SPAD VII Aces of World War 1 Jon Guttman,2001-08-25 Built by the 'Société Anonyme Pour l'Aviation et ses Dérivés', (SPAD), the SPAD VII was the first successful fighting scout design to emerge from the company that had traded as Duperdussin pre-war. Flown 'from the off' by aces Paul Sauvage and Georges Guynemer, the scouts made an immediate impression. Indeed, the latter pilot was so impressed that he dubbed the Type VII the 'flying machine gun'. The first of two volumes on SPAD aces, this book tells the whole story from the ace perspective. By the time production of the SPAD VII ended in the final months of 1918, around 6000 examples had been built, and Allied aces on every front had enjoyed success with the type.

Spad XIII and Spad Vii Peter A. Zorn,1982-09-01

SPAD XIII vs Fokker D VII Jon Guttman,2009-04-21 Having established its SPAD VII as the most effective French fighter of 1916, the Société Pour l'Aviation et ses Dérivés strove to improve the model with a 220hp Hispano Suiza 8B engine and two machine guns. Despite initial teething troubles with the new engine, by mid-1918 the SPAD XIII had taken its place as the principal fighter of both France and the US. Meanwhile, the German quest for a successor for their structurally flawed Albatros D V finally bore fruit with the Fokker D VII. Entering combat in May 1918, this plane earned a reputation as the most formidable fighter of the war, yet the SPAD XIII's greater speed, especially in a dive, and its outstanding durability, proved a fearsome rival. This is the gripping story of two of the best fighters produced in World War I - the SPAD XIII and the Fokker D VII - as they dueled in the skies above the trenches in the closing months of the war. Never before published artwork, including fascinating cockpit illustrations, reveal several dramatic clashes between the two foes while diary entries and first-hand accounts from the pilots bring this classic World War I duel to life with intimate detail.

SPAD VII vs Albatros D III Jon Guttman,2011-04-19 When originally conceived, the French SPAD VII and German Albatros D II represented steps away from an emphasis on maneuver in aerial combat in favor of speed and durability - factors that came into play in hit-and-run tactics. At the end of 1916, however, Albatros tried to have the best of both worlds by incorporating the sesquiplane wing of the nimble Nieuport 17 into its D III. The result combined the better downward view and maneuverability of the Nieuport with the power and twin machine guns of the Albatros D II, but at a high price - a disturbing tendency for the single-spar lower wing to fail in a dive. While Albatros (and the Austrian Oeffag firm, which built the fighter under license) sought to alleviate that weakness with various reinforcing measures, the Germans developed tactics to maximize the D III's strengths and minimize its shortcomings. At the same time, the French worked to improve the SPAD VII with more power and a more reliable cooling system before moving on to the twin-gunned SPAD XIII. While all that was going on, the Albatros D III became a mainstay of the German and Austro-Hungarian air services in frequent encounters with SPAD VIIs flown by French, Belgian, British, Italian and American airmen.

SPAD XII/XIII Aces of World War 1 Jon Guttman,2002-05-25 This book details the exploits of the pilots who flew the hugely successful SPAD XIII and the trickier SPAD XII. Built in response to the combat inadequacies of the SPAD VII, the XIII first entered service with the French Aviation Militaire in late 1917. Despite suffering engine unreliability, the XIII enjoyed great success on the Western Front, where it was flown by numerous French, American, Italian and Belgian aces, including Eddie Rickenbacker, leading US ace of World War I. The SPAD XII, meanwhile, was the product of numerous improvements to the SPAD VII model. Entering service in July 1917, the aircraft boasted a single-shot 37 mm Puteaux cannon, which had to be hand-reloaded in flight! Tricky to fly, the XII was only issued to experienced pilots, and was flown briefly by a number of aces.

Spad Fighters Mark C. Wilkins,2019-06-28 This book presents the evolution of one of the most famous French-made fighter aircraft of WWI--the fast, rugged Spad. From humble beginnings this airplane became the mount for such famous WWI aces as Frenchmen Georges Guynemer and René Fonck, American Eddie Rickenbacker, Italian Francesco Baracca, and many others. Illustrated with rare WWI-era photographs, this book examines how the Spad was conceived, built, and flown. Examples of surviving Spad aircraft are highlighted, as well as where they may be seen today all over the world. The book also profiles several still-existing aerodromes in the US where visitors can see a Spad being built, such as the Golden Age Air Museum in Pennsylvania. Or pay a visit to the Old Rhinebeck Aerodrome in New York and see the only flying Spad VII replica in the world! Part of the Legends of Warfare series.

Maryland, Virginia, and Washington D.C. Warbird Survivors 2003 Harold Skaarup,2003-04-07 North America is replete in aviation history, both military and civilian. The sheer size of the United States dictated an early interest in air defense and profoundly influenced the nation's dependence on air travel. It is no wonder that the United States developed as an "air-faring" nation. A large part of the leadership that contributed to that development can be traced to America's Air Force. Indeed, its proud military heritage is embodied in the dedicated individuals who have served and continue to do so—and in the marvelous aircraft they have flown. The preservation and public display of these aircraft is a labor of love for many, including the editor of this book. If you are an enthusiast of military aviation history, or one with a passing interest who simply wishes to learn more, you will find a wealth of information in these well-researched pages.

Balloon-Busting Aces of World War 1 Jon Guttman,2013-05-20 Tethered balloons reached their zenith as a means of providing a stationary observation platform above the battlefield during World War I. It took a special breed of daredevil to take on such odds deep in enemy lines in order to destroy a balloon, with Balloon specialists such as Willy Coppens, Pierre Bourjade and Michel Coiffard rising to the challenge. This book covers the story of these 'balloon busters' from both sides in World War 1 through a mix of first-hand accounts and expert analysis, which compares tactics, theatres of operation, aircraft types and the overall odds for success.

Bloody April 1917 Norman Franks,Russell Guest,Frank Bailey,2017-05-19 “Nowhere will you find such an exhaustive book on the day-to-day events of the aerial war over the Western front in April 1917.” —A Wargamers Needful Things Even those people who know little of WWI’s air war will have heard of Bloody April. After more than eighteen months of deadly stalemate on the Western Front, by April 1917 the British and French were again about to launch yet another land offensive, this time on the Arras Front. This would be the first opportunity to launch a major offensive since the winter and would require enormous support from the Royal Flying Corps and French Air Force in, hopefully, improved weather. However, the air offensive was to be countered fiercely by the new German Jagstaffeln—Jastas—that had been the brainchild of Oswald Boelcke in 1916. By the spring of 1917, the first Jasta pilots, with new improved fighters—the nimble Albatros DIIIs—were just itching to get to grips with their opponents over the Western Front. What followed was a near massacre of British and French aircraft and crews, which made April the worst month for flying casualties the war had yet seen. Here is a day-by-day, blow-by-blow account of these losses, profusely illustrated with original photographs and expertly told. “A highly detailed work that is meticulously peppered with eyewitness testimony, quality research, original photographs and accessible statistics. It also recreates the period for the reader and has a keen eye for accuracy and as a reference work it comes highly recommended.” —History of War “One of the most comprehensive overviews of early warfare ever published.” —Flypast

Military Aircraft, Origins to 1918 Justin D. Murphy,2005-04-27 An expert examination of the evolution of military aviation and its profound impact on warfare—from the employment of balloons during the French Revolutionary wars to the use of aircraft in World War I. *Military Aircraft, Origins to 1918: An Illustrated History of Their Impact* is a detailed, authoritative exploration of the role and development of military aviation, from its beginnings to the conclusion of World War I. Military history scholar Justin Murphy carefully illustrates the impact of aircraft on military warfare, examines the different types of aircraft, and includes a wealth of photographs and descriptions. Organized thematically, the work covers everything from the origins of military aviation and the impact of aircraft on World War I to the role of reconnaissance missions, auxiliary aircraft, fighters, and bombers. Each chapter highlights key individuals, advancements in aviation technology, industrial organization and aircraft production, and the influence of aircraft on military tactics and strategy. Murphy also demonstrates how aircraft contributed to the development of total war and blurred the lines that had traditionally separated combatants and noncombatants.

Alabama Warbird Survivors 2003 Harold A. Skaarup,2002-10 Some of the finest military warbirds in American aviation history are still flying in the Southern State of Alabama. Many of them are on display in a number of excellent air museums, or they have been mounted on pylons to stand as memorials to the many military aviators who called Alabama home. This handbook is designed to provide aviation enthusiasts with a simple locating guide on where to find Alabamays retired warbirds within the state. Many of the aircraft can be found in the Southern Museum of Flight, Birmingham; the United States Army Aviation Museum; the US Space and Rocket Center at Huntsville; Battleship Memorial Park at Mobile; Maxwell AFB Park at Montgomery; or in the hands of private owners and collectors. The handbook provides photographs of many of the aircraft preserved in Alabama, along with a brief description and history of its service within the US armed forces. The aircraft are listed alphabetically by manufacturer, number and aircraft type. Famous aircraft found on display in Alabama include the Lockheed A-12 Blackbird, and a number of very rare flying machines such as the gigantic one of a kind Boeing Vertol XCH-62 Heavy Lift Helicopter not found in other aviation museums.

Iron Man Peter Kilduff,2012-12-19 This biography of a tenacious fighter pilot is “a powerful story about a fascinating man who seemed to know no fear” (Aerodrome). As one of the most successful German fighter pilots of World War I, Rudolf Berthold was victorious in forty-four aerial combats. He was also shot down or forced to land after six fights and survived crash landings in every case. Early in WWI, when only fighter pilots were awarded the Kingdom of Prussia’s (and de facto, Imperial Germany’s) highest bravery decoration, the Pour le Mérite, Berthold became the tenth recipient of the honor. Of that early cohort of air heroes, only Berthold and one other pilot survived the war. This book tells his remarkable story. Six weeks into the war, Berthold became the first airman in the 2nd Army area to be awarded an Iron Cross in recognition of his bravery and tenacity in combat. The symbolism of the award was appropriate. Described by one of his pilot protégés as “an Iron Man—with an absolutely unbendable iron will,” he was a dedicated patriot. And, after he became a fighter pilot, he demonstrated a fierce fighting spirit in many encounters with British and French adversaries. All of his aerial combats with other Pour le Mérite-awarded flyers are detailed in this book. Indeed, Berthold was so relentless in his approach to aerial combat that when badly wounded, on at least six occasions, he cut short his convalescent leave to return to flying with his comrades. The injuries included a hit to his right arm, which shattered the bone, rendering it useless—yet an undaunted Berthold taught himself to fly using his left. Peter Kilduff has produced a landmark volume based on extensive research into Berthold’s life and military career to form the most complete account of Germany’s sixth highest scoring fighter ace of WWI. Illustrated with over eighty photographs and other artworks, many never published before, Iron Man tells the tale of this ruthless, fearless fighter whose perseverance and bravery made him one of the most famous airmen of the Great War.

California Warbird Survivors 2002 Harold A. Skaarup,2002-07-18 During the twentieth century, civil and military aviation has played a prominent role in the history and development of California. Commercial operators have exploited the advantages offered by aircraft to overcome its unique challenges of geography and climate. By virtue of Californias comparative size and strategic importance on the West Coast of the continental USA, a wide variety of military aircraft have been based there through the years. The list of military aircraft types that made up the tapestry of California aviation is as extensive as the list of legendary figures who have contributed to its amazing history. While most of the military aircraft types no longer grace the airspace over California, many can be viewed in their former splendor as they stand as gate guards or museum exhibits. This booklet provides a comprehensive guide to where these restored aircraft can be found. Complementing the details concerning aircraft specifications and roles, the author has included many facts. Finally, the descriptions of the recovery, restoration and preservation efforts stand as a tribute to the many volunteers who have devoted time, energy and financial support to ensure this rich heritage is preserved.
