perform. Richly illustrated with more than 400 unique photos, The Sikorsky Aircraft Centennial 1923-2023 also covers the evolution of Sikorsky Aircraft, today a Lockheed Martin

Company. It illustrates Igor Sikorsky's innovative patents and historic memorabilia and tells a proud story of immigration, invention, and industry. This volume will be a fascinating read for every aviation enthusiast and for those looking to learn more about Igor Sikorsky's history in America.

'Heelicopter' William E. Hunt,1998 In 1939, the Russian Igor Sikorsky successfully piloted the world's pioneer helicopter (a word which he always pronounced with a broad e, as in helix). This account describes how he overcame the many technical problems associated with the development of vertical-lift-off aircraft.

The MISSING LINKS to the Igor Sikorsky Story Sally H. Dickinson,2018-09-28 March 30, 1919, when this Russian immigrant landed in America, no one could have foretold what an impact he would make. His dreams focused on the new field of aviation spearheaded by the Wright brothers about ten years earlier.His vision was to see large airliners full of people, or cargo, or mail traveling great distances in safety and comfort-and beyond that, a vertical flight machine that would lift straight into the air.His ability to follow those dreams in his newly adopted country seemed unattainable until the combined forces of a fellow immigrant and some determined New Englanders caught on to his unheralded abilities in the world of aviation. Unknown stories of what was happening in the Sikorsky business in the mid-to-late 1920s recently came to light when records of that period were discovered in some old file boxes which had been ignored for 50 or more years. This was new information even for the Sikorsky Archives organization in Stratford, Connecticut.Through extensive research, the author has skillfully woven this new information into the well-known stories of Lindbergh's flight, the Frances Grayson debacle, and Igor Sikorsky's many attempts at providing this country with the best fixed wing aircraft possible-and finally the helicopter. Many beautiful photographs previously unpublished are sure to capture the reader's attention.

Skycrane John A. McKenna,2010 The Skycrane was the last creation of aircraft design pioneer Igor Sikorsky. In SKYCRANE: Igor Sikorsky's Last Vision, former Sikorsky Aircraft Executive Vice President John A. McKenna traces the development of this remarkable helicopter from original concept and early sketches to standout performer for the military and private industry. Responsible for building the first S-64 Skycrane in 1961 and for supporting its Army and commercial programs, McKenna has written a comprehensive history chronicling a radically designed helicopter that many thought would not succeed. Indeed, initial versions generated no orders. But General Harry Kinnards vision and advocacy resulted in the Skycranes support of combat operations in Vietnam as part of the groundbreaking concept of supporting Army troops with helicopters rather than trucks. In 1971 Erickson Lumber Company acquired the first Skycrane intended for commercial use to move timber deep in American forests. Owner Jack Erickson later acquired the world manufacturing and support rights to the aircraft creating Erickson Air-Crane Inc. A half century after its first flight the Skycrane continues to save lives, provide essential services, and earn daily profits worldwide. Beautifully illustrated with scores of historical photographs,

SKYCRANE features interviews with engineers who designed and tested the helicopter and with Army pilots who flew it during combat in Vietnam. This engagingly written work is the definitive history of a unique and important aircraft.

A Documentary of Igor I. Sikorsky Edmund Lincoln Eveleth, 2001-06-01 Documentary of Igor Sikorsky's life as told by himself in an interview with Skip Eveleth. Sikorsky, a renowned aviator and aircraft designer who was contemporary with Wilbur and Orville Wright and Louis Bleriot of France, was known as a scholar, astronomer, philosopher, engineer, flyer, orator, aristocrat, and gentleman.--Preface.

AIR CRASH INVESTIGATIONS, WHY DID IT HAPPEN? The Crash of Sikorsky S-76A Helicopter G-BJYX Hank Williamson, editor, 2012-08-01 On March 23, 2004, about 1918:34 central standard time, an Era Aviation Sikorsky S-76A helicopter, N579EH, crashed into the Gulf of Mexico about 70 nautical miles south-southeast of Scholes International Airport (GLS), Galveston, Texas. The helicopter was en route to the drilling ship Discoverer Spirit. The captain, copilot, and eight passengers aboard the helicopter were killed, and the helicopter was destroyed by impact forces. The flight was operating under the provisions of 14 Code of Federal Regulations Part 135 on a visual flight rules flight plan. Night visual meteorological conditions prevailed at the time of the accident. The National Transportation Safety Board determines that the probable cause of this accident was the flight crew's failure to identify and arrest the helicopter's descent for undetermined reasons, which resulted in controlled flight into terrain.

Sikorsky S-92 Helicopter John Bankston, 2019-09-04 There has never been a helicopter like the Sikorsky S-92. It can fly in the desert. It can fly in the ice. It is not only the fastest helicopter, it will soon be used by the U.S. President.

Flying with the Schweizers William Schweizer, Paul H. Schweizer, 2019-06-01 The story of Schweizer Aircraft is the story of the American dream. Three brothers became enamored with flight during the golden age of aviation. Aviation becomes their passion. In 1930, they design, build, and then teach themselves to fly in their first glider. They pursue their dream and create a company that eventually produces over six thousand aircraft. The company's products make aviation history. Bill Schweizer tells the story of those early years — up to the transition of the company in 1981 to the second generation of Schweizers. Paul H. Schweizer picks up the story from there. The Schweizers' entrepreneurial approach to business and refusal to let go of their dream resulted in the company becoming an industry leader in sailplanes, agricultural spray aircraft, light helicopters, covert surveillance aircraft, and unmanned vehicles. The diversity of its aviation products made it unique. At the time the business was sold to Sikorsky Aircraft in 2004, Schweizer Aircraft was the oldest privately-owned aircraft manufacturer in the world. It is a remarkable story that will inspire others with a passion and a dream.

Igor Sikorsky Frank J. Delear, 1992-11-01 The inspiring story of one of aviation's outstanding pioneers. From his first attempts at a helicopter in 1909 in his native Russia to his recognition by Czar Nicholas, his friendship with Charles Lindbergh, and his beliefs about the future of science and mankind, this enlightening examination of Igor Sikorsky presents a man of humanity, piety and humor, whose tenacity and intelligence made his dreams come true.

Sikorsky Hh-52a Lennart Lundh, 2003 In The Sikorsky HH-52A, noted historian Lennart Lundh presents this diminutive helicopters story for the first time. Covered are design details, international service, licensed production by Mitsubishi, and the story of the Seaguards use by the U.S. Coast

Guard. A record of each airframes history is included, as are photographs of three-quarters of the S-62As, S-62Js, and HH-52As produced. Of special interest are the recollections of nearly a score of Coast Guard pilots and aircrew, and the text of the Armys evaluation of the first production airframe.
