Birdsong Don Stap,2007-11-01 Following one of the world's experts on birdsong from the woods of Martha's Vineyard to the tropical forests of Central America, Don Stap brings to life the quest to unravel an ancient mystery: Why do birds sing and what do their songs mean? We quickly discover that one question leads to another. Why does the chestnut-sided warbler sing one song before dawn and another after sunrise? Why does the brown thrasher have a repertoire of two thousand songs when the chipping sparrow has only one? And how is the hermit thrush able to sing a duet with itself, producing two sounds simultaneously to create its beautiful, flutelike melody? Stap's lucid prose distills the complexities of the study of birdsong and unveils a remarkable discovery that sheds light on the mystery of mysteries: why young birds in the suborder oscines -- the true songbirds -- learn their songs but the closely related suboscines are born with their songs genetically encoded. As the story unfolds, Stap contemplates our enduring fascination with birdsong, from ancient pictographs and early Greek soothsayers, who knew that bird calls represented the voices of the gods, to the story of Mozart's pet starling. In a modern, noisy world, it is increasingly difficult to hear those voices of the gods. Exploring birdsong takes us to that rare place -- in danger of disappearing forever -- where one hears only the planet's oldest music.

The Girl With Nine Wigs Sophie van der Stap,2015-09-29 'It's Saturday and everything is different. No, I didn't go to the market this morning and I didn't have my usual coffee on Westerstraat. And no, I wasn't getting ready for a new semester at college. Next Monday, January 31st, I have to admit myself at the hospital for my first chemotherapy session. For the next two months, I'm expected each week for a fresh shot of vincristine, etoposide, ifosfamide and loads more exciting abracadabra.' Sophie is twenty-one when she is diagnosed with a rare, aggressive form of cancer. A striking, fun-loving student, her world is reduced overnight to the sterile confines of a hospital. But within these walls Sophie discovers a whole new world of white coats, gossiping nurses, and sexy doctors; of shared rooms, hair loss, and eyebrow pencils. As wigs become a crucial part of Sophie's new life, she reclaims a sense of self-expression. Each of Sophie's nine wigs makes her feel stronger and gives her a distinct personality, and that is why each has its own name: Stella, Sue, Daisy, Blondie, Platina, Uma, Pam, Lydia, and Bébé. There's a bit of Sophie in all of them, and they reveal as much as they hide. Sophie is determined to be much more than a cancer patient. With refreshing candor and a keen eye for the absurd, Sophie van der Stap's The Girl With Nine Wigs makes you smile when you least expect it.
