*Decimus Laberius* Costas Panayotakis,2010-02-11 This is a newly revised, critical text of the fragments attributed to the Roman knight and mimographer Decimus Laberius, a witty and crudely satirical contemporary of Cicero and Caesar. Laberius is perhaps the most celebrated comic playwright of the late Republic, and the fragments of plays attributed to him comprise the overwhelming majority of the extant evidence for what we conventionally call 'the literary Roman mime'. The volume also includes a survey of the characteristics and development of the Roman mime, both as a literary genre and as a type of popular theatrical entertainment, as well as a re-evaluation of the place of Laberius' work within its historical and literary context. This is the first English translation of all the fragments, and the first detailed English commentary on them from a linguistic, metrical, and (wherever possible) theatrical perspective.

The Butterflies of Canada Ross A. Layberry,Peter W. Hall,J. Donald Lafontaine,1998-01-01 Beautifully illustrated and clearly presented, The Butterflies of Canada is an indispensable guide to all aspects of butterfly study. Butterfly collecting has long been a popular summer activity, and as the growing popularity of butterfly watching and conservatories in Ontario and British Columbia shows, butterflies are a continuing source of delight and interest to Canadians. The Butterflies of Canada is the first comprehensive guide to all the butterflies found in Canada. Based on the national butterfly collection maintained by Agriculture and Agri-Food Canada, it contains descriptive individual accounts for the close to three hundred butterfly species recorded in Canada, including descriptions of early stages, subspecies, and key features that help distinguish similar species. Each species of butterfly has an individual distribution map, generated from a database of more than 90,000 location records. More than just a field guide to identifying Canadian butterflies, however, The Butterflies of Canada includes chapters on Canadian geography and butterfly distribution, conservation, gardening, photography, and the history of butterfly study in Canada. It also contains new and unpublished information on the classification of butterflies, their ranges, larval food plants, abundance, flight seasons, and noteworthy habits. Thirty two colour plates provide diagnostic details for each species, and also feature butterflies in their natural habitats. There is an extensive bibliography.

Musical Rhythm in the Age of Digital Reproduction Anne Danielsen,2016-04-29 Musical Rhythm in the Age of Digital Reproduction presents new insights into the study of musical rhythm through investigations of the micro-rhythmic design of groove-based music. The main purpose of the book is to investigate how technological mediation - in the age of digital music production tools - has influenced the design of rhythm at the micro level. Through close readings of technology-driven popular music genres, such as contemporary R&B, hip-hop, trip-hop, electro-pop, electronica, house and techno, as well as played folk music styles, the book sheds light on how investigations of the musical-temporal relationships of groove-based musics might be fruitfully pursued, in particular with regard to their micro-rhythmic features. This book is based on contributions to the project Rhythm in the Age of Digital Reproduction (RADR), a five-year research project running from 2004 to 2009 that was funded by the Norwegian Research Council.
