Proceedings of the 9th International Conference on Technical and Vocational Education and Training (ICTVET 2022) Ambiyar,Unung Verawardina,Oskah Dakhi,2023-05-01 This is an open access book. Indonesia, as a member of ASEAN, is now facing the ASEAN Economic Community (AEC) 2016. The AEC will support the ASEAN's transformation into a region that guarantees free movement of goods, services, capital, and skilled labors. This will make ASEAN an even more dynamic and competitive region. In preparation for the AEC, the ASEAN member countries have ventured to improve the comparability and connectivity of their TVET systems. As an important component of human resources development, TVET is expected to play an active role in preparing the successful EAC. The implications of technological, economic and social trends are intervening factors that refine pedagogical strategies, leading to the molding of TVET as a more effective platform to catalyze pragmatic approaches to prepare the workforce for the new imperatives of the world of work. Regional integration and harmonization of TVET in the region have become key concerns and at the same time the strength of the ASEAN region. They are considered the overarching interventions needed in TVET to address major issues and challenges.

The Production-Comprehension Interface in Second Language Acquisition Anke Lenzen,2021-01-14 Examining a key issue in second language acquisition (SLA) research, this book explores the relation between second language (L2) production and comprehension at the level of processing. The central question underlying this interface is the relationship between grammatical encoding and decoding, namely: are the two modalities of production and comprehension subserved by different types of processors, or by the same syntactic processing module? Proposing an 'Integrated Encoding-Decoding Model' of SLA, Anke Lenzen presents the results of a comprehensive empirical study to demonstrate the extent to which the two modalities rely on shared representations and/or shared processes. Through this detailed analysis The Production-Comprehension Interface in Second Language Acquisition sheds new light on the cognitive architecture of human language processing and offers a deeper understanding of the mechanisms at work in the L2 acquisition process.

River Flow 2016 George Constantinescu,Marcelo Garcia,Dan Hanes,2016-06-22 Understanding and being able to predict fluvial processes is one of the biggest challenges for hydraulics and environmental engineers, hydrologists and other scientists interested in preserving and restoring the diverse functions of rivers. The interactions among flow, turbulence, vegetation, macroinvertebrates and other organisms, as well as the transport and retention of particulate matter, have important consequences on the ecological health of rivers. Managing rivers in an ecologically friendly way is a major component of sustainable engineering design, maintenance and restoration of ecological habitats. To address these challenges, a major focus of River Flow 2016 was to highlight the latest advances in experimental, computational and theoretical approaches that can be used to deepen our understanding and capacity to predict flow and the associated fluid-driven ecological processes, anthropogenic influences, sediment transport and morphodynamic processes. River Flow 2016 was organized under the auspices of the Committee for Fluvial Hydraulics of the International Association for Hydro-Environment Engineering and Research (IAHR). Since its first edition in 2002, the River Flow conference series has become the main international event focusing on river hydrodynamics, sediment transport, river engineering and restoration. Some of the highlights of the 8th International Conference on Fluvial Hydraulics were to focus on inter-disciplinary research involving, among others, ecological and biological aspects relevant to river flows and processes and to emphasize broader themes dealing with river sustainability. River Flow 2016 (extended abstract book 854 pages + full paper CD-ROM 2436 pages) contains the contributions presented during the regular sessions covering the main conference themes and the special sessions focusing on specific hot topics of river flow research, and will be of interest to academics interested in hydraulics, hydrology and environmental engineering.
