SPAD XIII vs Fokker D VII Jon Guttman,2009-04-21 Having established its SPAD VII as the most effective French fighter of 1916, the Soci  t   Pour l'Aviation et ses D  riv  s strove to improve the model with a 220hp Hispano Suiza 8B engine and two machine guns. Despite initial teething troubles with the new engine, by mid-1918 the SPAD XIII had taken its place as the principal fighter of both France and the US. Meanwhile, the German quest for a successor for their structurally flawed Albatros D V finally bore fruit with the Fokker D VII. Entering combat in May 1918, this plane earned a reputation as the most formidable fighter of the war, yet the SPAD XIII's greater speed, especially in a dive, and its outstanding durability, proved a fearsome rival. This is the gripping story of two of the best fighters produced in World War I - the SPAD XIII and the Fokker D VII - as they dueled in the skies above the trenches in the closing months of the war. Never before published artwork, including fascinating cockpit illustrations, reveal several dramatic clashes between the two foes while diary entries and first-hand accounts from the pilots bring this classic World War I duel to life with intimate detail.

SPAD XII/XIII Aces of World War 1 Jon Guttman,2002-05-25 This book details the exploits of the pilots who flew the hugely successful SPAD XIII and the trickier SPAD XII. Built in response to the combat inadequacies of the SPAD VII, the XIII first entered service with the French Aviation Militaire in late 1917. Despite suffering engine unreliability, the XIII enjoyed great success on the Western Front, where it was flown by numerous French, American, Italian and Belgian aces, including Eddie Rickenbacker, leading US ace of World War I. The SPAD XII, meanwhile, was the product of numerous improvements to the SPAD VII model. Entering service in July 1917, the aircraft boasted a single-shot 37 mm Puteaux cannon, which had to be hand-reloaded in flight! Tricky to fly, the XII was only issued to experienced pilots, and was flown briefly by a number of aces.

Sagittarius Rising Cecil Lewis,2014-05-27 A memoir by a WWI fighter pilot, with the adventurous spirit of War Horse and the charm of The Little Prince A singular, lyrical book, Sagittarius Rising is at once an exuberant memoir from the Lost Generation and a riveting tale of the early days of flight during World War I. Cecil Lewis lied his way into the British Army's Royal Flying Corps at age sixteen and was ordered to a squadron on the Western Front only a year later. At the time, flying was so new that designers hadn't even decided on basic mechanics such as how many wings a plane should have. Despite this, Lewis mastered virtually every kind of single-engine plane in the RFC, going on to excel in active duty and even to dogfight the Red Baron—and live to tell the tale. Full of infectious charm and written with the prose and pacing of a novel, Sagittarius Rising beautifully recounts Lewis's harrowing exploits in the sky alongside his wild times of partying and chasing girls while on leave in London. His coming-of-age story is unlike any other WWI memoir you've read before. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. SPAD VII vs Albatros D III Jon Guttman,2011-04-19 When originally conceived, the French SPAD VII and German Albatros D II represented steps away from an emphasis on maneuver in aerial combat in favor of speed and durability - factors that came into play in hit-and-run tactics. At the end of 1916, however, Albatros tried to have the best of both worlds by incorporating the sesquiplane wing of the nimble Nieuport 17 into its D III. The result combined the better downward view and maneuverability of the Nieuport with the power and twin machine guns of the Albatros D II, but at a high price - a disturbing tendency for the single-spar lower wing to fail in a dive. While Albatros (and the Austrian Oeffag firm, which built the fighter under license) sought to alleviate that weakness with various reinforcing measures, the Germans developed tactics to maximize the D III's strengths and minimize its shortcomings. At the same time, the French worked to improve the SPAD VII with more power and a more reliable cooling system before moving on to the twin-gunned SPAD XIII. While all that was going on, the Albatros D III became a mainstay of the German and Austro-Hungarian air services in frequent encounters with SPAD VIIs flown by French, Belgian, British, Italian and American airmen.

The Stand Stephen Skinner,2008 The last great mystery of World War I has been solved. Drawing from more than two thousand pages of unpublished material, archeological digs in France and dozens of interviews with the descendents of those involved, The Stand: The Final Flight of Lt. Frank Luke, Jr. writes the last chapter on the life and death of America's most spectacular fighter pilot. After fifteen years of research, author and Telly Award-winning television host Stephen Skinner pens a driving, dynamic account that fills in the blanks left behind by history after the legendary Arizona balloon buster died under controversial circumstances deep in enemy lines in September of 1918.

Spad Fighters Mark C. Wilkins,2019-06-28 This book presents the evolution of one of the most famous French-made fighter aircraft of WWI--the fast, rugged Spad. From humble beginnings this airplane became the mount for such famous WWI aces as Frenchmen Georges Guynemer and Ren   Fonck, American Eddie Rickenbacker, Italian Francesco Baracca, and many others. Illustrated with rare WWI-era photographs, this book examines how the Spad was conceived, built, and flown. Examples of surviving Spad aircraft are highlighted, as well as where they may be seen today all over the world. The book also profiles several still-existing aerodromes in the US where visitors can see a Spad being built, such as the Golden Age Air Museum in Pennsylvania. Or pay a visit to the Old Rhinebeck Aerodrome in New York and see the only flying Spad VII replica in the world! Part of the Legends of Warfare series.

SPAD VII Aces of World War 1 Jon Guttman,2001-08-25 Built by the 'Soci  t   Anonyme Pour l'Aviation et ses D  riv  s', (SPAD), the SPAD VII was the first successful fighting scout design to emerge from the company that had traded as Duperdussin pre-war. Flown 'from the off' by aces Paul Sauvage and Georges Guynemer, the scouts made an immediate impression. Indeed, the latter pilot was so impressed that he dubbed the Type VII the 'flying machine gun'. The first of two volumes on SPAD aces, this book tells the whole story from the ace perspective. By the time production of the SPAD VII ended in the final months of 1918, around 6000 examples had been built, and Allied aces on every front had enjoyed success with the type.

American Aces of World War 1 Norman Franks,2001-09-25 American fliers arriving in Europe from September 1917 brought with them no aircraft. Instead, US units had to obtain machines mainly from the British and French. From early 1918 American pilots were issued with SPAD fighters and they never looked back. As this volume details, the first American trained pilot to become an ace was Lt Douglas Campbell, who shot down five German aircraft by the end of May 1918. He was a member of the celebrated 94th 'Hat in the Ring' Aero Squadron, which created the bulk of American aces in World War I.

British Fighter Aircraft in World War I Mark C. Wilkins,2021-05-26 Go buy this book right now. It is rare that ISD gives an instant five-star rating to any new volume, but Mark C. Wilkins' British Fighter Aircraft in World War I is a rare book. — Indy Squadron Dispatch World War I witnessed unprecedented growth and innovation in aircraft design, construction, and as the war progressed—mass production. Each country generated its own innovations sometimes in surprising ways—Albatros Fokker, Pfalz, and Junkers in Germany and Nieuport, Spad, Sopwith and Bristol in France and Britain. This book focuses on the

British approach to fighter design, construction, and mass production. Initially the French led the way in Allied fighter development with their Bleriot trainers then nimble Nieuport Scouts—culminating with the powerful, fast gun platforms as exemplified by the Spads. The Spads had a major drawback however, in that they were difficult and counter-intuitive to fix in the field. The British developed fighters in a very different way; Tommy Sopwith had a distinctive approach to fighter design that relied on lightly loaded wings and simple functional box-girder fuselages. His Camel was revolutionary as it combined all the weight well forward; enabling the Camel to turn very quickly—but also making it an unforgiving fighter for the inexperienced. The Royal Aircraft Factory's SE5a represented another leap forward with its comfortable cockpit, modern instrumentation, and inline engine—clearly influenced by both Spads and German aircraft. Each manufacturer and design team vied for the upper hand and deftly and quickly appropriated good ideas from other companies—be they friend or foe. Developments in tactics and deployment also influenced design—from the early reconnaissance planes, to turn fighters, finally planes that relied upon formation tactics, speed, and firepower. Advances were so great that the postwar industry seemed bland by comparison.

Combat Squadrons of the Air Force; World War II. Maurer Maurer, 1969 This collection of squadron histories has been prepared by the USAF Historical Division to complement the Division's book, *Air Force Combat Units of World War II*. The 1,226 units covered by this volume are the combat (tactical) squadrons that were active between 7 December 1941 and 2 September 1945. Each squadron is traced from its beginning through 5 March 1963, the fiftieth anniversary of the organization of the 1st Aero (later Bombardment) Squadron, the first Army unit to be equipped with aircraft for tactical operations. For each squadron there is a statement of the official lineage and data on the unit's assignments, stations, aircraft and missiles, operations, service streamers, campaign participation, decorations, and emblem.

Iron Man Peter Kilduff, 2012-12-19 This biography of a tenacious fighter pilot is “a powerful story about a fascinating man who seemed to know no fear” (Aerodrome). As one of the most successful German fighter pilots of World War I, Rudolf Berthold was victorious in forty-four aerial combats. He was also shot down or forced to land after six fights and survived crash landings in every case. Early in WWI, when only fighter pilots were awarded the Kingdom of Prussia's (and de facto, Imperial Germany's) highest bravery decoration, the Pour le Mérite, Berthold became the tenth recipient of the honor. Of that early cohort of air heroes, only Berthold and one other pilot survived the war. This book tells his remarkable story. Six weeks into the war, Berthold became the first airman in the 2nd Army area to be awarded an Iron Cross in recognition of his bravery and tenacity in combat. The symbolism of the award was appropriate. Described by one of his pilot protégés as “an Iron Man—with an absolutely unbendable iron will,” he was a dedicated patriot. And, after he became a fighter pilot, he demonstrated a fierce fighting spirit in many encounters with British and French adversaries. All of his aerial combats with other Pour le Mérite-awarded flyers are detailed in this book. Indeed, Berthold was so relentless in his approach to aerial combat that when badly wounded, on at least six occasions, he cut short his convalescent leave to return to flying with his comrades. The injuries included a hit to his right arm, which shattered the bone, rendering it useless—yet an undaunted Berthold taught himself to fly using his left. Peter Kilduff has produced a landmark volume based on extensive research into Berthold's life and military career to form the most complete account of Germany's sixth highest scoring fighter ace of WWI. Illustrated with over eighty photographs and other artworks, many never published before, *Iron Man* tells the tale of this ruthless, fearless fighter whose perseverance and bravery made him one of the most famous airmen of the Great War.

WW1 Aircraft Performance Anders F. Jonsson, 2023 This is the first book to comprehensively cover WW1 fighter aircraft focusing on their relative flight performance utilizing modern computer simulations and if you want to get a better understanding of how they compared to each other, then this is the book for you. Based on the simulation results, a number of myths surrounding the modeled aircraft can be put to rest and in addition, they reveal some unexpected results that go against the grain of what has become generally accepted facts about these airplanes. While anecdotal evidence runs the risk of misremembering and embellishments, hard numbers based on computer simulations are more neutral and allow a more complete picture of these aircraft to emerge revealing their true strengths and weaknesses. Another first is the detailed analysis of how the aircraft compare in terms of acceleration, dive, and sustained and instantaneous turn performance done to a level previously not attempted in a book. The aircraft covered in this book are the Albatros D.Va, Fokker Dr.I, Fokker D.VIIF, Fokker E.V, Fokker D.VIII, Nieuport 28.C1, Pfalz D.III, Pfalz D.IIIa, Pfalz D.VIII, Siemens Schukert D.IV, Sopwith Camel, Sopwith Triplane, S.E.5a and SPAD XIII. As a background to the analysis of the results and the rationale for how the aircraft were modeled, the book also contains a brief summary of the state of the art in aerodynamics and aircraft design at the time.
