

Space Capsule

Iain Nicolson

Before Lift-off Henry S. F. Cooper, 1987-09 First volume in the series (see above). An intimate account of the training of astronauts & their psychological interaction. For all popular & aerospace collections. Chronicles the day-to-day training of Space Shuttle crew 41-G from the selection of the crew members through the completion of their mission.

The Space Shuttle Piers Bizony, 2015-04 Get a full retrospective of all 134 flights, every mission, of the space shuttle program. This superbly designed and lavishly illustrated reissue of the best-selling hardcover book marks a special moment in history: the final mission of the space shuttle. Noted space and science author Piers Bizony's retrospective covers the entire space shuttle program that began in 1981 and ended in 2011. Every space shuttle mission is detailed, including all flights of the Columbia, Challenger, Discovery, Atlantis, and Endeavour spacecraft. The book also covers the development and design of the orbiter, as well as the technical specifications of the vehicle and details of its major assemblies and subassemblies. A full double-gatefold provides a large-scale technical drawing of the space shuttle. If you never got to watch the countdown clock in person during a space shuttle launch, *The Space Shuttle* is your chance to relive the history of America's first low Earth orbital spacecraft.

NASA Space Shuttle Piers Bizony, 2021-05-25 Rare photography and stunning artworks illustrate the history of NASA's Space Shuttle program from 1981 to 2011, providing an unprecedented look at the missions, equipment, and astronauts.

Beyond the Saga of Rocket Science Walter Sierra, 2019-10-03 In *Space to Stay*, the third book in the

spell-binding The Saga of Rocket Science series, gives a thorough exposé of the U.S. Apollo and Space Shuttle programs. You will be there as Gus Grissom, Ed White, and Roger Chaffee perish and get incinerated inside their locked Apollo 1 capsule; when Jim Lovell, Jack Swigert, and Fred Haise didn't know if they would make it back alive aboard a freezing lunar module on Apollo 13; as Neil and Buzz experienced the euphoria of being the first humans to land on the Moon, while Mike Collins in lunar orbit and an anxious world looked on. You'll see the same panoramic vistas of the lunar landscape and the beautiful blue marble we call Earth as the astronauts saw. You are taken inside the Challenger Space Shuttle as it caught fire and disintegrated in flight. What seven brave astronauts felt like as they plunged to their deaths in a basically intact crew cockpit. You'll understand exactly what failed and how it failed on both the Challenger and the ill-fated Columbia space shuttles, and why another seven astronauts aboard the Columbia felt no pain despite their grisly annihilation during reentry.

Final Countdown Pat Duggins, 2009-03-01 The Space Shuttle was once the cornerstone of the U.S. space program. However, each new flight brings us one step closer to the retirement of the shuttle in 2010. Final Countdown is the riveting history of NASA's Space Shuttle program, its missions, and its impending demise. It also examines the plans and early development of the space agency's next major effort: the Orion Crew Exploration Capsule. Journalist Pat Duggins, National Public Radio's resident space expert, chronicles the planning stages of the shuttle program in the early 1970s, the thrills of the first flight in 1981, construction of the International Space Station in the 1990s, and the decision in the early 2000s to shut it down. As a rookie reporter visiting the Kennedy Space Center hangar to view the Challenger wreckage,

Duggins was in a unique position to offer a poignant eyewitness account of NASA's first shuttle disaster. In *Final Countdown*, he recounts the agency's struggle to rebound after the Challenger and Columbia tragedies, and explores how politics, scientific entrepreneurship, and the human drive for exploration have impacted the program in sometimes unexpected ways. Duggins has covered eighty-six shuttle missions, and his twenty-year working relationship with NASA has given him unprecedented access to personnel. Many spoke openly and frankly with him, including veteran astronaut John Young, who discusses the travails to get the shuttle program off the ground. Young's crewmate, astronaut Bob Crippen, reveals the frustration and loss he felt when his first opportunity to go into space on the first planned space station was taken away. As the shuttle program winds down, more astronauts may face similar disappointments. *Final Countdown* is a story of lost dreams, new hopes, and the ongoing conquest of space.

Animals in Space Colin Burgess, Chris Dubbs, 2007-07-05 This book is as a detailed, but highly readable and balanced account of the history of animal space flights carried out by all nations, but principally the United States and the Soviet Union. It explores the ways in which animal high-altitude and space flight research impacted on space flight biomedicine and technology, and how the results - both successful and disappointing - allowed human beings to then undertake that same hazardous journey with far greater understanding and confidence. This complete and authoritative book will undoubtedly become the ultimate authority on animal space flights.

Astronauts Margaret J. Goldstein, 2017-01-01 Did you know that astronauts work on Earth and in space to study places beyond our planet's atmosphere? But there's a lot more to space travel than just research.

With no gravity, a wild schedule that includes sixteen sunrises and sixteen sunsets every twenty-four hours, and no fresh food, it can be a challenge to stay healthy in orbit. Public and private space agencies are working to solve these problems as humans travel farther and more frequently into the depths of space. Learn more about the daily lives of astronauts and how they live, work, and prepare for the future in space.

Do Your Ears Pop in Space? and 500 Other Surprising Questions about Space Travel R. Mike Mullane, 1997-02-05 An excellent reference. This book has to be on the shelf of every space buff. --James Lovell, Commander, Apollo 13. Get the inside story on outer space from three-time shuttle astronaut R. Mike Mullane. A fascinating collection of honest, factual, from-the-heart answers to the most often asked questions about spaceflight and spacefliers. Required reading for all who aspire to travel in space. --Kathy Thornton, 4-mission Shuttle Astronaut, World Record Holder for Spacewalks by a Woman. A brilliant addition to the understanding of space flight. Only a man who has been there--outer space--and done that--fly the Space Shuttle--could render the complexities of flying in space so lucidly. --Walter J. Boyne, Colonel, USAF (Ret.), Former Director, National Air and Space Museum. A highly informative inside view of what astronauts really experience in space. --Ed Buckbee, Former Director, U.S. Space & Rocket and U.S. Space Camp. All astronauts have been peppered with great questions. Mike Mullane has great answers. --Vice Admiral Richard H. Truly, U.S. Navy (Ret.), Columbia 1981, Challenger 1983, NASA Administrator 1989-1992.

Sputnik to Space Shuttle Iain Nicolson, 1982

Packing for Mars: The Curious Science of Life in the Void Mary Roach, 2011-04-04 “America’s funniest science writer” (Washington Post) explores the irresistibly strange universe of life without gravity in this New York Times bestseller. The best-selling author of *Stiff* and *Bonk* explores the irresistibly strange universe of space travel and life without gravity. From the Space Shuttle training toilet to a crash test of NASA’s new space capsule, Mary Roach takes us on the surreally entertaining trip into the science of life in space and space on Earth.

Preparing for the High Frontier National Research Council, Division on Engineering and Physical Sciences, Aeronautics and Space Engineering Board, Committee on Human Spaceflight Crew Operations, 2011-12-09 As the National Aeronautics and Space Administration (NASA) retires the Space Shuttle and shifts involvement in International Space Station (ISS) operations, changes in the role and requirements of NASA’s Astronaut Corps will take place. At the request of NASA, the National Research Council (NRC) addressed three main questions about these changes: what should be the role and size of Johnson Space Center’s (JSC) Flight Crew Operations Directorate (FCOD); what will be the requirements of astronaut training facilities; and is the Astronaut Corps’ fleet of training aircraft a cost-effective means of preparing astronauts for NASA’s spaceflight program? This report presents an assessment of several issues driven by these questions. This report does not address explicitly the future of human spaceflight.

Into the Black Rowland White,2016-04-19 Using interviews, NASA oral histories, and recently declassified material, [this book] reveals the dramatic untold story of the first space shuttle and the dedicated people who brought the United States into the next stage of space exploration--Dust jacket flap.

Echoes Among the Stars: A Short History of the U.S. Space Program Patrick J. Walsh,2016-04-29 Emphasizing the importance of the space programme to the scientific, social and cultural history of the last half of the 20th century, this brief history celebrates the almost unimaginable technological leap that the space programme represents, a feat of teamwork, innovation, dedication and mastery unprecedented in the history of mankind. Walsh's narrative begins just before the Mercury programme, covers the original seven astronauts, the Gemini and Apollo programmes, through Skylab and up to the space shuttle. The glories and emotion of space exploration are presented against the backdrop of the Cold War, the presidential administrations of Eisenhower, JFK, LBJ, Nixon, Ford and Carter, and other significant events in US history. The positive accomplishments of the astronauts are put in context of an increasingly negative domestic situation in the '60s and '70s, the Bay of Pigs, civil rights, assassinations, growing involvement in and dissension about Vietnam, the Watergate scandal, and Nixon's resignation.

NASA Space Vehicles Michael D. Cole,2000 Describes American space vehicles and their uses, including various space probes, the Mercury, Gemini, and Apollo capsules, Skylab, the space shuttles, and the International Space Station.

The Challenger Space Shuttle Explosion William Caper,2007-01-01 Discusses the Challenger space shuttle explosion, including information on the shuttle, the crew, and what went wrong.

Nasa Space Mercury Mission Space Travel Space Capsule: Projects to Complete Notebook Grace

GARCIA,2021-07-29 Project Notebooks Like a scientist's log, an engineering project notebook can be used to capture work in progress during a project. Outposts on the Frontier Jay Chladek,2017-08 The International Space Station (ISS) is the largest man-made structure to orbit Earth and has been conducting research for close to a decade and a half. Yet it is only the latest in a long line of space stations and laboratories that have flown in orbit since the early 1970s. The histories of these earlier programs have been all but forgotten as the public focused on other, higher-profile adventures such as the Apollo moon landings. A vast trove of stories filled with excitement, danger, humor, sadness, failure, and success, *Outposts on the Frontier* reveals how the Soviets and the Americans combined strengths to build space stations over the past fifty years. At the heart of these scientific advances are people of both greatness and modesty. Jay Chladek documents the historical tapestry of the people, the early attempts at space station programs, and how astronauts and engineers have contributed to and shaped the ISS in surprising ways. *Outposts on the Frontier* delves into the intriguing stories behind the USAF Manned Orbiting Laboratory, the Almaz and Salyut programs, Skylab, the Apollo-Soyuz Test Project, Spacelab, Mir station, Spacehab, and the ISS and gives past-due attention to Vladimir Chelomei, the Russian designer whose influence in space station development is as significant as Sergei Korolev's in rocketry. *Outposts on the Frontier* is an informative and dynamic history of humankind's first outposts on the

frontier of space.

The Voyages of Columbia Richard S. Lewis, 1984 Traces the development of the space shuttle, describes the political and technological problems the program faced, and looks at future uses of the shuttle.
