**The Oxford Handbook of Social Media and Music Learning** Janice L. Waldron,Stephanie Horsley,Kari K. Veblen,2020-09-23 The rapid pace of technological change over the last decade, particularly the rise of social media, has deeply affected the ways in which we interact as individuals, in groups, and among institutions to the point that it is difficult to grasp what it would be like to lose access to this everyday aspect of modern life. The Oxford Handbook of Social Media and Music Learning investigates the ways in which social media is now firmly engrained in all aspects of music education, providing fascinating insights into the ways in which social media, musical participation, and musical learning are increasingly entwined. In five sections of newly commissioned chapters, a refreshing mix of junior and senior scholars tackle questions concerning the potential for formal and informal musical learning in a networked society. Beginning with an overview of community identity and the new musical self through social media, scholars explore intersections between digital, musical, and social constructs including the vernacular of born-digital performance, musical identity and projection, and the expanding definition of musical empowerment. The fifth section brings this handbook to full practical fruition, featuring firsthand accounts of digital musicians, students, and teachers in the field. The Oxford Handbook of Social Media and Music Learning opens up an international discussion of what it means to be a musical community member in an age of technologically mediated relationships that break down the limits of geographical, cultural, political, and economic place.

*Human-Harmonized Information Technology, Volume 2* Toyoaki Nishida,2017-04-20 Going from the philosophy and concepts to the implementation and user study, this book presents an excellent overview of Japan's contemporary technical challenges in the field of human-computer interaction. The next information era will be one in which information is used to cultivate human and social potential. Driven by this vision, the outcomes provided in this work were accomplished as challenges to establish basic technologies for achieving harmony between human beings and the information environment by integrating element technologies including real-space communication, human interfaces, and media processing. Ranging from the neuro-cognitive level to the field trial, the research activities integrated novel perceptual technologies that even exceed human ability to sense, capture, and affect the real world. This book grew out of one of the CREST research areas funded by the Japan Science and Technology Agency. The theme of the project is "the creation of human-harmonized information technology for convivial society", where 17 research teams aimed at a common goal. The project promotes a trans-disciplinary approach featuring (1) recognition and comprehension of human behaviors and real-space contexts by utilizing sensor networks and ubiquitous computing, (2) technologies for facilitating man-machine communication by utilizing robots and ubiquitous networks, and (3) content technologies for analyzing, mining, integrating, and structuring multimedia data including those in text, voice, music, and images. This is the second of two volumes, which is contributed by eight team leaders. Besides describing the technical challenges, each contribution lays much weight on discussing the philosophy, concepts, and the implications underlying the project. This work will provide researchers and practitioners in the related areas with an excellent opportunity to find interesting new developments and to think about the relationship between human and information technology.

He never imagined that these videos would become so popular that he would end up signing with a record label. This was the start of the unstoppable force that is Shawn Mendes. Shawn Mendes was born in 1998 in Toronto, Canada. When he was 14 years old, he taught himself how to play guitar by watching YouTube videos. He would compose six-second videos and then upload them to a video-sharing platform. In just a few months, he had gained millions of fans and became one of the biggest stars online. He was noticed by an artist manager who got him a recording contract. In 2014 he dropped his first single, "Life of the Party." This was followed in 2015 by his debut album, Handwritten, which reached number one on the Billboard 200 chart and sold more than 100,000 copies in its first week. Mendes's career was able to take off so quickly because he already had a large built-in fan base of online followers. In 2016, Mendes released his second album, Illuminate. A self-titled album came out two years later. Both received favorable reviews from critics while also topping the Billboard 200 chart. This made him the third youngest artist to have three number one albums, behind Justin Bieber and Miley Cyrus. Mendes had clearly changed from the boy who sang cover songs into a true star. Mendes said in an interview that he gets his inspiration from fans. He loves hearing how his music has influenced them, and he hopes to create songs for big moments in people's lives. "I want to do incredible things that make a difference," he said. "It's not only about the music you release; it's about the things you do while you're making the music." On that note, Mendes has made philanthropy a key part of his identity. He has created or worked with organizations to help promote education, provide relief for earthquake victims, and raise money for women with breast cancer. It is obvious there is no stopping this talented young man. So long as he has the opportunity to be a role model, he will continue inspiring others with his music and his charity.
