The Dorama Encyclopedia Jonathan Clements, Motoko Tamamuro, 2003-11-01 Deeply connected to Japanese anime, manga, music, and film is . . . Japanese TV. This encyclopedic survey of the next cultural tsunami to hit America has over one thousand entries—including production data, synopses, and commentaries—on everything from rubber-monster shows to samurai drama, from crime to horror, unlocking an entire culture's pop history as never before. Over one hundred fifty of these shows have been broadcast on American TV, and more will follow, perhaps even such oddball fare as a Japanese *The Practice* and *Geisha Detective*. Indexed, with resources for fans, couch potatoes, and researchers. Jonathan Clements is contributing editor to *Newtype USA Magazine* and coauthor of *The Anime Encyclopedia*. Motoko Tamamuro is an art historian and contributor to *Manga Max*.

Cross-Cultural Influences between Japanese and American Pop Cultures Kendra N. Sheehan, 2023-05-26 This collection features examinations of popular culture, including manga, music, film, cosplay, and literature, among other topics. Using interdisciplinary sources and analyses, this collection adds to the global discussion and relevancy of Japanese popular culture. This collection serves to highlight the work of multidisciplinary scholars who offer fresh perspectives of ongoing cross-cultural and cyclical influences that are commonly found between the US and Japan. Notably, this collection considers the relationships that have influenced Japanese popular culture, and how this has, in turn, influenced the Western world.

Multilevel Selection Steven C. Hertler, Aurelio José Figueredo, Mateo Peñaherrera-Aguirre, 2020-09-02 This book embeds a novel evolutionary analysis of human group selection within a comprehensive overview of multilevel

selection theory, a theory wherein evolution proceeds at the level of individual organisms and collectives, such as human families, tribes, states, and empires. Where previous works on the topic have variously supported multilevel selection with logic, theory, experimental data, or via review of the zoological literature; in this book the authors uniquely establish the validity of human group selection as a historical evolutionary process within a multilevel selection framework. Select portions of the historical record are examined from a multilevel selectionist perspective, such that clashing civilizations, decline and fall, law, custom, war, genocide, ostracism, banishment, and the like are viewed with the end of understanding their implications for internal cohesion, external defense, and population demography. In doing so, its authors advance the potential for further interdisciplinary study in fostering, for instance, the convergence of history and biology. This work will provide fresh insights not only for evolutionists but also for researchers working across the social sciences and humanities.

Ljubljana Robin McKelvie, Jenny McKelvie, 2005 This guide to Ljubljana, Slovenia, puts this culturally and historically rich city--and very accessible European capital--on the map for travelers to explore. Hotels, restaurants, cafes, and bars are covered in detail, along with the history and culture of this green capital known for its parks and gardens.

Black Robes in Paraguay William F. Jaenike, 2008 This slice of 17th and 18th century western history is a saga of love, savage violence, and betrayal that reads like fiction. While it is centered on a famous Roman Catholic order, its international and religious scope makes it of interest to armchair historians of all beliefs including Protestants, Jews, agnostics and secular

humanists. In colonial South America the Jesuits established missions among the Guarani. As the Portuguese and Spanish slavers descended on Paraguay, the Jesuits sought to protect these stone-age Indians in their missions. Their resistance to the colonists' attacks contributed to the political problems of the church with Catholic monarchs back in Europe. As a consequence, the monarchs pressured a frightened pope to abolish the Jesuit order. In the long, tortured history of European colonization of the Americas, these Jesuit 'Black Robes' in Paraguay stood out as a breed apart, even from their fellow Jesuits elsewhere. Leaders of the anti-Catholic, anti-Jesuit Enlightenment such as Voltaire and Raynal rallied to the side of these extraordinary Paraguay missionaries. Raynal wrote that never has so much good been done for mankind with so little evil. Ironically, the 'heretic' monarchs of Russia and Prussia invited hundreds of the former Jesuits to run their colleges. In doing so, they inadvertently saved these outcasts to become the nucleus around which a reinvigorated papacy would re-establish the Jesuit order forty years after its abolition.

Slovenia Robin McKelvie, Jenny McKelvie, 2005 A full-length guide to this little-known corner of Europe, once part of the larger republic of Yugoslavia, but now an independent country in its own right. Why War Simon Stander, 2015-08-27 This groundbreaking survey explains why war remains predominant in today's world by showing how the spread of

nationalism and capitalism has brought about modern warfare. It argues that the key explanation for modern conflict, which is characterized by violent conflicts between nation-states, civil war, and wars over resources, rests in the dialectical relationship between nation-states and capitalist modes of production, where nations have finite boundaries that capitalism seek to transcend in search of increased profits. Discussing issues such as globalization, global capitalism, North and Latin American continental policies, the nature of democracy, decolonization, and technology and military industrial complexes, this unique work challenges common approaches to international relations and peace studies. This innovative, accessible work provides new insights into the causes and nature of modern war that will appeal to any student concerned with peace and violent conflict within the various fields of international relations, political economy, peace studies, and more.

Cognitive Semantics Vladimir Glebkin, 2024-01-15 The book presents two fundamental theories that characterize the cultural-historical perspective in cognitive semantics: the Four-Level Theory of Cognitive Development (FLTCD) and the Sociocultural Theory of Lexical Complexes (STLC) as well as their application to the analysis of specific material. In particular, the book analyzes the sociocultural history of the MACHINE metaphor, specifically its use in the texts of René Descartes and Francis Bacon. The practical embodiment of STLC is demonstrated through the analysis of lexical complexes such as *otkryvat'* 'to open,' *kamen'* 'stone,' and *intelligencija* 'intelligentsia.' In the final chapter of the monograph, FLTCD and STLC are used for the diachronic analysis of semantic change. The monograph will be of interest to a wide range of linguists, psychologists, cultural

anthropologists, and philosophers who consider language as a sociocultural phenomenon.

Making a New World John Tutino, 2011-08 This history of the political economy, social relations, and cultural debates that animated Spanish North America from 1500 until 1800 illuminates its centuries of capitalist dynamism and subsequent collapse into revolution.

Imperialism and Postcolonialism Barbara Bush, 2014-05-22 This account of imperialism explores recent intellectual, theoretical and conceptual developments in imperial history, including interdisciplinary and post-colonial perspectives. Exploring the links between empire and domestic history, it looks at the interconnections and comparisons between empire and imperial power within wider developments in world history, covering the period from the Roman to the present American empire. The book begins by examining the nature of empire, then looks at continuity and change in the historiography of imperialism and theoretical and conceptual developments. It covers themes such as the relationship between imperialism and modernity, culture and national identity in Britain. Suitable for undergraduates taking courses in imperial and colonial history.

International Politics and Warfare in the Age of Louis XIV and Peter the Great William Young, 2004 The Peace of Westphalia (1648), ending the Thirty Years' War, resulted in the rise of the modern European states system. However, dynasticism, power politics, commerce, and religion continued to be the main issues driving International politics and warfare. Dr. William Young examines war and diplomacy during the Age of Louis XIV and Peter the Great. His study focuses on the later part of the Franco-Spanish War, the Wars of Louis XIV, and the Anglo-Dutch Wars in the West. In addition, the author

explores the wars of the Baltic Region and East Europe, including the Thirteen Years' War, Second Northern War, War of the Holy League, and the Great Northern War. The study includes a guide to the historical literature concerning war and diplomacy during this period. It includes bibliographical essays and a valuable annotated bibliography of over six hundred books, monographs, dissertations, theses, journal articles, and essays published in the English language. *International Politics and Warfare in the Age of Louis XIV and Peter the Great* is a valuable resource for individuals interested in the history of diplomacy, warfare, and Early Modern Europe.

The Chinese Impact upon English Renaissance Literature Mingjun

Lu, 2016-03-09 The Chinese Impact upon English Renaissance Literature examines how English writers responded to the cultural shock caused by the first substantial encounter between China and Western Europe. Author Mingjun Lu explores how Donne and Milton came to be aware of England's participation in 'the race for the Far East' launched by Spain and Portugal, and how this new global awareness shaped their conceptions of cultural pluralism. Drawing on globalization theory, a framework that proves useful to help us rethink the literary world of Renaissance England in terms of global maritime networks, Lu proposes the concept of 'liberal cosmopolitanism' to study early modern English engagement with the other. The advanced culture of the Chinese, Lu argues, inculcated in Donne and Milton a respect for difference and a cosmopolitan curiosity that ultimately led both authors to reflect in profound and previously unexamined ways upon their Eurocentric and monotheistic assumptions. The liberal cosmopolitan model not only opens Renaissance literary texts to globalization theory but also initiates a new

way of thinking about the early modern encounter with the other beyond the conventional colonial/postcolonial, nationalist, and Orientalist frameworks. By pushing East-West contact back to the period in 1570s-1670s, Lu's work uncovers some hitherto unrecognized Chinese elements in Western culture and their shaping influence upon English literary imagination.

World Silver and Monetary History in the 16th and 17th Centuries Dennis Owen Flynn, 1996 This collection of revisionist articles, not based on mainstream monetary theory, but on the application of the Doherty-Flynn model to economic history, discusses the nature of the world silver market in the 16th and 17th centuries.

God and Gadgets Brad J. Kallenberg, 2011-01-01 Technologies are deeply embedded in the modern West. What would our lives be like without asphalt, glass, gasoline, electricity, window screens, or indoor plumbing? We naturally praise technology when it is useful and bemoan it when it is not. But there is much more to technology than the usefulness of this or that artifact. Unfortunately, we tend not to consider the inherently social and moral character of technology. As a result, we are prone to overlook the effects of technology on our spiritual lives. This book investigates the role technology plays in helping and hampering our Christian practice and witness.

Silver Spoon, Vol. 5 Hiromu Arakawa, 2019-12-24 The second Ezo Ag cleanup of the year yields a surprise even greater than the first! Once again, Hachiken makes the find that has the whole school talking-and fawning-when he uncovers an abandoned puppy in a rubbish pile. After a bath and blow-dry, the pup

takes up residence in the stables as the unofficial mascot of the Equestrian Club. But with all the attention, the new Vice Prez threatens to usurp the authority of his master! And no one hates losing more than Hachiken!!

Smuggling Alan L. Karras, 2010 In this lively book, Alan L. Karras traces the history of smuggling around the world and explores all aspects of this pervasive and enduring crime. Through a compelling set of cases drawn from a rich array of historical and contemporary sources, Karras shows how smuggling of every conceivable good has flourished in every place, at every time. Significantly, Karras draws a clear distinction between smugglers and their more popular criminal cousins, pirates, who operated in the open with a type of violence that was nearly always shunned by smugglers. Explaining the divergence between the two groups, the book illustrates both crossovers and differences. At the same time, states and empires tolerated smuggling since eliminating smuggling was a sure route to a disgruntled and disorderly citizenry, and governments required order to remain in power. As a result, smuggling allowed individuals to negotiate an unstated social contract that minimized the role of government in their lives. Thus, Karras provocatively argues that smuggling was, and is, tightly woven into an uneasy relationship among governments, taxation, citizenship, and corruption. Bringing smugglers and smuggling to life, this book provides a fascinating exploration for all readers interested in crime and corruption throughout modern history.
