Spaceliner Barbara Heinrich, 2015 All the works presented in *Spaceliner* started from a mode of thinking rooted in drawing, which differentiated the artistic results here from spatial installations in general. This approach manifested itself in both the choice of materials as well as in their use. Above all, however, it was manifested in the works' graphic intensity and how the lines were used in, and with, the space. Thus, the works reflected on the one hand a persistent attempt to fathom the epistemological quality of the medium of drawing. On the other, the aspect of motion was substantially integrated into the works' conception, which led to a fundamental discussion of the tension between spatial image and actual experience in space. All the works moved in the transitional zones between lines drawn and the actual physical spatial environment, and all were concerned with both the constructed spaces we live in as well as with visions of interiority.--Publisher description.

An Unproven Concept James Young, 2013-12-24 I loved this book. The action sequences are of epic proportions. It opens on a bang and just keeps going from there.--Twisted Sci Fi, 4.5 / 5 StarThe Confederation of Man has overseen humanity's prosperous expansion for almost eight centuries, with the Confederation Fleet its bulwark against all enemies both internal and external. Despite its numerous successes, the Fleet is a shield that is becoming warped by the schism between its Carrier and Line factions. In the year 3050, Fleet Admiral Malinverni has overseen the design and commissioning of a vessel intended to merge the best of both factions: the battlecruiser Constitution. Intended as a harbinger of a better future, the Constitution is considered a flawed concept by all except her crew. If either Fleet faction has its way, neither the Constitution nor her captain, Mackenzie Bolan, will ever get a chance to prove their naysayers incorrect. The starliner Titanic is considered to be the epitome of her type. With a handpicked crew, the Titanic is expected to see to passengers' every need and whim, be it a rare artifact of opulence to stringent, discreet security. Unfortunately Captain Abraham Herrod, her master, is confronted with the growing likelihood that his vessel may soon be rendered obsolete by the ever pressing march of technology. Pushed by his superiors, Captain Herrod must decide just how far he's willing to go in an attempt to prolong the Golden Age of Starliners. At the convergence of these two ships' path lies carnage unimaginable to either of their crews. Packed full of action, mecha, and mayhem, *An Unproven Concept* is a chilling tale of First Contact gone terribly awry. If you like Star Trek or hard science fiction that focuses on elements that make the experience realistic, you'd probably be fascinated with Young's *Unproven Concept*. -- Fantascize Sci-Fi and Fantasy Magazine

EYES AND SPECTACLE VAISAKH SUDHAKARAN, 2020-11-05 THIS STORY IS ABOUT TWO CIVILIZATIONS LIVING ON TWO DIFFERENT PLANETS, WHICH HAS ITS OWN GLORY AND MISERY.

RESPACE - Key Technologies for Reusable Space Systems Ali Gülhan, 2008-01-24 A few years ago the Helmholtz Association (HGF) consisting of 15 research Institutions including the German Aerospace Center (DLR) started a network research program called 'Virtual Institutes'. The basic idea of this program was to establish research groups formed by Helmholtz research centers and universities to study and develop methods or technologies for future applications and educate young scientists. It should also enable and encourage the partners of this Virtual Institute after 3 years funding to continue their cooperation in other programs. Following this HGF request and chance the DLR Windtunnel Department of the Institute of Aerodynamics and Flow Technology took the initiative and established a network with other DLR institutes and German universities RWTH Aachen, University of Stuttgart and Technical University Munich. The main goal of this network was to share the experience in system analysis, aerodynamics and material science for aerospace for improving the understanding and applicability of some key technologies for future reusable space transportation systems. Therefore, the virtual institute was named RESPACE (Key Technologies for Re- Usable Space Systems).

Engineering Optimization 2014 Hélder Rodrigues, José Herskovits, Christóvão Mota Soares, José Miranda Guedes, Aurelio Araujo, João Folgado, Filipa Moleiro, José Aguilar Madeira, 2014-09-26 Optimization methodologies are fundamental instruments to tackle the complexity of today's engineering processes. *Engineering Optimization 2014* is dedicated to optimization methods in engineering, and contains the papers presented at the 4th International Conference on Engineering Optimization (ENG OPT 2014, Lisbon, Portugal, 8-11 September 2014). The book will be of interest to engineers, applied mathematicians, and computer scientists working on research, development and practical applications of optimization methods in engineering.

Innovation for Sustainable Aviation in a Global Environment D. Knörzer, J. Szodruch, 2012-08-23 Jointly organised by the European Commission and the Centre for the Development of Industrial Technology in Spain (CDTI), the Aeronautics Days sixth edition – 'Aerodays 2011' – was held on 30th - 31st March and 1st April 2011 in the Palacio Municipal de Congresos of Madrid. It brought together 1400 delegates – policy makers, aerospace manufacturers, engineers, researchers and customers – to report and discuss the challenges and solutions for creating greener, safer, secure and competitive solutions for aeronautics and air transport in Europe. Highlights included 'Flightpath 2050', Europe's vision for future aviation. The present book, published by the European Commission, brings together about 80 papers selected by a Scientific Advisory Committee with the intention to make broadly known the main themes and issues addressed on the occasion of this Convention. Given the strategic importance of the latter, these post-conference proceedings constitute a reference document providing an overview on aeronautical research within Europe more particularly devoted to Commission supported programmes and networks.

Warpath: Spinward Fringe Broadcast 9 Randolph Lalonde,2019-12-03 The war is on! Conflict grips the Iron Head Nebula and the star system that Jake, Ayan, Minh-Chu and their loved ones call home. The Order of Eden, British Alliance and other organisations creeping in the shadows enter into an all-or-nothing conflict that will change the political shape of the galaxy for centuries while Freeground is forced to leave its home space in search of help and safety. This is what the crew of the Triton, the Warlord and the residents of Haven Shore hoped to avoid, but it was inevitable. The great galactic war has begun, and there are even more combatants waiting in the shadows to exert their influence on the conflict.

Journey Between Worlds Sylvia Engdahl,2007-06-14 Eighteen-year-old Melinda Ashley never wanted to go to Mars. she had her life all planned out—marry Ross and become a teacher. But when her estranged father convinces her to take an interplanetary vacation, she finds herself tempted to leave behind her comfortable existence on earth. Mars isn't at all what she expected, and when she meets Alex Preston, a second-generation Martian colonist, she finds herself on a surprising new path. "An absorbing tale of a young woman finding her own greater context, and discovering that the pioneering spirit legacy of her ancestors is yet alive and well."—Scifidimensions.com

An Introduction to the Spaceport Industry Janet K. Tinoco,Chunyan Yu,Diane Howard,Ruth E. Stilwell,2020-05-26 This book provides a contemporary look at spaceports, not only from relevant technological drivers, policies, and legal perspectives, but also from impacts associated with airspace use and aviation stakeholders. Economic, business, financial, and environmental considerations; issues facing airports transitioning to air and space ports; and spaceport planning are discussed. Through case and event studies, research and analysis, along with information obtained through professional experience, this book provides an overview of the many benefits, unique challenges, and issues facing commercial spaceports and spaceport operators. Each chapter is a standalone key topic such that the reader can focus on the most compelling issues relevant for them or can view the book as an integrated whole for a full perspective. While examples and case studies come largely from the United States, the reader can draw conclusions that are independent of country and situation. Information on other nation-state policies and advancements, among other topics, is provided to give a global perspective, further expanding the relevancy and benefits of the book to both domestic and international audiences. An Introduction to the Spaceport Industry: Runways to Space fills a gap in the literature, providing professionals, government officials, researchers, professors, and students deep insights into the fast-growing commercial spaceport industry.

The Pirates of Zan Murray Leinster,2019-07-11 Because Bron Hoddan was a serious electronics engineer, he didn't want any part of his particular planetary heritage. For he was from Zan - and Zan's only occupation was spaceship piracy! So Bron went to Walden, the most civilized planet of them all. His first step to making himself a good reputation was to invent a machine that would save the government millions. But when instead he was seized and jailed as the most unspeakable criminal in Walden's history, he realized that there was only one way open to remedy this civilized disaster. And that was by putting into use some of Zan's old-fashioned buccaneering techniques!
