Korean Constitutional Acupuncture - Theory and Clinical Application of the Hwa and Taegeuk Five Elemental Methods Gary Wagman, PhD, LAc, The Hwa and Taegeuk Five Element acupuncture techniques are among the most commonly practiced constitutionally-based methods in modern day Korea. These simple and effective methods incorporate Five Elemental Theory to address a myriad of physiological and psychological issues. The Hwa Acupuncture method emphasizes the use of pulse examination, and the Taegeuk method, the insertion of needles to determine the patient's constitution. Treatment according to these methods is primarily focused on balancing constitutionally excessive and deficient organ systems while simultaneously addressing the patients direct concerns.

THE PREVIOUSLY UNKNOWN SECRETS OF THE HUMAN BODY LI XIAOGUANG,2021-08-04 Traditional Chinese Medicine holds that there are some structures in the human body that modern medicine has not understood up to now, that is, meridians and acupoints. Traditional Chinese Medicine has drawn their distribution maps in the human body and has been using them to treat diseases for thousands of years. What role do meridians and acupoints have on human body, and why can they cure diseases? About which the discussion of Traditional Chinese Medicine is vague and difficult to be understood and proved. Based on the author's research for more than 30 years, this book has made a new discussion, which is not only clear, accurate and easy to be understood, but also can be proved by experiments. It is hoped that they can be accepted and adopted by modern medicine in the future and become part of modern medicine. Understanding the effects of meridians and acupoints on human body can make better use of them to cure diseases. The method of treating diseases by massaging acupoints introduced in this book is simple, convenient, low-cost and has no toxic side effect. It can be used to treat many diseases that are difficult to cure in modern medicine at present and should become an important direction of medical research and development in the future.

Applications of Acupuncture to Neurological Conditions Changzhen Gong,Wei Liu,2024-02-27 This book represents a significant advance in the field of evidence-based acupuncture, specifically in regard to neurological disorders. It is a testament to the promising future of acupuncture, integrating the complexities of the human brain with the healing art of acupuncture. Each chapter leads readers to an expanded perspective where past and future, tradition and technology, converge in the pursuit of healing and well-being. In recent decades, technologies like functional magnetic resonance imaging (fMRI) have revolutionized our understanding of the human brain, enabling scientists to observe the brain's response to acupuncture in real-time. Tracing the pathways from acupoint to brain structure reveals fresh insights on the therapeutic function of acupoints and meridians. Participate in this journey to understand how acupuncture influences the brain, exploring new frontiers in the treatment and understanding of brain-related conditions. This book offers a rich blend of traditional healing wisdom and contemporary scientific insight.

Multi-Modality Neuroimaging Study on Neurobiological Mechanisms of Acupuncture Jie Tian,2017-08-29 This book introduces essential advances in acupuncture studies using multi-modality neuroimaging, which provides insights into how specific brain networks are involved in acupuncture effects in humans. Stimulating different acupoints to treat various clinical conditions is usually accompanied by multi-dimensional physiological as well as psychological responses, which are regulated by the central nervous system. The book addresses disease-specific neural correlates and acupuncture-targeted regulatory encoding in the brain, and explains the temporal-spatial encoding in brain networks to clarify the acupuncture mechanisms. By highlighting the targeting mechanisms of typical indications of acupuncture, this book provides a scientific explanation for acupuncture therapy.

WHO Standard Acupuncture Point Locations in the Western Pacific Region ,2008-06-05 Acupuncture has been practiced for more than 2500 years in the Western Pacific region and has become a global therapeutic method in recent decades. However, it was reported that acupuncturists differed by up to 25% in the acupuncture points they used, raising doubts and uncertainty regarding the efficacy and safety of acupuncture treatment, as well as causing difficulties in the fields of acupuncture research and education. Member States therefore increasingly began to demand standardization in acupuncture point locations.

Responding to this request, the WHO Western Pacific Regional Office initiated a project to reach consensus on acupuncture point locations and thus convened 11 serial meetings resulting in these guidelines. This Standard acupuncture point locations in the Western Pacific Region stipulates the methodology for locating acupuncture points on the surface of the human body, as well as the locations of 361 acupuncture points. The Standard is applicable for teaching, research, clinical service, publication, and academic exchanges involving acupuncture.
