Monkey Business J. Otto Seibold, Vivian Walsh,1995 Space Monkey, an ex-astronaut turned business tycoon, discovers that his company's one millionth product has been inhabited by a bug named Penelope.

A Ball, a Dog, and a Monkey Michael D'Antonio,2007-09-18 A Ball, a Dog, and a Monkey tells the remarkable story of America's first efforts to succeed in space, a time of exploding rockets, national space mania, Florida boomtowns, and interservice rivalries so fierce that President Dwight Eisenhower had to referee them. When the Soviet Union launched the first orbital satellite, Sputnik I, Americans panicked. The Soviets had nuclear weapons, the Cold War was underway, and now the USSR had taken the lead in the space race. Members of Congress and the press called for an all-out effort to launch a satellite into orbit. With dire warnings about national security in the news almost every day, the armed services saw space as the new military frontier. But President Eisenhower insisted that the space effort, which relied on military technology, be supervised by civilians so that the space race would be peaceful. The Navy's Vanguard program flopped, and the Army, led by ex-Nazi rocket scientist Wernher von Braun and a martinet general named J. Bruce Medaris (whom Eisenhower disliked), took over. Meanwhile, the Soviets put a dog inside the next Sputnik, and Americans grew more worried as the first animal in space whirled around the Earth. Throughout 1958 America went space crazy. UFO sightings spiked. Boys from Brooklyn to Burbank shot model rockets into the air. Space-themed beauty pageants became a national phenomenon. The news media flocked to the launchpads on the swampy Florida coast, and reporters reinvented themselves as space correspondents. And finally the Army's rocket program succeeded. Determined not to be outdone by the Russians, America's space scientists launched the first primate into space, a small monkey they nicknamed Old Reliable for his calm demeanor. And then at Christmastime, Eisenhower authorized the launch of a secret satellite with a surprise aboard. A Ball, a Dog, and a Monkey memorably recalls the infancy of the space race, a time when new technologies brought ominous danger but also

gave us the ability to realize our dreams and reach for the stars.

The Other Side of Funny Robert W Cauldwell,2022-04 Hello! I'm Abe. What? You never heard of me? Abe the famous space monkey. Why, my reputation proceeds me. Well. anyway, monkeys were the first in space. We were there before humans so we own it. We have been astronauts longer. So who better to explore it? To seek out new bananas? To fearfully go places others have never gone to? To seek out new sexy primates? So who else shoplyd do it. Why Me of course. But you know what? A magazine rejected my first submission. They said it wasn't funny enough. Well, I read what they call humor and they are the ones who don't get it. In my stories, I parody classic SyFy. Just try to identify all the references. Some references refer to two at once. Most are TV shows, some are movies, some aren't SyFy at all. I'll give a prize to anyone who guesses them all. I don't do political or social commentary that the magazines think passes for humor. I set off into the vast universe and gather some zany characters along the way. Join me on this ride.
