*Analysis of Ssn 688 Class Submarine Maintenance Delays - Study of Pearl Harbor Naval Shipyard Work on Nuclear-Powered Attack Submarines, Impact of Decrease in Overall Operational Availability* U. S. Military,Department of Defense (Dod),R. Leon Lary IV,2018-08-04 The combination of negative real budget growth and unchanged operational use has stressed the resources of the United States Navy, resulting in an annual average over-budget execution of \$0.77 billion per year in Navy-wide ship depot maintenance since FY2010. The Navy's active ship maintenance budget only supports 70 percent of the ship maintenance projected in FY2017; a significant portion of over-budget execution and delays has occurred with submarine availabilities. Delays to a submarine's return to the fleet results in a decrease of the overall operational availability (Ao) of already diminishing submarine force levels. In this thesis, data collected from Pearl Harbor Naval Shipyard (PHNSY) is analyzed to investigate possible factors impacting the ability of maintenance activities to complete SSN 688-class submarine maintenance availabilities as scheduled. The analysis illustrates a systematic underestimation of availability duration due to the use of outdated historically based estimates following a significant shift in maintenance strategy in 2012. Additionally, the analysis shows a significant increasing trend in the average number of man-days required to complete a job. This thesis provides a narrowed focus for future studies attempting to determine the cause of this trend. Finally, this thesis proposes a solution to the systematic underestimation of availability durations by illustrating the inherent error in the current equation and providing a notional equation to remove that error.

The Us Navy's Fast Attack Submarines, Vol. 1 James C. Goodall,2017 This illustrated book covers the complete history of the United States' Los Angeles class attack submarines from initial design and construction, through testing and trials, to its current operations. The nuclear-powered USS Los Angeles (SSN-688) class attack submarine represented the lead ship of the largest group of vessels constructed for the US Navy during the Cold War, and was purposefully designed for anti-submarine operations against the Soviets. Sixty-two boats were built and launched between 1976 and 1996, and the class continues to serve in force to this day. The exclusive and extensive photographic coverage of the boat's interior is featured here for the first time. Details of the boats' armament includes: four 21 bow-mounted torpedo tubes supporting the Mk 48 ADCAP torpedo series; Tomahawk (BGM-109) cruise missile; and Harpoon (UGM-84) anti-ship missile capability. The

author's unprecedented access allows the reader a first time view of these submarines.

Nautilus to Columbia James C. Goodall,2023-11-23 A highly illustrated history of the US Navy's nuclear submarine program, from the postwar years to the 2020 Columbia-class SSBNs. James C. Goodall covers the origins, design and development of the US Navy's fleet of nuclear-powered submarines. This program was developed under the command of Hiram G. Rickover, the "Father of the Nuclear Navy" who oversaw the commissioning of the very first nuclear-powered attack submarine, the USS Nautilus (SSN 571) in 1952. This was a truly revolutionary design. Until the advent of nuclear power, the world's submarine fleets traveled on the surface at night to charge their batteries, and only dove below the surface when enemy ships or planes were spotted. With the development of the USS Nautilus, the US Navy now had the ability to stay submerged for not just hours or days, but to hide out of harm's way for weeks or months at a time This highly illustrated book covers all of the 220+ submarine hulls built and delivered to the US Navy from the USS Nautilus through to the Navy's newest class of submarine, the Columbia class SSBNs. The story of the Nuclear Navy from its origins up to the present day is told through more than 1,300 images from official and archive sources, as well as the author's own personal collection, some of which have never been published before.
