Power Brands Hajo Riesenbeck,Jesko Perrey,2007-03-26 Contrary to the belief that brand management is mostly a matter of art and luck, the teams at McKinsey teams found out how brands can be measured, built, and managed systematically. Power Brands reveals the secret of strong brands, presenting a holistic approach to brand management, which combines precise science with target-oriented craft and inspiring art. Using concepts developed from a university study, the book introduces McKinsey BrandMatics, which combines systematic, qualitative concepts and indicators (e.g., brand image) with quantitative ones (e.g., revenue potential), resulting in a comprehensive and transparent framework for successful brand management.

History in the Humanities and Social Sciences Richard Bourke,Quentin Skinner,2022-12-22 This interdisciplinary volume explores the relationship between history and a range of disciplines in the humanities and social sciences: economics, political science, political theory, international relations, sociology, philosophy, law, literature and anthropology. The relevance of historical approaches within these disciplines has shifted over the centuries. Many of them, like law and economics, originally depended on self-consciously historical procedures. These included the marshalling of evidence from past experience, philological techniques and source criticism. Between the late nineteenth and the

middle of the twentieth century, the influence of new methods of research, many indebted to models favoured by the natural sciences, such as statistical, analytical or empirical approaches, secured an expanding intellectual authority while the hegemony of historical methods declined in relative terms. In the aftermath of this change, the essays collected in *History in the Humanities and Social Sciences* reflect from a variety of angles on the relevance of historical concerns to representative disciplines as they are configured today.

THE CORONATION Justin Newland, 2019-11-05 It is 1761. Prussia is at war with Russia and Austria. As the Russian army occupies East Prussia, King Frederick the Great and his men fight hard to win back their homeland. In Ludwigshain, a Junker estate in East Prussia, Countess Marion von Adler celebrates an exceptional harvest. But this is soon requisitioned by Russian troops. When Marion tries to stop them, a Russian Captain strikes her. His Lieutenant, Ian Fermor, defends Marion's honour, but is stabbed for his insubordination. Abandoned by the Russians, Fermor becomes a divisive figure on the estate. Close to death, Fermor dreams of the Adler, a numinous eagle entity, whose territory extends across the lands of Northern Europe and which is mysteriously connected to the Enlightenment. What happens next will change the course of human history...

Legalism Fernanda Pirie, Judith Scheele, 2014-07-31 'Community' and 'justice' recur in anthropological, historical, and legal scholarship, yet as concepts they are notoriously slippery. Historians and lawyers look to anthropologists as 'community specialists', but anthropologists often avoid the concept through circumlocution: although much used (and abused) by historians, legal thinkers, and political philosophers, the term remains strikingly indeterminate and often morally overdetermined. 'Justice', meanwhile, is elusive, alternately invoked as the goal of contemporary political theorizing, and wrapped in obscure philosophical controversy. A conceptual knot emerges in much legal and political thought between law, justice, and community, but theories abound, without any agreement over concepts. The contributors to this volume use empirical case studies to unpick threads of this knot. Local codes from Anglo-Saxon England, north Africa, and medieval Armenia indicate disjunctions between community boundaries and the subjects of local rules and categories; processes of justice from early modern Europe to eastern Tibet suggest new ways of conceptualizing the relationship between law and justice; and practices of exile that recur throughout the world illustrate contingent formulations of community. In the first book in the series, *Legalism: Anthropology and History*, law was addressed through a focus on local legal categories as conceptual tools. Here this approach is extended to the ideas and ideals of justice and community. Rigorous cross-cultural comparison allows the contributors to avoid normative assumptions, while opening new avenues of

inquiry for lawyers, anthropologists, and historians alike.

The Next 100 Adriano Sack,B. M. W. Group,2016-12 The Next 100 - with this in mind, the BMW Group marks its 100th birthday by focusing its attention on the future. What will mobility be like tomorrow? What role will companies play in society? How and where will people live? What effects will digitisation and globalisation have on the world we live in? How will it be possible to maintain the company's position as the driving force behind progress and innovation? In The Next 100 the BMW Group does not limit its coverage to its own plans and scenarios but invites experts from a variety of social spheres - scientists, engineers, entrepreneurs, journalists and artists - to join the BMW Group in reflecting on and discussing the future. However, the publication also pays due attention to the

history of the company, which has been consistently characterized by its focus on the future. The book offers fascinating insights into the fundamental thought processes behind the vehicles and takes a detailed look at their genesis.

Nostalgia in the Early Modern World Harriet Lyon, Alexandra M. Walsham, 2023-05-23 How can the concept of nostalgia illuminate the culturally specific ways in which societies understand the contested relationship between the past, present, and future? The word nostalgia was invented in the late seventeenth century to describe the debilitating effects of homesickness. Now widely defined as a sense of longing for a lost past, initially it was more closely linked with dislocation in space. By exploring some of its many textual, visual and musical manifestations in the tumultuous period between c. 1350 and 1800, this volume resists the assumption that nostalgia is a distinctive by-product of modernity. It also forges a fruitful link between three lively areas of current scholarly enquiry: memory, temporality, and emotion. The contributors deploy nostalgia as a tool for investigating perceptions of the passage of time and historical change, unsettling experiences of migration and geographical displacement, and the connections between remembering and forgetting, affect and imagination. Ranging across Europe and the Atlantic world, they examine the moments, sites and communities in which it arose, alongside how it was used to express both criticism and regret about the religious, political, social and cultural upheavals that shaped the early modern world. They approach it as a complex mixed feeling that opens a new window into individual subjectivities and collective mentalities.

Inside-out Marketing Michael Dunmore, 2005-12-03 This practical guide provides an understanding of internal marketing and the seven components of an internal marketing strategy (IMS). Put simply, internal marketing is largely about the things people do within an organization that contribute to the

achievement of the organization's overall purpose and success. By offering a balance of both theory and practice, Michael Dunmore shows the reader how to develop an IMS that integrates the whole organization and produces teams that can work together towards common goals and outcomes. In this way he shows how a strong internal marketing strategy can be critical to achieving and sustaining competitive advantage, as well as being a major driver of change and enhanced performance. Topics covered include: vision, mission and values of an organization; corporate strategy; processes and service standards; knowledge management; internal communication; HR strategy; and integrating internal and external marketing.
