

Snow Shark

Matthew C. DuPée

Shark Week 2 Steve Hutchison,2023-02-23 Nothing puts a smile on a shark's face like Shark Week. Getting your leg bitten off is trendier than getting a tattoo, nowadays. It makes a great story to tell and you can even make a movie about it. When they are not exploring space, growing five additional heads, or traveling by means of tornadoes, sharks are busy getting turned into robots, lava, sand, ice, or ghosts. Sharks are our friends, except when they're hungry, which they usually are. If you show signs of weakness or hostility, you will be attacked. If you bleed, you will be attacked. Shark Week is the time of the year when you do not want to be swimming with sharks. In this second edition of Shark Week, I review 78 shark movies and rank them from pathetic to great. Watch them in order; they will only get better!

Shark Week Steve Hutchison,2023-02-23 Sharks can be giant, mutated, metallic, or prehistoric. Some of them live in tornadoes, some in the snow. Sharks are our friends, except when they're hungry, which they usually are. If you show signs of weakness or aggression, you will be attacked. If you bleed, you will be attacked. Shark Week is the time of the year when you do not want to be swimming with sharks. In this book, I review 64 shark movies ranked from worst to decent. If you watch them in order, they will only get better.

Oh No, Shark in the Snow! Nick Sharratt,2021-10-07 Timothy Pope, Timothy Pope looks again through his telescope. As snowflakes fall without a sound, he looks left, he looks right, he looks all around. Wait, is that a SHARK? Turn the page to find out, if you dare . . . With its funny rhyming text, die-cut holes to peep through and a visit from Santa, this is a an irresistible adventure full of all the magic of Christmas.

Snowshark Clyde V. Collard,2009-10-30 Human fear of sharks is not just a reaction to the Jaws films. Scientists have confirmed that we have an inherent fear of sharks dating from our evolutionary period as aquatic apes. We have inherited an innate fascination with sharks and a paralyzing terror of the rending teeth and insatiable maw. Now that which we encountered only in our most appalling swims in the snow like a shark swims in the ocean..and eats people. Here is a tale of that enormous beast as it terrorizes a ski resort during the greatest snowstorm of the century. Over thirty years have passed since the Great Snowstorm of 1976. Few people who experienced that terrible disaster ever knew of a small group who were exposed to a horrifying chimera as a result of that storm. This is the story of that courageous company.

A Scary Little Christmas Matthew C. DuPée,2022-06-03 Controversial yet beloved among audiences, Christmas-themed horror movies emerged in the early 1970s and gained a notorious reputation with Silent Night, Deadly Night (1984), depicting Santa as an ax-wielding maniac. Some parents and conservative groups condemned the film, while others embraced the portrayal of Yuletide as a backdrop for fear and dread. Drawing on interviews with directors, producers, special effects artists, photographers and actors, this book celebrates the sordid, colorful history of the Christmas horror subgenre. Psycho Santa films such as Christmas Evil (1980) and 3615 code Pere Noel (1989) are examined, along with Yule-Die slashers like The Dorm that Dripped Blood (1982), Black Christmas (1974) and Silent Night, Bloody Night (1972). Commercial successes like Gremlins (1984) and Rare Exports: A Christmas Tale (2010) are covered, as well as more recent releases such as

Better Watch Out (2016), Red Christmas (2016) and Deathcember (2019). Rare photographs, promotional materials and an annotated filmography are provided.

Dewey Fairchild, Teacher Problem Solver Lorri Horn, 2018-09-18 Genius problem solver Dewey takes up the challenge after a client shows up desperate to pacify his teacher. In this follow-up to Dewey Fairchild, Parent Problem Solver, It turns out that tons of kids have troublesome teachers, so he's soon up to his neck in cases—from classic cases of teachers who are so boring to bizarre cases like the teacher who leaves students scared of water—even water fountains. Meanwhile, Dewey's school starts limiting toilet paper use—to just one tiny square at a time!—and replaces Dewey's beloved vending machines with . . . a garden. That's no substitute for the delightful snacks Dewey lives for, so he and his best friends protest with a secret demonstration involving edible additions to school property. But detention may be the least of their problems when some argue their actions were vandalism. Will their demands for student involvement sway the administration, or will they be caught and punished with detention . . . or worse?

Sharks Gene Helfman, George H. Burgess, 2014-05-15 Do sharks lay eggs or give birth to live young? Do sharks sleep? How long do they live? How likely are shark attacks? This book answers your questions about some of nature's most misunderstood animals. Answering every conceivable question about sharks, authors Gene Helfman and George H. Burgess describe the fascinating biology, behavior, diversity (there are more than 1,000 species worldwide), and cultural importance of sharks, their close relationship to skates and rays, and their critical role in healthy ecosystems. Helfman and Burgess take readers on a round-the-world tour of shark habitats, which include oceans as well as lakes and even rivers (as far up the Mississippi as St. Louis). They describe huge, ferocious predators like (Great) White and Tiger sharks and species such as Basking and Whale sharks that feed on microscopic prey yet can grow to lengths of more than 40 feet. The mysterious and powerful

Greenland shark, the authors explain, reaches a weight of 2,200 pounds on a diet of seal flesh. Small (less than 2-foot long) Cookiecutter sharks attack other sharks and even take a chunk out of the occasional swimmer. Despite our natural fascination with sharks, we have become their worst enemy. Many shark species are in serious decline and a number are threatened with extinction as a result of overfishing and persecution. *Sharks: The Animal Answer Guide* presents a perfect mix of current science, history, anthropology, intriguing facts, and gripping photographs. Whether your fascination with sharks stems from fear or curiosity, your knowledge of these animals will improve immensely when you consult this book.

Swimming with Sharks Nick Arnold, 2004 Animals can be cute ... and cruel! Read Seb's journal for some truly terrifying shark secrets. Meet Snow White the great white shark and get really close to her huge, scissor-sharp jaws. Relive the drama, dangers and disgusting details as you find out: if toilets are more dangerous than sharks; how to escape from a shark; how you tickle a shark; what a shark's favorite color is.

National Book Award-winning author Peter Matthiessen takes readers on an expedition to find the most dangerous predator on Earth—the legendary great white shark. On a trek that lasts 17 months and takes him from the Caribbean to the whaling grounds off South Africa, and across the Indian Ocean to the South Australian coast, Matthiessen describes the awesome experience of swimming in open water among hundreds of sharks; the beauties of strange seas and landscapes; and the camaraderie, tension, humor, and frustrations that develop when people continually risking their lives dwell in close proximity day after day. Ski Films Bryan Senn, 2022-05-02 Skiing in movies, like the sport itself, grew more prevalent beginning in the 1930s, when it was a pastime of the elite, with depictions reflecting changes in technique, fashion and social climate. World War II saw skiing featured in a dozen films dealing with that conflict. Fueled by postwar prosperity, the sport exploded in the 1950s--filmmakers followed suit, using scenes on snow-covered slopes for panoramic beauty and the thrill of the chase. Through the free-spirited 1960s and 1970s, the downhill lifestyle shussed into everything from spy thrillers to beach party romps. The extreme sports era of the 1980s and 1990s brought snowboarding to the big screen. This first ever critical history of skiing in film chronicles a century of alpine cinema, with production information and stories and quotes from directors, actors and stuntmen.
