Scud Ballistic Missile and Launch Systems 1955-2005 Steven J. Zaloga,2013-03-20 The Scud missile was developed as the centerpiece of Soviet plans to fight nuclear war in the heart of Europe. However, it was never used in its intended role and has instead become a symbol of the changing nature of warfare in the aftermath of the Cold War. Saddam Hussein's Iraqi armed forces were almost helpless in the face of the Coalition forces in the 1991 Gulf War; the only weapon that Iraq could use to injure the Coalition forces was its arsenal of Scud missiles. This book explores the development and variants of the missile and its launch systems, its proliferation outside of the West, and its role in conflicts around the world.

Securing Freedom in the Global Commons Scott Jasper,2010-02-10 This will be the first book to attempt to take a 'holistic' approach to security in the Commons (outer space, the atmosphere, the oceans, cyberspace, etc) in that it examines in detail each domain of the commons, identifying and assessing the current and future threats to free international access to the domain.

A Compendium of Armaments and Military Hardware (Routledge Revivals) Christopher Chant,2014-06-03 First published in 1987, The Compendium of Armaments and Military Hardware provides, within a single volume, the salient technical and operational details of the most important weapons. The complete range of hardware used in land, sea and air forces throughout the world at the time of publication is covered, from tanks to rocket systems, helicopters to cruise missiles, alongside full details of size, weight and operational range. The book's main strength lies in the detail it gives of armament and associated ammunition capabilities, and of the sensors and other electronics required for the weapons to be used effectively. A key title amongst Routledge reference reissues, Christopher Chant's important work will be of great value to students and professionals requiring a comprehensive and accessible reference guide, as well as to weapons 'buffs'.

Tactical Nuclear Weapons Stockholm International Peace Research Institute,2020-11-19 In the 1970s tactical nuclear warfare was a topical issue. The introduction of the new generation of tactical nuclear weapons into Europe could have had disastrous consequences. These new weapons had already been developed by nuclear-weapon laboratories and pressures were growing for their deployment. On first sight, smaller and more accurate nuclear weapons may seem more humane and militarily preferable to the relatively high-yield tactical nuclear weapons currently deployed. But some of these new types of weapons would blur the distinction between nuclear and conventional weapons and their use would make escalation to strategic nuclear war extremely likely. Indeed, the argument for these new weapons is that their use in wartime is more credible (and therefore 'acceptable') than current types of tactical nuclear weapons. This perception could easily lead to the exceedingly dangerous idea that some types of tactical nuclear war were 'winnable'. The fact has to be faced that any use of nuclear weapons is almost certain to escalate until all available weapons are used. To believe otherwise is to believe that one side will surrender before it has used all the weapons in its arsenal. History shows that this is most unlikely to happen. Because of its importance, SIPRI organized a meeting to discuss the whole question. Originally published in 1978, this book is the outcome of that meeting.

Department of Defense authorization for appropriations for fiscal year 1987 United States. Congress. Senate. Committee on Armed Services,1986 **Soviet Military Power** ,1987

Soviet Military Power, 1987 ,1987 Soviet Military Power 1987 reviews new development in the USSR's armed forces over the past year and places these in the context of current doctrine and strategy. These developments again underscore that the USSR is building new generations of offensive strategic and theater nuclear forces, as well as conventional land, sea, and air forces and strategic defense forces, going far beyond legitimate requirements for defense.

Global security Great Britain: Parliament: House of Commons: Foreign Affairs Committee,2009-06-14 The control of arms by means of non-proliferation and disarmament is one of the most important aims of Government foreign policy. The proliferation of weapons of mass destruction - nuclear, chemical and biological - poses a grave threat to UK and global security. This report was prompted by recent developments relating to nuclear weapons but also examines wider issues. The Committee examine: the Government's approach to non-proliferation and the institutional and policy issues relevant to the UK, the EU, NATO and the United States; nuclear weapons including the Nuclear Non-proliferation Treaty and nuclear disarmament; biological and chemical weapons; ballistic missiles and missile defence; terrorism and physical security; and conventional weapons. Finally the report assesses the Government's overall strategy, which is characterised by a commitment to a rules-based international system.

Tanks and Combat Vehicles of the Warsaw Pact Russell Phillips,2017-08-22 When East and West survived on a knife-edge between peace and war, both sides were busy preparing themselves for military action. But what exactly would NATO's troops have faced if the Cold War had suddenly turned hot? Tanks and Combat Vehicles of the Warsaw Pact is a fascinating reference book looking at the wide variety of combat vehicles which were poised and ready for action throughout the long years of military stand-off. Led by the Soviet Union, the nations which formed the Warsaw Pact were as innovative as they were prepared and these deadly war machines had the potential to change the course of world history forever. Find out more about these combat vehicles from how they worked to what they would have been capable of if they had been used in military action against NATO. Weapons and Equipment of the Warsaw Pact Russell Phillips,2018-10-10 When East and West survived on a knife-edge between peace and war, both sides were busy preparing themselves for military action. The V2 and the German, Russian and American Rocket Program ,

Artillery of the Warsaw Pact Russell Phillips,2018-08-22 Considered to be "the god of modern war" by the Soviet army, artillery played a vital role in the Cold War period. The armies of the Warsaw Pact made artillery a cornerstone of their military strategies. And the importance they placed on this type of weaponry saw them use their technology and expertise to develop a wide range of munitions including mortars, rocket launchers, missiles

and large-calibre guns. Artillery of the Warsaw Pact provides a compelling and detailed account of the artillery used by Warsaw Pact countries and the important role it played during this period of suspicion, tension and unease. The powerful weapons created at this time had the potential to destroy significant enemy resources, posing a very real threat to NATO forces. This book will allow you to gain an insight into the way in which artillery was used by the Soviet Union and other Warsaw Pact nations. Read about mortars ranging from light 50mm weapons to enormous 240mm breech-loaded versions capable of destroying fortified buildings from a distance. Artillery of the Warsaw Pact also looks at the widespread use of towed guns as well as the growth in popularity of self-propelled guns. The book also details how Second World War weapons like multiple rocket launchers continued to play a key part in the Cold War hostilities, alongside newly-developed artillery, including tactical ballistic missiles which Khrushchev viewed as a critical part of his response to the threat posed by the United States.
