Southern Sun, Northern Star Joanna Hathaway, 2021-04-20 Battles, revolution, and romance collide in Southern Sun, Northern Star, the conclusion to Joanna Hathaway's stunning, World Wars-inspired fantasy series. Reeling from the tragedy that beset her family, Princess Aurelia has joined the resistance in Havenspur,

spying on the Northern leaders who were once her allies and determined to stop her uncle's machinations for war. Meanwhile, her beloved pilot Athan leads his squadron into battle as the Safire wage a losing war abroad and combat growing unrest back home. When Athan is sent on leave to Havenspur following the death of a comrade, the pair reunite and rekindle their romance until Aurelia uncovers one of Athan's secrets, a secret that could save countless lives. But exposing it to the right people will cost her Athan's trust, and this time, their shared memories of love might not be enough to stop the fateful path of destruction that threatens all they've fought to defend. As history unfolds around them, every move they make drives them one step closer to either recreating their parents' shadowed past or redeeming the alliance that could bring peace. The breathtaking finale to a legendary series. Part war drama, part romance, Southern Sun, Northern Star is the epic conclusion to the Glass Alliance series. The Glass Universe Dava Sobel, 2016-12-06 From #1 New York Times bestselling author Dava Sobel, the inspiring (People), little-known true story of women's landmark contributions to

astronomy A New York Times Book Review Notable Book of 2017
Named one of the best books of the year by NPR, The Economist,
Smithsonian, Nature, and NPR's Science Friday Nominated for the
PEN/E.O. Wilson Literary Science Writing Award A joy to read.”

—The Wall Street Journal In the mid-nineteenth century, the
Harvard College Observatory began employing women as
calculators, or “human computers,” to interpret the observations
their male counterparts made via telescope each night. At the
outset this group included the wives, sisters, and daughters of the
resident astronomers, but soon the female corps included
graduates of the new women's colleges—Vassar, Wellesley, and
Smith. As photography transformed the practice of astronomy, the
ladies turned from computation to studying the stars captured
nightly on glass photographic plates. The “glass universe” of half a
million plates that Harvard amassed over the ensuing
decades—through the generous support of Mrs. Anna Palmer
Draper, the widow of a pioneer in stellar photography—enabled the
women to make extraordinary discoveries that attracted worldwide
acclaim. They helped discern what stars were made of, divided the
stars into meaningful categories for further research, and found a
way to measure distances across space by starlight. Their ranks

included Williamina Fleming, a Scottish woman originally hired as a maid who went on to identify ten novae and more than three hundred variable stars; Annie Jump Cannon, who designed a stellar classification system that was adopted by astronomers the world over and is still in use; and Dr. Cecilia Helena Payne, who in 1956 became the first ever woman professor of astronomy at Harvard—and Harvard’s first female department chair. Elegantly written and enriched by excerpts from letters, diaries, and memoirs, *The Glass Universe* is the hidden history of the women whose contributions to the burgeoning field of astronomy forever changed our understanding of the stars and our place in the universe.

The Glass Castle Jeannette Walls, 2007-01-02 A triumphant tale of a young woman and her difficult childhood, *The Glass Castle* is a remarkable memoir of resilience, redemption, and a revelatory look into a family at once deeply dysfunctional and wonderfully vibrant. Jeannette Walls was the second of four children raised by anti-institutional parents in a household of extremes.

Star Bright and the Looking Glass Jonathan Luna, 2012 When *Star Bright*, a forest maiden, encounters an evil sorceress who steals her beauty and youth, she must embark on a dangerous

journey with her friends, Toad, Owl, and Capybara. Jonathan Luna, of Luna Brothers fame (Girls, The Sword, Ultra), makes his solo debut, writing and illustrating an original fairy-tale picture book of prose and 32 full-page, water-colored illustrations.

Star Trek: Mirror Universe: Glass Empires David Mack, Greg Cox, Mike Sussman, Dayton Ward, Kevin Dilmore, 2007-02-20 There are moments glimpsed only in shadow, where darkness rules and evil incarnate thrives. You hope against hope that in your lifetime, evil is relegated to the shadows. But what if it wasn't? What if you lived in a universe where your life was measured only by what you could do for the Empire? What would you do to survive? Would you sell your soul to free yourself? If you were offered the chance to rule, would you seize it? If you could free your universe from the darkness but only at the cost of your life, would you pay that price? Star Trek: Enterprise®—she seized power in a heartbeat, daring to place herself against all the overlords of the Empire. Empress Hoshi Sato knows the future that could be; now all she has to do is make sure it never happens. For her to rule, she must hold sway not only over the starship from the future but also over her warlords, the resistance, and her Andorian husband. As quickly and brutally as Hoshi seized power, imperial rule is taken from her.

Her only chance to rule again is to ally herself with a lifelong foe, and an alien. Star Trek® One man can change the future, but does he dare? Spock, intrigued by the vision of another universe's Federation, does what no Vulcan, no emperor, has ever done: seize power in one blinding stroke of mass murder. And at the same instant he gains imperial power, Spock sows the seeds for the Empire's downfall. Is this a form of Vulcan madness, or is it the coolly logical plan of a man who knows the price his universe must pay for its freedom? Star Trek: The Next Generation®—Humanity is a pitiful collection of enslaved, indentured, and abused peoples. No one dares to question the order, except at peril of their lives. One man survives by blinding himself to the misery around him. However, Jean-Luc Picard resists, just once. And in that one instant he unlocks a horror beyond the tyranny of the Alliance. Can a man so beaten down by a lifetime of oppression stop the destruction?

Starbreak Phoebe North, 2014-07-08 Alien foes, forbidden romance, and uneasy alliances await in the sequel to Starglass, which #1 New York Times bestselling author Veronica Roth called “a richly imagined, beautifully written book.” The Asherah has finally reached Zehava, the long-promised planet. There, Terra

finds harsh conditions and a familiar foe—Aleksandra Wolff, leader of her ship’s rebel forces. As Terra and Aleksandra lock horns about how best to reach the alien city, they encounter violent beasts—and dangerous hunters. It’s only when they’re taken to the city as prisoners that Terra finally discovers Vadix, the boy who has haunted her dreams. But Vadix has a dark past of his own, and Aleksandra is intent on using violence to lead their tiny band to freedom. When the rebel leader gets humanity expelled from the planet, it’s up to Terra, with Vadix by her side, to unite her people—and to forge an alliance with the alien hosts, who want nothing more than to see humanity gone forever. “Starbreak successfully combines sensuous, forbidden romance with hard science fiction elements like first contact, strange planets, and politics” (VOYA).

Software Creativity 2.0 Robert L. Glass, 2006 Glass explores a critical, yet strangely neglected, question: What is the role of creativity in software engineering and computer programming? With his trademark easy-to-read style and practical approach, backed by research and personal experience, Glass takes on a wide range of related angles and implications. (Computer Books)

The Encyclopedia of Louisville John E. Kleber, 2014-07-11 With more than 1,800 entries, *The Encyclopedia of Louisville* is the ultimate reference for Kentucky’s largest city. For more than 125 years, the world’s attention has turned to Louisville for the annual running of the Kentucky Derby on the first Saturday in May. Louisville Slugger bats still reign supreme in major league baseball.

The city was also the birthplace of the famed Hot Brown and Benedictine spread, and the cheeseburger made its debut at Kaelin's Restaurant on Newburg Road in 1934. The Happy Birthday had its origins in the Louisville kindergarten class of sisters Mildred Jane Hill and Patty Smith Hill. Named for King Louis XVI of France in appreciation for his assistance during the Revolutionary War, Louisville was founded by George Rogers Clark in 1778. The city has been home to a number of men and women who changed the face of American history. President Zachary Taylor was reared in surrounding Jefferson County, and two U.S. Supreme Court Justices were from the city proper. Second Lt. F. Scott Fitzgerald, stationed at Camp Zachary Taylor during World War I, frequented the bar in the famous Seelbach Hotel, immortalized in *The Great Gatsby*. Muhammad Ali was born in Louisville and won six Golden Gloves tournaments in Kentucky.

Through the Glass Ceiling to the Stars Eileen M.

Collins, Jonathan H. Ward, 2021-10-19 The long-awaited memoir of a trailblazer and role model who is telling her story for the first time. Eileen Collins was an aviation pioneer her entire career, from her crowning achievements as the first woman to command an American space mission as well as the first to pilot the space shuttle to her early years as one of the Air Force's first female pilots. She was in the first class of women to earn pilot's wings at Vance Air Force Base and was their first female instructor pilot. She was only the second woman pilot admitted to the Air Force's elite Test Pilot Program at Edwards Air Force Base. NASA had such confidence in her skills as a leader and pilot that she was entrusted to command the first shuttle mission after the Columbia disaster, returning the US to spaceflight after a two-year hiatus. Since retiring from the Air Force and NASA, she has served on numerous corporate boards and is an inspirational speaker about space exploration and leadership. Eileen Collins is among the most recognized and admired women in the world, yet this is the first time she has told her story in a book. It is a story not only of achievement and overcoming obstacles but of profound personal transformation. The shy, quiet child of an alcoholic father and

struggling single mother, who grew up in modest circumstances and was an unremarkable student, she had few prospects when she graduated from high school, but she changed her life to pursue her secret dream of becoming an astronaut. She shares her leadership and life lessons throughout the book with the aim of inspiring and passing on her legacy to a new generation.

The Glass Hotel Emily St. John Mandel, 2020-03-24

INTERNATIONAL BESTSELLER • From the bestselling author of *Station Eleven* and *Sea of Tranquility*, an exhilarating novel set at the glittering intersection of two seemingly disparate events—the exposure of a massive criminal enterprise and the mysterious disappearance of a woman from a ship at sea. “The perfect novel ... Freshly mysterious.” —The Washington Post Vincent is a bartender at the Hotel Caiette, a five-star lodging on the northernmost tip of Vancouver Island. On the night she meets Jonathan Alkaitis, a hooded figure scrawls a message on the lobby's glass wall: Why don't you swallow broken glass. High

above Manhattan, a greater crime is committed: Alkaitis's billion-dollar business is really nothing more than a game of smoke and mirrors. When his scheme collapses, it obliterates countless fortunes and devastates lives. Vincent, who had been posing as Jonathan's wife, walks away into the night. Years later, a victim of the fraud is hired to investigate a strange occurrence: a woman has seemingly vanished from the deck of a container ship between ports of call. In this captivating story of crisis and survival, Emily St. John Mandel takes readers through often hidden landscapes: campgrounds for the near-homeless, underground electronica clubs, service in luxury hotels, and life in a federal prison.
