First Language Acquisition David Ingram,1989-09-07 This major textbook, setting new standards of clarity and comprehensiveness, will be welcomed by all serious students of first language acquisition. Written from a linguistic perspective, it provides detailed accounts of the development of children's receptive and productive abilities in all the core areas of language - phonology, morphology, syntax and semantics. With a critical acuity drawn from long experience, and without attempting to offer a survey of all the huge mass of child language literature, David Ingram directs students to the fundamental studies and sets these in broad perspective. Students are thereby introduced to the history of the field and the current state of our knowledge in respect of three main themes: method, description and explanation. Whilst the descriptive facts that are currently available on first language acquisition are central to the book, its emphasis on methodology and explanation gives it a particular distinction. The various ways in which research is conducted is discussed in detail, as well as the strengths and weaknesses of various approaches, leading to new perspectives on key theoretical issues. First Language Acquisition provides advanced undergraduate and graduate students alike with a cogent and closely analysed exposition of how children acquire language in real time. Equally importantly, readers will have acquired the fundamental knowledge and skill not only to interpret primary literature but also to approach their own research with sophistication.

Demetrio Salazaro. E il Medioevo artistico meridionale Giovanni Lacorte,2019 La monografia mette a fuoco le vicende di Demetrio Salazaro (Reggio Calabria, 1822? Pozzuoli, 1882), figura di spicco nell?ambito delle nascenti istituzioni di tutela dello Stato unitario. Il volume riconsidera, per la prima volta in forma più definita, le attività principali di questo poliedrico personaggio che fu pittore, patriota, ispettore museale, esploratore delle regioni artistiche italomeridionali, studioso e scrittore d?arte, instancabile organizzatore culturale.

Italian Fifteenth- to Seventeenth-century Drawings Anna Forlani Tempesti,Metropolitan Museum of Art (New York, N.Y.),1991 Perhaps more than any other collector of his generation in the United States, Robert Lehman was interested in acquiring early drawings. He made a great effort to add drawings to the collection of paintings, sculpture, ceramics, glass, and other objects that his father, Philip Lehman, had begun assembling. The 116 Italian drawings analyzed and discussed in this volume are among the more than 2,000 works of art from the collection now housed in the Robert Lehman Wing of The Metropolitan Museum of Art. Robert Lehman's collection demonstrates the variety of drawings produced in Italy from the fifteenth to the seventeenth century, a period when the purposes and techniques of drawings, as well as the aims and abilities of the artist who made them, became increasingly sophisticated. The volume includes an elaborate design for an equestrian monument by Antonio Pollaiuolo, a magnificent study of a bear by Leonardo da Vinci, a cartoon by Luca Signorelli, a study for a vault fresco by Taddeo Zuccaro, and many other drawings that are among the best Italian examples to have survived from that era. Most types of drawings, in a wide variety of techniques, are represented—figure studies, grand compositions, landscapes, cartoons, modelli, and even sculptors' studies. -- Metropolitan Museum of Art website.

F-X Michael Stampe,2012-03-01 F-X illustre l'évolution radicale du rapport aux autres dans un monde livré à la communication virtuelle grâce à la mise en scène de son propre corps. A sa manière, basée sur les codes d'une sexualité provocante, il expose ses tensions intimes et hurle sa quête d'amour devant le monde entier.

The Nature of Meaningfulness Robert K. Shope,1999 Shope presents a unified perspective on meaningfulness, spanning such varied topics as the meaningfulness of linguistic expressions and conventional signs, Freud's conception of the meaningfulness of various mental phenomena and instances of behavior, a person's meaning to do something, meaning in the arts, and even life's having a meaning. Shope's perspective is based upon a 'constitutive' analysis of what it is for one item to represent another. Criticizing the views of philosophers who attempt to analyze such representing in causal terms, or merely in epistemological terms, he shows that a successful analysis needs to invoke both types of considerations.

Iter Italicum ,1977-12-31 The Iter Italicum serves as a useful reference work for scholars in the history of philosophy, the sciences, classical learning, grammar and rhetoric, Neolatin literature, historiography of the theory of the arts and of music and related subjects. By scanning the volume or through this index, scholars will be able to find source material for individual writers as well as for certain subjects, problems or themes. By indicating for each manuscript its location and shelf-mark, scholars will find it easier to order microfilms or to pursue more detailed studies of some of the manuscripts listed. The volumes should also prove useful for librarians as a reference for the holdings of their own or other libraries.
