Korean Constitutional Acupuncture - Theory and Clinical Application of the Hwa and Taegeuk Five Elemental Methods Gary Wagman, PhD, LAc, The Hwa and Taegeuk Five Element acupuncture techniques are among the most commonly practiced constitutionally-based methods in modern day Korea. These simple and effective methods incorporate Five Elemental Theory to address a myriad of physiological and psychological issues. The Hwa Acupuncture method emphasizes the use of pulse examination, and the Taegeuk method, the insertion of needles to determine the patient's constitution. Treatment according to these methods is primarily focused on balancing constitutionally excessive and deficient organ systems while simultaneously addressing the patients direct concerns.

Facial Enhancement Acupuncture Paul Adkins,2013-10-31 Based on Five Elements theory, this practical, fully illustrated guide to performing facial enhancement acupuncture (also known as cosmetic acupuncture, facial revitalisation or facial rejuvenation acupuncture) shows in detail the acupuncture points, techniques and equipment used in this procedure. Facial enhancement acupuncture targets points and muscles of the face in order to improve the elasticity of the skin and general overall appearance, as well as addressing constitutional points on the legs, arms and body to balance and harmonise the inner elements. The author clearly explains the rationale behind the needling of each face and neck point, which are shown in colour illustrations. He also discusses the advantages of acupuncture over surgical intervention in dealing with wrinkles and sagging jaw lines, and a chapter is included on discussing treatment with prospective patients, follow up and after care. As well as significantly improving the cosmetic appearance, facial acupuncture also has a strong whole body effect on the health and wellbeing of the person treated, and has a long and distinguished history in Chinese medicine. The book is the perfect introduction for acupuncturists and acupuncture students who want to learn how to incorporate this alternative to surgical procedures into their practice.

The Akragas Dialogue Monica De Cesare,Elisa Chiara Portale,Natascha Sojc,2020-02-24 The papers of this volume focus on the sacred landscapes of ancient Sicily. Religious and cultural dimensions of Greek sanctuaries are assessed in light of the results of recent excavations and new readings of literary sources. The material dimension of cult practices in ancient sanctuaries is the central issue of all contributions, with a focus on the findings from ancient Akragas. Great attention is also paid to past ritual activities, which are framed in three complementary areas of enquiry. Firstly, the architectural setting of sanctuaries is examined beyond temple buildings to assess the wider context of their structural and spatial complexity. Secondly, the material culture of votive deposition and religious feasting is analysed in terms of performative characteristics and through the lens of anthropological approaches. Thirdly, the significance of gender in cultic practice is investigated in light of the fresh data retrieved from the field. The new findings presented in this volume contribute to close the existing research gaps in the study of sanctuaries in Sicily, as well as the wider practice of Greek religion.

Acupuncture Logic Michael J. Migliore,2003 The information contained in this book, although familiar to many practitioners and students, is presented in a concise logistical format. This unique method of utilizing acupuncture treatment algorithms for differential diagnosis of disease states is logically systematic and useful both as an acupuncture treatment text and reference guide. The compilation of material is extracted from Chinese Acupuncture and Moxibustion, Foreign Language Press, Beijing. The disease states are listed alphabetically and are located at the top of the page. They are then subcategorized and differentiated according to their main manifestations. The acupuncture treatment points that are specific to the disease state are found next, followed by the tongue and pulse diagnosis. Located at the bottom of the page are acupuncture treatment points that are common to the various subdivisions of the disease states. It is often helpful to start at the bottom of the page, identifying common acupuncture treatment points to each subdivision (if there are any). This unique presentation of the material appears visually clear, uniform and easier to decipher and commit to memory. The appendix contains the disease states and acupuncture treatment points listed in a quick reference chart. This document will prove to be a valuable tool to both practitioner and student.
