**Nautilus to Columbia** James C. Goodall,2023-11-23 A highly illustrated history of the US Navy's nuclear submarine program, from the postwar years to the 2020 Columbia-class SSBNs. James C. Goodall covers the origins, design and development of the US Navy's fleet of nuclear-powered submarines. This program was developed under the command of Hiram G. Rickover, the “Father of the Nuclear Navy” who oversaw the commissioning of the very first nuclear-powered attack submarine, the USS Nautilus (SSN 571) in 1952. This was a truly revolutionary design. Until the advent of nuclear power, the world's submarine fleets traveled on the surface at night to charge their batteries, and only dove below the surface when enemy ships or planes were spotted. With the development of the USS Nautilus, the US Navy now had the ability to stay submerged for not just hours or days, but to hide out of harm's way for weeks or months at a time This highly illustrated book covers all of the 220+ submarine hulls built and delivered to the US Navy from the USS Nautilus through to the Navy's newest class of submarine, the Columbia class SSBNs. The story of the Nuclear Navy from its origins up to the present day is told through more than 1,300 images from official and archive sources, as well as the author's own personal collection, some of which have never been published before.

Submarine Tom Clancy,John Gresham,2003-05-06 Only the author of The Hunt for Red October could capture the reality of life aboard a nuclear submarine. Only a writer of Mr. Clancy's magnitude could obtain security clearance for information, diagrams, and photographs never before available to the public. Now, every civilian can enter this top secret world...the weapons, the procedures, the people themselves...the startling facts behind the fiction that made Tom Clancy a #1 bestselling author.

**Forged in War** Gary E. Weir,1993 This book is the first to analyze the partnership between the Navy, industry, and science forged by World War II and responsible for producing submarines in the United States in the period from 1940 through 1961. The naval-industrial complex was not the result of a single historical event. Neither was it a political-economic entity. Instead it was made up of many unique and distinct components, all of which developed simultaneously; each reflected the development, significance, and construction of a particular vessel or technology within its historical context. Together these components emerged from World War II as a network of distinct relationships linked together by the motives of national defense, mutual growth, and profit. None of the major players in the drama planned or predetermined the naval-industrial complex, and it did not conform to the views of any individual or confirm the value of a particular system of management. Instead it grew naturally in response to the political environment, strategic circumstances, and perceived national need, its character defined gradually not only by the demands of international conflict but also by the scores of talented people interested in the problems and possibilities of submarine warfare. Their combined efforts during this short period of time produced remarkable advances in nuclear propulsion, submerged speed, quieting, underwater sound, and weaponry, as well as a greater appreciation within the Navy and the shipbuilding industry for the ocean environment.This book won the Roosevelt Prize for naval history.

The Submarine in the United States Navy United States. Naval History Division,1969

Submarine Torpedo Tactics Edward Monroe Jones,Shawn S. Roderick,2014-11-25 Never-before-published, firsthand accounts of under-sea action presented with a summary of torpedo tactics illustrate how a submarine's crew can hit a target trying to avoid being hit. Legendary figures in American submarine history come to life in actual logs of undersea warfare, and in accounts of sailors who were in the van of torpedo tactics development. The technology is explained in detail, showing how American subs have been so successful in their hundred-year history. Outlandish gags and pranks of submarine skippers are included, showing just how brazen this elite group of super-competent sailors could be. The reader travels through World War II and the Cold War as submarines and torpedoes enter the nuclear age. The book is filled with diagrams and illustrations.

Steely Eyed Killers of the Deep Tommy Robinson,2013-11 The sea stories of over 45 submariners who served in USS Nautilus (SSN-571) between 1954 and 1980. What one submarine sailor can imagine and tell in great detail, another submarine sailor can corroborate, expand and improve on, in much greater detail. These are their stories.

Unknown Waters Alfred Scott McLaren,2008-01-22 This book tells the story of the brave officers and men of the nuclear attack submarine USS Queenfish (SSN-651), who made the first survey of an extremely important and remote region of the Arctic Ocean. The unpredictability of deep-draft sea ice, shallow water, and possible Soviet discovery, all played a dramatic part in this fascinating 1970 voyage.
