Skytrain to Nowhere Brandon Adamson, 2018-05-28 Skytrain to Nowhere is an imagination driven and esoteric volume of free-form poetry. The book documents the author's experiences, thoughts and observations while riding the skytrain at Phoenix Sky Harbor International Airport over the period of several weeks. Since the skytrain is only designed to transport travelers between various terminals and parking facilities at the airport, someone spending nearly 50 hours riding it purely for recreation and artistic inspirational purposes is highly unusual (to put it mildly.) Aside from occasional quirky anecdotes about various passengers, the poems mostly deal with themes of motion, the passage of time, and nostalgia. The author grapples with these issues from a retro-futurist perspective. Skytrain to Nowhere celebrates the realization that our vitality hinges on our ability to always keep moving, while recognizing we are unwilling or unable to leave some things behind on the journey.

C-47/R4D Skytrain Units of the Pacific and CBI David Isby, 2012-11-20 From Pearl Harbor to VJ-Day, the humble Douglas C-47/R4D carried out missions every bit as strategically important, and as dramatic for the aircrew involved, as those of the fighters and bombers in the vast Pacific/CBI theatres. The C-47's wartime operations paved the way for post-war military and civil air transport, proving that aircraft could safely conduct routine flights from the USA, Australia and India throughout the Pacific and South-east Asia. The flights also demonstrated how the USAAF was able to invest in, and carry out, a mission that it had barely prepared for in terms of doctrine pre-war. In addition to linking theatres, the C-47 found itself in the vanguard of combat operations on virtually a daily basis in New Guinea, Burma, the Philippines, the SWPA and China. The importance of these missions, and the dangers faced by crews tasked with carrying them out, is chronicled in numerous first-hand accounts from the aircrew involved in this unique volume on the Allies' favourite transport aircraft of

World War 2.

*Skytrain* Philip Kaplan, 2018-07-31 The legendary Douglas DC-3 airliner was a technological breakthrough that changed the course of both civilian and military aviation. In the 1930s, passenger air travel was expensive, uncomfortable, and frequently unreliable. That began to change with the appearance of the handsome, thoroughly modern DC-3, the twenty-one-passenger twin-engine propeller-driven creation of Donald Douglas and his young California company. The first production models were sold to airlines for \$90,000. The price climbed to \$115,000 just before the United States entered the Second World War in December 1941. The new plane quickly became a favorite of passengers the world over, and it became the first truly profitable plane for the industry. The threat posed by the coming war made the US Army realize that a military version could handle the vital troop and cargo transport capability soon to be needed. The C-47 Skytrain was born and evolved into specialized versions with many nicknames: Gooney Bird, Dakota, and Puff the Magic Dragon. In WWII, General Dwight Eisenhower was so impressed he referenced it in his famous comment: "The four pieces of equipment the most vital to Allied success in Africa and Europe were the bulldozer, the jeep, the two-and-a-half-ton truck, and the Douglas C-47." Skytrain celebrates the long and distinguished career of this great plane.

*Skytrain to Murder* Dean Barrett, 2003 *Skytrain to Murder* is a detective novel set in Bangkok. An American detective and scuba diving teacher chases a murderer through Bangkok's seedy underbelly including dangerous slums, high class gentlemen clubs and a house of domination. His Thai girlfriend is a martial arts expert (in muay-Thai) and assists him in rescuing a young girl from slum gangs even while the detective suspects she may in fact be the murderer. Cover will have praise from well known novelists in the mystery field.

**SkyTrain Explorer** John Atkin, 2005 Lydia McKenzie is an artist whose medium is the camera. She's having her first one-woman show. It is a series that ties to actual murders committed in the city's past. Her method is to find a model—someone who can match in a general way the actual female victim—and pose her in the clothes and position in which the actual victim was found. The night of her showing, however, is disappointing; the owner of the gallery makes her pay for the invitations down to the stamps, hang the whole show herself, and rush for the usual wine and snacks. But what happens next is much worse: two plainclothes policemen shut down the event and take Lydia in for questioning. A young woman whom she knew well, and who was the model in one of her photographs, has been murdered. Worried that the police aren't doing what they should, Lydia and another friend set out to find the killer. The winner of the celebrated St. Martin's Minotaur/Malice

Domestic Best First Traditional Mystery Novel Competition, Posed for Murder presents a snapshot of crime in a lasting and memorable story.

*Sustainable Rail Transport* Anna Fraszczyk,Marin Marinov,2018-06-19 These conference proceedings include a collection of articles presented at the RailExchange conference in October 2017 at Newcastle University, UK. They will be useful for researchers in developing countries looking for opportunities of knowledge exchange. The RailExchange project aimed to develop sustainable railway education in Thailand, via international partnerships and industry collaborations based around stakeholders' expertise and experiences. It involved staff exchange (academics and researchers) between Mahidol and Newcastle University for joint research and curriculum development and also organizing railway conferences and workshops in both Thailand and the UK. The papers published here focus on rail-related issues and present a perspective of a widely understood 'exchange' in academia and industry environments. 'Exchange' is perceived as rail knowledge exchange between partners, rail staff exchange between academia and/or industry, research exchange between teams, student-lecturer knowledge exchange, academia-industry collaboration, etc. In addition, more general

rail-related papers are also included.

**Skytrain Over Lake Winnepesaukee** Stewart H. Benedict, Eugene C. Flinn, Davis Lowthert, 2009-12-27 Skytrain Over Lake Winnepesaukee is exactly what the title suggests: something that seems to be a silver train soaring above the clouds without any tracks or visible means of support.

C-47 Skytrain David Doyle, 2024-03-28 The Douglas C-47 Skytrain and its near twin, the C-53 Skytrooper, formed the backbone of American airborne transport during WWII. In addition to hauling cargo, these aircraft also delivered paratroopers to the front, including the Normandy invasion. The aircraft also towed troop-laden gliders during these operations and incredibly could also snatch gliders from the ground while the C-47 was in flight. Derived from the Douglas DC-3, the C-47 saw service with US and Allied militaries in Korea and even Vietnam, including notably the heavily armed AC-47D gunship. This volume explores the development and use of the aircraft, as well as details of its construction.

*Invasion Airfields* Winston Ramsey, 2017-08-30 In his 1945 report to the Combined Chiefs-of-Staff on the success of Operation "Overlord", the Supreme Commander General Eisenhower wrote that on the morning of June 9 I was able to announce that for the first time since 1940, Allied air forces were operating from France, and that within three weeks of D-Day, 31 Allied squadrons were operating

from the beach-head bases. In their forecasts for the first three months following D-Day, the planners plotted the number of the advanced landing grounds that would be required in Normandy to support the Allied air forces up to September 1944. Using maps and aerial photographs, individual sites were surveyed and plans drawn up so that when each location was captured, either US Aviation Engineers, the Royal Engineers or RAF Airfield Construction Wings, could move in without delay to begin work to build them. This book tells the story of every airfield that became operational by D+90, explaining the methods used to construct them and the units that flew from them. The vast majority of the temporary airstrips have now been returned to the farmland from which they came, but by using engineers' plans from the period and modern aerial photographs, we have portrayed the sites in true After the Battle fashion: as they were then and as they are today.

C-47A Skytrain Model Glenn Hoover, 2019-04-26 This book contains detailed instructions on building the C-47A 1/48 scale model aircraft from Trumpeter. In addition to the kit's instructions, there are 4 aftermarket kits with Eduard's BIG4911 set - each with their own instruction. Can you imagine merging all of these instructions? Well, I've done that for you and more. I take the model kit instructions from Trumpeter along with the Eduard sets and break them up into individual steps. The aftermarket steps are colored gray or yellow making them easy to skip if you just have the basic model. This book provides a little history of the Skytrain, photos of the aftermarket kits, a detailed list

of tools that I used to build this model, along with a list of paints. The actual instruction section contains 1,091 steps and 120 plus figures over 173 pages that tell you what to dry fit, glue, and/or paint for each individual piece. Each step instruction shows the source (i.e., either Trumpeter or Eduard) along with a block to mark that you completed the step. The major instruction sequence for this model is 1. Cockpit 2. Cargo Area 3. Cargo Seat Belts 4. Fuselage 5. Doors 6. Landing Flaps 7. Wings 8. Engines 9. Wheel Wells 10. Center Wing Assembly 11. Stabilizers 12. Paint & Decals 13. Landing Gear 14. Exhaust 15. Bottom Antennas 16. Propellers 17. Top Antennas 18. Ladder 19. Add Wings I provide an index of the individual sprue parts that show where in the book the part is mentioned. This index was a great way to make sure that no pieces were overlooked. Finally, there are several pages of in-process photos with assembly tips and the final photos of my build for reference. This book is a great checklist to make your build go smoothly. Of course, you can feel free to use different tools, paint, weathering, etc. or even add your own diorama. I hope you find this book useful. See a 16-page sample along with photos of finished models and other books at [glennhoovermodels.com](http://glennhoovermodels.com).
