TV Toys Anthony A McGoldrick,2013-03-10 Since the dawn of children's television in the 1950s, toy companies have been keen to capitalise on the success of these programmes. Toy historian and collector Anthony A. McGoldrick here charts the history of the most successful TV toys from Muffin the Mule in the 1950s to Star Trek: The Next Generation in the 1980s. The colourful illustrations – whether of Daleks, iconic cars, action figures or spaceships – evoke the excitement of the programmes and also of playing with the toys that allowed children to recreate them. Whether you grew up in the days of Andy Pandy, The Saint, Kojak or Knight Rider, this book offers a nostalgic look at some of the most appealing toys of the late twentieth century.

Hello Girls & Boys! David Veart,2015-02-01 Toys are fun—but they are also serious business, as David Veart makes clear in this remarkable story of New Zealanders and their toys from Maori voyagers to 21st-century gamers. Deploying the tools of archaeology and oral history, Veart digs through a few centuries of pocket knives and plasticine to take us deep into the childhoods of Aotearoa. His story explores how people made their fun on the far side of the ocean—the Maori and Pakeha learned knucklebones from each other; young Aucklanders established the largest Meccano club in the world; and Fun Ho!, Torro, Lincoln International, and Luvme helped to build a successful local toy industry under the shade of import protection. Hello Girls & Boys! covers the crazes and collecting, playtimes and preoccupations of big and little New Zealand kids for generations. With its memories of knucklebones and double happys, golliwogs and tin canoes, marbles and Meccano, Tonka trucks and Buzzy Bees, this is a seriously fun New Zealand toy story.

Patrol Car Allocation Model Jan M. Chaiken,1985 This report documents a computer program called the Patrol Car Allocation Model (PCAM85), which is designed to help police departments determine the number of patrol cars to have on duty in each of their geographical commands. It tells a department how to match its resources to the time-varying pattern of demands based on desired levels of performance, manpower schedules, and dispatching policies. This volume provides file specifications, installation instructions, and a listing of the program; the Executive Summary (R-3087/1-NIJ) describes PCAM in nontechnical terms; and the User's Manual (R-3087/2-NIJ) gives complete instructions for collecting data and operating the program. PCAM85 is a modernized version of a program that was written in 1975 and is documented in reports of identical titles numbered R-1786/1, R-1786/2, and R-1786/3.

Ghost Hunter Jayne Castle,2006-05-30 Local Guild boss and powerful ghost hunter Cooper Boone is everything botanist Elly St. Clair could ask for—the handsome, strong and silent type. Maybe too silent. For when Guild secrets threaten her career at the college, Elly has to call off their marriage—and leave small-town life behind... But starting over in the thriving metropolis of Cadence City isn’t easy, especially when one of Elly’s new friends disappears in the eerie catacombs beneath the streets. Cooper turns up just in time to help Elly investigate. And as the mystery deepens and dangerous ghost myths and legends come to light, Cooper makes it clear he intends to stick around—and this time he’s holding nothing back...

Task Force Report United States. President's Commission on Law Enforcement and Administration of Justice,1967

Task Force Report: Science and Technology Institute for Defense Analyses,1967 This report presents study results and recommendation intended to illustrate the potential contributions of science and technology to crime control. The report supplements and amplifies the discussion of science and technology in the general report of the President's Commission on Law Enforcement and Administration of Justice, entitled The Challenge of Crime in a Free Society. Two chapters address the application of technology in police apprehension of criminals. Topics considered are the use of technology to reduce police response time, means to modernize the command and control process, and how to relieve the radio frequency congestion in most large police departments. Another chapter discusses aspects of court management, corrections, and crime prevention. The court- management discussion focuses on delay reduction in case processing. Two aspects of corrections addressed are the use of programmed instruction as a rehabilitation aid, and the use of statistical techniques to aid in correctional decisionmaking. Auto ignition redesign and street lighting are discussed as technological means to reduce crime opportunities. A chapter examines the uses of systems analysis for the study of the entire criminal justice system as an integrated whole. One chapter considers the potential role of modern information technology in the development of an integrated criminal justice information system. The final chapter outlines a program of research and development by which the Federal Government can stimulate a major infusion of science and technology into the criminal justice process and counter the broader problems of crime control.

American Police Cars 2 Cristina Berna,Eric Thomsen,2023-08-21 Police cars are usually very visible in our society, advertising the important role of police and loved by children. The first police car in America was an electric wagon used by the Akron Police Department in Akron, Ohio in 1899. The car was built by city mechanical engineer Frank Loomis and could reach 16 mph (26 km/h) and travel 30 mi (48 km) before needing to

be recharged. Law enforcement vehicles make the police mobile and some of the cars can reach 150 mph (almost 250 km/h). Only the fastest supercars can outrun these highway patrols! We honor all good police on this 4th of July 2023 and hope you will enjoy our selection of photos.
