Alternative Concrete - Geopolymer Concrete Adrian LĂZĂRESCU, Henriette SZILÁGYI, Cornelia BAERĂ, Andreea HEGYI, 2021-09-05 Portland cement based concrete is the most versatile, durable and reliable building material. Unfortunately, the production of Portland cement is environmentally unfriendly. An interesting alternative is provided by alkali-activated geopolymer materials (AAGM). This book focuses on fly ash-based alkali-activated geopolymer concrete, its production and characteristic properties. The re-use of waste materials and industrial by-products, such as fly ash, is not only economically of interest but also helps to reduce carbon dioxide emissions. The carbon footprint of these materials is much lower than that of concrete using ordinary Portland cement. They thus offer new sustainable solutions to the construction industry. Keywords: Geopolymers, Geopolymer Concrete, Alkali-activated Geopolymer Materials (AAGM), Portland Cement, Fly Ash-based Geopolymer Concrete, Reduction of Carbon Dioxide Emissions, Concrete Applications, Self-Compacting Concrete, High-strength Concrete, High-performance Concrete.

Advanced Information Technology, Services and Systems Mostafa Ezziyyani, Mohamed Bahaj, Faddoul Khoukhi, 2017-11-10 This book includes the proceedings of the International Conference on Advanced Information Technology, Services and Systems (AIT2S-17) held on April 14-15, 2017 in Tangier, Morocco. Presenting the latest research in the field, it stimulates debate, discusses new challenges and provides insights into the field in order to promote closer interaction and interdisciplinary

collaboration between researchers and practitioners. Intended for researchers and practitioners in advanced information technology/management and networking, the book is also of interest to those in emergent fields such as data science and analytics, big data, Internet of Things, smart networked systems, artificial intelligence and expert systems, pattern recognition, and cloud computing.

Enlightened Planning Christopher Chapman,2019-06-26
Strategy, risk management and project management are often considered separately by those applying their principles—but at their most effective, all are dependent upon each other for success. Enlightened Planning teaches this holistic perspective and demonstrates how a synthesis of these approaches yields far greater opportunities. A strategic, calculated risk, for example, can be less inherently risky than chronic risk aversion over time. Here, a respected specialist and teacher demonstrates how to become an 'enlightened planner', one that is aware of project, strategy and risk concerns, and their potential interplay. Following the core principle of Keep It Simple Systematically, he shows how organised, systematic thought processes can demystify the complexities of decision-making when considering a huge variety of concerns at once. Supported throughout with real-life cases from the author's considerable experiences with commercial organisations, it is also supported by a website containing even more cases, learning and teaching materials. This book is essential reading for any practitioner specialising in risk management, project management or strategy; as well as those teachers or participants in executive programmes.

Wounded Feelings Eric H. Reiter,2019-11-04 Wounded Feelings is the first legal history of emotions in Canada. Through detailed histories of how people litigated emotional injuries like dishonour, humiliation, grief, and betrayal before the Quebec civil

courts from 1870 to 1950, Eric H. Reiter explores the confrontation between people's lived experience of emotion and the legal categories and terminology of lawyers, judges, and courts. Drawing on archival case files, newspapers, and contemporary legal writings, he examines how individuals narrated their claims of injured feelings and how the courts assessed those claims using legal rules, social norms, and the judges' own feelings to validate certain emotional injuries and reject others. The cases reveal both contemporary views of emotion as well as the family, gender, class, linguistic, and racial dynamics that shaped those understandings and their adjudication. Examples include a family's grief over their infant son's death due to a physician's prescription error, a wealthy woman's mortification at being harassed by a conductor aboard a train, and a Black man's indignation at being denied seats at a Montreal cinema. The book also traces an important legal change in how moral injury was conceptualized in Quebec civil law over the period as it came to be linked to the developing idea of personality rights. By 1950 the subjective richness of stories of wounded feelings was increasingly put into the language of violated rights, a development with implications for both social understandings of emotion and how individuals presented their emotional injuries in court.

Eversheds Sutherland: The Employment Practitioner's Guide to Financial Institutions Paul Fontes, Elizabeth Graves, Susan Mayne, 2019-02-19 The financial crisis both in the US and UK led to concerns that individual accountability of senior managers in the banking sector had to be strengthened and risk and reward aligned more closely. Sweeping amendments were made to legislation, with new regimes introduced to improve accountability and greater powers bestowed upon regulators. The

landscape has changed significantly with onerous rules faced by employers from recruitment to departure and beyond. Eversheds Sutherland: The Employment Practitioner's Guide to Financial Institutions: Key Aspects of the Regulatory Framework (originally titled: The Employment Practitioner's Guide to Financial Institutions: The Senior Managers and Certification Regime and Accountability) covers the full roll-out of the Senior Managers and Certification Regime to all financial services firms in 2018. The complexity of the rules and the difficulty for practitioners in finding resources to help them understand the new regime has led to much confusion and uncertainty. This book provides an invaluable guide to the new regime with practical analysis of the issues raised and how the changes should be implemented.

In Darfur Muḥammad al-Tūnisī, 2020-09-01 A merchant's remarkable travel account of an African kingdom Muḥammad al-Tūnisī (d. 1274/1857) belonged to a family of Tunisian merchants trading with Egypt and what is now Sudan. Al-Tūnisī was raised in Cairo and a graduate of al-Azhar. In 1803, at the age of fourteen, al-Tūnisī set off for the Sultanate of Darfur, where his father had decamped ten years earlier. He followed the Forty Days Road, was reunited with his father, and eventually took over the management of the considerable estates granted to his father by the sultan of Darfur. In Darfur is al-Tūnisī's remarkable account of his ten-year sojourn in this independent state, featuring descriptions of the geography of the region, the customs of Darfur's petty kings, court life and the clothing of its rulers, marriage customs, eunuchs, illnesses, food, hunting, animals, currencies, plants, magic, divination, and dances. In Darfur combines literature, history, ethnography, linguistics, and travel adventure, and most unusually for its time, includes fifty-two illustrations, all drawn by the author. In Darfur is a rare example of an Arab description of an African society on the eve of Western colonization and vividly evokes a world in which travel was untrammelled by bureaucracy, borders were fluid, and

startling coincidences appear almost mundane. An English-only edition.

Physical Stresses in Plants Stefania Grillo, Antonella Leone, 2012-12-06 The workshop Genes and their products for tolerance to physical stresses in plants was held in Maratea, Italy, from 24-27 September 1995. As one of a series of activity launched by the European Science Foundation (ESF) Network Cell Stress Genes and their Protein Products, the workshop was the only one entirely devoted to research in the plant field. Around one hundred participants from fourteen different countries enjoyed a lively meeting in an atmosphere of sunny Mediterranean weather. A total of twenty-eight speakers from universities and research institutes were invited to present the most recent results of their research. The workshop was divided into eight sessions, namely heat, cold, salt, drought, oxidative stress, light stress, a conclusive session for recommendations and a poster session. The results reported in this workshop broadly showed the rapid progress made in the understanding of the molecular mechanisms underlying basic aspects of the plant response to environmental stresses.

Real-Time and Embedded Computing Systems and Applications Jing Chen, Seongsoo Hong, 2004-05-21 This book constitutes the thoroughly refereed post-proceedings of the 9th International Conference on Real-Time and Embedded Systems and Applications, RTCSA 2003, held in Tainan, Taiwan, in February 2003. The 28 revised full papers and 9 revised short papers presented were carefully reviewed and selected for inclusion in the book. The papers are organized in topical sections on scheduling, networking and communication, embedded systems and environments, pervasive and ubiquitous computing, systems and architectures, resource management, file systems and databases, performance analysis, and tools and development.

The Future of Fisheries Science in North America Richard J. Beamish, Brian J. Rothschild, 2009-02-07 Fisheries science in

North America is changing in response to a changing climate, new technologies, an ecosystem approach to management and new thinking about the processes affecting stock and recruitment. Authors of the 34 chapters review the science in their particular fields and use their experience to develop informed opinions about the future. Everyone associated with fish, fisheries and fisheries management will find material that will stimulate their thinking about the future. Readers will be impressed with the potential for new discoveries, but disturbed by how much needs to be done in fisheries science if we are to sustain North American fisheries in our changing climate. Officials that manage or fund fisheries science will appreciate the urgency for the new information needed for the stewardship of fish populations and their ecosystems. Research organizations may want to keep some extra copies for a future look back into the thoughts of a wide range of fisheries professionals. Fisheries science has been full of surprises with some of the surprises having major economic impacts. It is important to minimize these impacts as the demand for seafood increases and the complexities of fisheries management increase.

Landslides - Disaster Risk Reduction Kyoji Sassa,Philippo Canuti,2008-11-07 This book documents the First World Landslide Forum, which was jointly organized by the International Consortium on Landslides (ICL), eight UN organizations (UNESCO, WMO, FAO, UN/ISDR, UNU, UNEP, World Bank, UNDP) and four NGOs (International Council for Science, World Federation of Engineering Organizations, Kyoto Univ. and Japan Landslide Society) in Tokyo in 2008. The material consists of four parts: The Open Forum Progress of IPL Activities; Four Thematic Lectures in the Plenary Symposium Global Landslide Risk Reduction; Six Keynote Lectures in the Plenary session; and the aims and overviews of eighteen parallel sessions (dealing with various aspects necessary for landslide disaster risk

reduction such as: observations from space; climate change and slope instability; landslides threatening heritage sites; the economic and social impact of landslides; monitoring, prediction and early warning; and risk-management strategies in urban area, etc.) Thus it enables the reader to benefit from a wide range of research intended to reduce risk due to landslide disasters as presented in the first global multi-disciplinary meeting.

Crosstalk in WDM Communication Networks Idelfonso Tafur Monroy, Eduward Tangdiongga, 2013-03-14 Optical communications networks are an essential part of the world wide te- communication infrastructure . The number of users of present and future telecommunication services like Internet, web browsing and tele-education is expected to increase dramatically . As a consequence there is an imminent - mand for high broadband and high capacity communication systems. A promising solution is found in the concept of all-optical networks . These networks exploit the vast capacity of the optical fiber by using multiplexing techniques that allow for an overall capacity of terabits per second. Channels are routed and switched in the optical domain . In this manner data channels are carried from the receiver side to its destination making use of optical transmission techniques . Wavelength division multiplexing (WDM) is a transmission technique that has dramatically increased the capacity of optical transmission systems. WDM allows for transmission of several channels over a single optical fiber by - ing different wavelength as the channel carrier . Optical switching and routing techniques are also being developed to cope with the high data speeds and n- ber of channel carried in the optical fibers. These functionalities are provided by optical crossconnects. The use of transmission techniques such as WDM in combination with optical crossconnects is enabling optical

networking at high bit-rates reaching terabits per second . These techniques also offer ways to improve the network flexibility and configurability .

Proceedings of the Indian Geotechnical Conference 2019
Satyajit Patel,C. H. Solanki,Krishna R. Reddy,Sanjay Kumar Shukla,2021-04-22 This book comprises select proceedings of the annual conference of the Indian Geotechnical Society. The conference brings together research and case histories on various aspects of geotechnical and geoenvironmental engineering. The book presents papers on geotechnical applications and case histories, covering topics such as (i) Characterization of Geomaterials and Physical Modelling; (ii) Foundations and Deep Excavations; (iii) Soil Stabilization and Ground Improvement; (iv) Geoenvironmental Engineering and Waste Material Utilization; (v) Soil Dynamics and Earthquake Geotechnical Engineering; (vi) Earth Retaining Structures, Dams and Embankments; (vii) Slope Stability and Landslides; (viii) Transportation Geotechnics; (ix) Geosynthetics Applications; (x) Computational, Analytical and Numerical Modelling; (xi) Rock Engineering, Tunnelling and Underground Constructions; (xii) Forensic Geotechnical Engineering and Case Studies; and (xiii) Others Topics: Behaviour of Unsaturated Soils, Offshore and Marine Geotechnics, Remote Sensing and GIS, Field Investigations, Instrumentation and Monitoring, Retrofitting of Geotechnical Structures, Reliability in Geotechnical Engineering, Geotechnical Education, Codes and Standards, and other relevant topics. The contents of this book are of interest to researchers and practicing engineers alike.

Ss2: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels enthralling the hearts of readers worldwide. Lets delve

into the realm of top-selling books, exploring the fascinating narratives that have charmed audiences this year. **Ss2 : Colleen Hoover "It Ends with Us"** This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. **Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo"** This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. **Discover the Magic : Delia Owens "Where the Crawdads Sing"** This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students

are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and thrilling novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
