Family and Space Maya Halatcheva-Trapp, Giulia Montanari, Tino Schlinzig,2019-03-26 While the 'spatial turn' within the social sciences has already nurtured a broad discussion of the relation between society and space, little attention has so far been paid to the question of what we can learn about families when exploring space in its different facets. This book brings together international authors from the fields of sociology, human geography, and anthropology to support the development of space-sensitive and de-territorialised perspectives on the family that reach beyond classical concepts such as the 'household' or the 'nuclear family'. With close attention to the implications of differing relations to space for the social fabric of families, it presents studies of theoretical, methodological, and empirical aspects of late-modern family life. Examining the meaning of absence and presence for parenting, the aesthetic, and sensual dimensions of everyday family life, and its digital and media-related features aspects, Family and Space considers the value of a range of approaches to researching the spatial elements of family life, including ethnographic accounts, interviews, group discussions, mobile methods, and network analyses.

Space Family Robinson Archives Volume 4 Del Connell, Gaylord Du Bois, Carl Fallberg,2012-06-05 Between the fourteen-legged metal eaters, a prison break of shape-shifting Dreephars, and flying manta ray like creatures, life is never dull for America's first outer-space family! But while the lost Robinsons continue their interstellar journey to return home, swords and sorcery meet science fiction as the familial explorers team up with medieval knights and return to Earth - in the twelfth century!

Mobility and Family in Transnational Space Tatiana Ferreira, Marzia Grassi,2016-02-29 This book brings together a range of papers on transnational lives, mobility and gender studies from various disciplinary perspectives and geographical contexts, including European, African and American countries. The thirteen contributions to the volume provide insights into transnational migration and family issues, offering a renewed theoretical approach to the differing conditions in migration access in origin societies and the scope of social inclusion in the receiving countries. The diversity of the authors' backgrounds and the range of geographical contexts allow a wider understanding of the family in the transnational space, one that considers mobility as a developmental opportunity for individuals, whose consequences in the contemporary world have not yet been sufficiently studied.

A Family of Time Robert E. Murchison,2022-03-07 With space exploration programs at a near standstill, the United States decides to reignite its program by sending an entire nuclear family into space under the guise that the family will spend months living on the International Space Station. In reality, the US plans to send the family to a secret facility on the moon where they will be placed into a state of hibernation for three months and have information and training fed directly to their brains. If successful, the family's mission would pave the way for the future of space exploration, travel, and even habitation. The MacMurchaid family, which consists of father Robert, mother Denise, and children Tony, Troy, Kris, and Nicole, is suddenly thrust into the spotlight when they are chosen for the mission of being the first family sent into space. Their training and their trip into space—as detailed in this book and supplemented with real-life historical space program tidbits—go smoothly. But soon after the family members are placed into hibernation on the moon, war breaks out on Earth, and the family is abandoned and presumed dead. The MacMurchaids awake over 455 years later, facing a new world and new challenges. Will the knowledge and training they were fed during hibernation allow them to overcome these challenges? Read and find out.

Prisoners' Families, Emotions and Space Maria Adams,2022-07-28 This original study of the lives of prisoners' families adds a feminist perspective on the understanding of carceral geography. She relates the testimonies of families as they navigate new challenges, and measures the impact of imprisonment on their emotions, relationships, identities and experiences of spaces, both inside and outside prison.

Families on the Margins Lynn H. Turner,2021-05-04 This book focuses on the diverse tapestry of families in contemporary U.S. culture. Each chapter explores a different kind of family and examines their specific communication behaviors. We live in times of increasing diversity that complicate our understandings of ourselves as well as others who may be quite different from us. These complexities also impact our definition of family in addition to our interpretation of family communication behaviors. This book provides an examination of family communication practices in families that are underrepresented in the research of the discipline, and underserved in U.S. culture: immigrant families; family members in interracial relationships; LGBTQ families; low-income Latinx families; families with an incarcerated parent; and families headed by grandparents. The book is an initial effort to expand the lens of family communication scholarship to focus on families on the margins. Through a variety of, sometimes unique, methods including

textual analysis, in-depth interviews, and analysis of art projects collected at a Pride festival, each chapter in this collection adds to our knowledge of how we define family and how families communicate in the 21st century. The chapters in this book were originally published in a special issue of the Journal of Family Communication.

First Family on Mars, The/Space Station, 2003 By encouraging students to read both fiction and non-fiction in depth, to research interesting topics, and to respond to texts in different ways, teachers can increase their students' knowledge of how texts work and help them develop research skills. There are 12 books and one teachers' guide in Set B Double takes. Each book contains two separate but linked titles - one fiction, one non fiction, covering content area themes and topics. There is also a dedicated web page for each book. Teachers can use these books in different ways. Each of the 12 books is supported by a six page teaching plan based on the Read - Research - Respond model. The accompanying teachers' guide is a practical planning and teaching tool - to help assess and identify the needs of individual students and groups and to teach essential literacy skills, based on the foundation of guided reading.

a tiny space Fifi Coe, 2023-04-23 "I stand and face the sea, as the waves come crashing to the shore, the music of the sea is thunderous and loud. Yet I am unafraid, I chase the waves, I run about, excited but calm, I want to explore, I only want more." —fifi coe, 11 June 2016 After eight years of quiet, fifi coe found his voice through the collective love of a family, the patience and resourcefulness of a mother, and a simple alphabet board. The board became the interface between fifi's thoughts and the public world beyond him. With it, he speaks poetry. — How open are we to specialness in our lives? Open the door to the tiny spaces within you, and let in fifi coe's inner light. A note from fifi For parents whose hearts are in deep sorrow, I only wish my poems will offer them hope and encouragement for themselves and for their child to one day find his/her voice. For teachers, therapists and those who have a duty or a job to help special needs individuals lead a more fulfilling life, I hope my book will encourage them to explore new ways of teaching and to not label us as low functioning if we are non-verbal. I hope my book will also help them see that understanding autism cannot be based on theories and experiences with other non-verbal autistics. I hope my book makes them rethink what autism is about and that whatever questions they have about autism, the only person that can give them real answers will be the individual that they are trying to help. For anyone else who might read my book, I hope they will hear inside my heart and hear my loneliness and experience what it is like to be a human person frequently misunderstood and trapped in a body that is not very functional. I hope I can be a lonely voice for all my non-verbal friends. We experience loneliness in a way that no one can ever understand unless they too lose their voices and have special needs.

Assessing Family Relationships Theresa A. Beeton, Ronald A. Clark, 2019-05-28 Assessing Family Relationships shows mental health professionals how to utilize the Family Life Space Drawing (the FLSD), a family assessment tool that incorporates information from multiple family members while building connections between the clinician and the client. In this manual, Theresa A. Beeton and Ronald A. Clark demonstrate the usefulness of the FLSD in both family and couple counseling. As a task-centered assessment tool, the FLSD enables an interactive and personalized process of counseling, which helps individuals to express concerns and information about themselves in an indirect and nonthreatening manner. Chapters are illustrated throughout with case studies and drawings adapted from the authors' own clinical experience, and the manual offers an overview of the history of the FLSD, as well as where future research is headed. Providing a practical explanation of how to complete the FLSD process, Assessing Family Relationships will be highly relevant to couple and family therapists, as well as clinical social workers, who are interested in updating their practice with innovative family assessment research and techniques.

Home Baked Alia Volz, 2020 A blazingly funny, heartfelt memoir from the daughter of the larger-than-life woman who ran Sticky Fingers Brownies, an underground bakery that distributed thousands of marijuana brownies per month and helped provide medical marijuana to AIDS patients in San Francisco—for fans of Armistead Maupin and Patricia Lockwood During the '70s in San Francisco, Alia's mother ran the underground Sticky Fingers Brownies, delivering upwards of 10,000 illegal marijuana edibles per month throughout the circus-like atmosphere of a city in the throes of major change. She exchanged psychic readings with Alia's future father, and thereafter had a partner in business and life. Decades before cannabusiness went mainstream, when marijuana was as illicit as heroin, they ingeniously hid themselves in plain sight, parading through town—and through the scenes and upheavals of the day, from Gay Liberation to the tragedy of the Peoples Temple—in bright and elaborate outfits, the goods wrapped in hand-designed packaging and tucked into Alia's stroller. But the stars were not aligned forever and, after leaving the city and a shoulda-seen-it-coming divorce, Alia and her mom returned to San Francisco in the mid-80s, this time using Sticky Fingers' distribution channels to provide medical marijuana to friends and former customers now suffering the depredations of AIDS. Exhilarating, laugh-out-loud funny, and heartbreaking, Home Baked celebrates an eccentric and remarkable extended family, taking us through love, loss, and finding home.

The Family in Space Carl Back,Mona Handler,2007-07 It is the year 2276, the family has big plans: travel to the Mars colony for advanced training in living in space, and then continue on to the new colony on Europa, a moon of Jupiter, to become part of the first wave of humans colonizing new planets. However, traveling and living in space is not always easy or safe, as the family soon finds out. When they finally arrive on Mars, where they are reunited with some good friends, they quickly learn the skills needed to live on an airless planet. As the family works to help develop and improve the Mars colony, they often find themselves facing dangerous situations. A survival training trip turns into a real-life exercise in survival, an explosion at the site of an underground volcano has serious consequences, and an experiment in comet retrieval goes awry and causes massive power outages which threatens the lives of the family and many other colonists. When the family prepares to leave Mars for Europa, they face their biggest challenge of all when the Space Defense Force calls on them to help with a serious mission. With each passing day, the family must rely on their wits and one another in order to survive *The Mars Colony Adventure*.

Terror from Outer Space Robert Vernon,2021-10 Memories of Mike's dad resurface when a space shuttle mission goes bad and the family of the pilot witness the shocking disaster in the desert skies above Ambrosia. Will Mike ever discover the truth about his dad's plane crash in the Middle East? Why won't God answer his prayers? Soon another mystery unfolds as reports of strange and frightening apparitions filter in from the desert, along with smoky green fog. Could aliens and enemy soldiers both be attacking Ambrosia? Mike, Winnie, Ben, and Spence investigate at an abandoned military base--only to discover that their greatest fears await them.

Wandering in Strange Lands Morgan Jerkins,2021-07-06 One of TIME's 100 Must Read Books of 2020 and one of Good Housekeeping's Best Books of the Year “One of the smartest young writers of her generation.”—Book Riot Featuring a new afterword from the author, Morgan Jerkins' powerful story of her journey to understand her northern and southern roots, the Great Migration, and the displacement of black people across America. Between 1916 and 1970, six million black Americans left their rural homes in the South for jobs in cities in the North, West, and Midwest in a movement known as The Great Migration. But while this event transformed the complexion of America and provided black people with new economic opportunities, it also disconnected them from their roots, their land, and their sense of identity, argues Morgan Jerkins. In this fascinating and deeply personal exploration, she recreates her ancestors' journeys across America, following the migratory routes they took from Georgia and South Carolina to Louisiana, Oklahoma, and California. Following in their footsteps, Jerkins seeks to understand not only her own past, but the lineage of an entire group of people who have been displaced, disenfranchised, and disrespected throughout our history. Through interviews, photos, and hundreds of pages of transcription, Jerkins braids the loose threads of her family's oral histories, which she was able to trace back 300 years, with the insights and recollections of black people she met along the way—the tissue of black myths, customs, and blood that connect the bones of American history. Incisive and illuminating, *Wandering in Strange Lands* is a timely and enthralling look at America's past and present, one family's legacy, and a young black woman's life, filtered through her sharp and curious eyes.
