John Hampden

SpaceShipOne Tom Sibila,2005-07 Describes the spacecraft known as SpaceShipOne, and explains its adventures into space in 2004.

SpaceShipOne Dan Linehan,2011-06-13 "One of the most remarkable accomplishments in our conquest of gravity." – Sir Arthur C. Clarke In April, 2003, a company called Scaled Composites introduced SpaceShipOne to the world. SpaceShipOne: An Illustrated History chronicles the development of the world's first commercial manned space program—a program that includes an airborne launcher (the White Knight), a space ship (SpaceShipOne), rocket propulsion, avionics, simulator, and full ground support. With ample illustrations, photographs, and behind-the-scenes information, SpaceShipOne provides a full picture of this classified project. The story of SpaceShipOne combines the adventurous spirit of Charles Lindbergh, the entrepreneurial drive of Howard Hughes, and the urgency of the space race at the height of the Cold War.

The Magic and Menace of SpaceShipOne Brian Binnie,2021-03-21 In 2004, Burt Rutan's Scaled Composites and a team of engineers, pilots and visionaries added a milestone to the history of manned spaceflight: the first wholly private craft to reach space. Their creation, SpaceShipOne, lofted to launch altitude by its mother ship WhiteKnightOne, rocketed into space not once, but twice within five days to claim the \$10 million Ansari XPRIZE and create the first two private astronauts in history. Here, in the authentic words of the second of those pilots, whose flight clinched the prize, is the story of SpaceShipOne -- from its earliest engineering to the final changes that brought space within its reach. Hundreds of photos, diagrams, charts and reports, many never before seen, chart the course of the project's innovative technology. More than just a technical history, the people, personality and conflicts on the hard road to space come to life from the perspective of a key player. And the unique personal history of Brian Binnie and the roads that led him to the pilot's seat of that thrilling, record-breaking flight and the second pair of Commercial Astronaut wings ever issued fill out the grand story. From a kid born in the Scottish Highlands to US Naval Aviator to test pilot to astronaut... this tale takes you through that epic adventure as a leadup to that of SpaceShipOne itself. There are only five manned spacecraft hanging in the National Air and Space Museum's Milestones of Flight gallery. SpaceShipOne is among them. This book, in magnificent first-person detail, tells why.

Burt Rutan's Race to Space Dan Linehan,2011-07-07 The author of SpaceShipOne chronicles the significant achievements of the Ansari X Prize-winning aerospace innovator, offering insight into his pioneering vision for enabling space exploration and the processes of his history-making designs, including Voyager and SpaceShipTwo.

Milestones of Flight Tim Grove,National Air and Space Museum,2016-06-28 Milestones of Flight takes readers soaring through the high points of American aviation: from the Wright brothers and their competitors to the military pilots who first circumnavigated the globe, from the initial space rocket to the moon walk, from the earliest manmade satellite to today's spy drones. The book also describes what inventions—such as rocket propulsion, the wind tunnel, and the silicon chip—helped move flight upward and beyond. Profusely illustrated with objects from the Smithsonian's collection, Milestones of Flight provides an inspiring look at America's contributions to aviation. The book includes a bibliography, author's note, and index.

Space Missions Jim Winchester,2006 3-2-1: Lift off! Experience the exhilaration of space flight, from Sputnik to Spaceship One in this entertaining and educational journey into the universe. Space Missions features the following. * Learn how space exploration impacts life on Earth as astronauts gather critical information that could help doctors treat tumors and diabetes more effectively. * Join the astronauts for a journey through the

history of space exploration from the earliest days of the space race to modern multi-national missions. * This book covers every significant space mission since Sputnik, including Voyager I and II, the Apollo moon landings, the shuttle missions, the Hubble telescope and Cassini's voyage to Saturn. * Fascinating information and more than 500 spectacular color illustrations and photographs fill this amazing book. * This offers a remarkable, riveting adventure for anyone who ever wanted to be an astronaut when they grew up.

Race Into Space David Jefferis, Mat Irvine, 2007 An exciting look at the space race of the last century, when two countries spurred on by the Cold War competed to be the leader in space exploration. Features milestones from the early attempts at rocket building to the Russian and American space programs of the 1950s, 60s, 70s and 80s.

Virgin Galactic Erik Seedhouse, 2015-02-23 Thirty years ago when Sir Richard Branson called up Boeing and asked if they had a spare 747, few would have predicted the brash entrepreneur would so radically transform the placid business of air travel. But today, Branson flies airlines on six continents, employs hundreds of jets and, in 2014, was predicting that his spaceship company - Virgin Galactic - would soon open the space frontier to commercial astronauts, payload specialists, scientists and space tourists. With more than 600 seats sold at \$250,000 each, what started off as a dream to send people just for the excitement to look back and marvel at Earth, was on the cusp of finally being turned into a business. Then, on October 21, 2014, tragedy struck. SpaceShipTwo was on its most ambitious test flight to date. Seconds after firing its engine, Virgin Galactic's spaceship was breaking through the sound barrier. In just the three seconds that it took for the vehicle to climb from Mach 0.94 to Mach 1.02, co-pilot Mike Alsbury made what many close to the event believe was a fatal mistake that led to his death and the disintegration of SpaceShipTwo. Miraculously, the pilot, Peter Siebold, survived the 16-km fall back to Earth. Soon after the event Branson vowed to continue his space tourism venture in spite of this. Already a second SpaceShipTwo is being built, and ticket-holders eagerly await the day when Virgin Galactic offers quick, routine and affordable access to the edge of space. This book explains the hurdles Virgin Galactic had and still has to overcome en route to developing suborbital space travel as a profitable economic entity, and describes the missions that will be flown on board SpaceShipTwo Mk II, including high-altitude science studies, astronomy, life sciences, and microgravity physics.

The 25 Most Influential Aircraft of All Time Walter Boyne, Philip Handleman, 2018-03-01 The 25 Most Influential Aircraft of All Time conveys the fascinating progression of flying technology from flimsy wood-and-fabric biplanes to thunderous supersonic wonders. Aviation's most historically relevant and arguably most influential aircraft - planes like the elliptical-winged Spitfire, the blisteringly-fast X-15, and the ubiquitous Learjet - are dramatically showcased in individual chapters. Factors like performance, price, operational efficiency, and

perceptions in popular culture are examined. People are just as important as hardware in the discussion of the world's greatest aircraft. The larger-than-life characters who designed and built these aeronautical marvels – men like the reclusive Howard Hughes and the demanding Clarence “Kelly” Johnson – are an indispensable part of the story. So, too, are the fearless pilots like Charles Lindbergh and Chuck Yeager who gave life to the shining examples of a new and dynamic industry. The authors have flown or flown in many of the featured aircraft and they knew many of the luminous personalities involved, enabling them to share unique perspectives. The preface is written by William Lloyd Stearman, a former staff member of the National Security Council and the son of famed industry engineer Lloyd Stearman. The introduction is written by Norman R. Augustine, the retired Chairman and CEO of Lockheed Martin Corporation. The foreword is written by Burt Rutan, the renowned aircraft designer and founder of Scaled Composites. Each aircraft is magnificently illustrated in color, mostly with paintings by leading aviation artists.

Best of the National Air and Space Museum F. Robert van der Linden, 2016-06-28 Experience the thrill of flying some of the world's most important airplanes and spacecraft. Best of the National Air and Space Museum provides unprecedented access to the most popular museum in the world. The Smithsonian's National Air and Space Museum hosts an average of seven million visits every year. The Udvar-Hazy Center—three football fields long and ten stories high—receives more than one million visits annually. Best of the National Air and Space Museum features the best of both museums, from the Challenger space shuttle and the Wright flyer to the Spirit of St. Louis and the stealth bomber. Robert Van der Linden, curator of aeronautics, has selected the most important, popular, and just plain impressive aircraft and spacecraft from the collections of both museums to be showcased in this beautiful book. Each page spread includes intriguing facts of the item's design, use, mission, specifications, and dimensions. A must-have for space and aviation buffs.

How to Make a Spaceship Julian Guthrie, 2016-09-20 A New York Times bestseller! The historic race that reawakened the promise of manned spaceflight A Finalist for the PEN/E. O. Wilson Literary Science Writing Award Alone in a Spartan black cockpit, test pilot Mike Melvill rocketed toward space. He had eighty seconds to exceed the speed of sound and begin the climb to a target no civilian pilot had ever reached. He might not make it back alive. If he did, he would make history as the world's first commercial astronaut. The spectacle defied reason, the result of a competition dreamed up by entrepreneur Peter Diamandis, whose vision for a new race to space required small teams to do what only the world's largest governments had done before. Peter Diamandis was the son of hardworking immigrants who wanted their science prodigy to make the family proud and become a doctor. But from the age of eight, when he watched Apollo 11 land on the Moon, his singular goal was to get to space. When he realized NASA was winding down manned space flight, Diamandis set out on one of the great entrepreneurial adventure stories of our time. If the government wouldn't send him to space, he would create a private space flight industry himself. In the 1990s, this idea was the stuff of science fiction. Undaunted, Diamandis found inspiration in an unlikely place: the golden age of aviation. He discovered that Charles Lindbergh made his transatlantic flight to win a

\$25,000 prize. The flight made Lindbergh the most famous man on earth and galvanized the airline industry. Why, Diamandis thought, couldn't the same be done for space flight? The story of the bullet-shaped SpaceShipOne, and the other teams in the hunt, is an extraordinary tale of making the impossible possible. It is driven by outsized characters—Burt Rutan, Richard Branson, John Carmack, Paul Allen—and obsessive pursuits. In the end, as Diamandis dreamed, the result wasn't just a victory for one team; it was the foundation for a new industry and a new age.

Engineers DK, 2012-04-16 Engineers have always had a huge influence on the way we live and how our world looks. They create lasting solutions to the biggest challenges, and construct iconic and incredible buildings that have literally stood the test of time. *Engineers* tells their story, from the men who built the Great Pyramid in Egypt to the pioneers of space travel. Often many different minds worked together or built on the work of previous generations to achieve a working version of a great idea: *Engineers* explores this progression of ideas, from initial concept to prototype and finished design. The great achievements of engineers go hand in hand with the world's greatest structures, such as aqueducts, monuments, bridges, and dams. These works are shown in detail and highlighted with beautiful illustrations, photographs, and technical drawings.
