To prevent humanity from falling into another stone age the Earth's Space Program is working to locate the necessary resources by building spacecrafts with the capability of traveling at great speeds to go out into the void. But before the human race is able to leave their own solar system they receive a transmission from a distant galaxy forewarning them of a threat from a sadistic race of beings identify as the Herzot. The Herzot have the intention of invading the sector of space designated as the Kartan system to gain access to the location of a Galactic Wormhole, which would allow anyone with a spacecraft to travel great distances in a fraction of the time. Captain Gregory L. Victory, a first lieutenant test pilot for the Earth Space Program is promoted to captain after a devastating disaster during one of his test flights. Upon which time he was chosen to lead a mission to the Kartan system, in an untested craft, to meet with First Councilman Shal-Bar of the Council of Interstellar Affairs to assist in peace talks with the Herzot. Unfortunately the people of the Kartan system, having relied on their technology for three hundred years had become technologically stagnate, not knowing how to protect themselves or those worlds under their protection. The humans must do whatever they can to prevent the vicious race of beings from carrying out their diabolical plans and save billions of innocent lives.

Feasibility Study and Future Projections of Suborbital Space Tourism at the Example of Virgin Galactic Matthias Otto,2009 The work Feasibility Study and Future Projections of Suborbital Space Tourism at the Example of Virgin Galactic deals with the topic space tourism, especially with the so-called suborbital space tourism a current trend of private businesses that offer commercial flights up to the edge of space. This edge of space, named Karman Line due to its founder Theodore von Karman, is defined by the FAI (Federation Aeronautique Internationale) to be at an altitude of approximately 100 km. The author conducts a detailed feasibility study about this phenomenon at the example of the Anglo-American business Virgin Galactic, and sets up future projections based on the results of this study. After a general introduction into the topic (history, motives for going to space, stages of space tourism etc.) the author addresses the focal points of the feasibility study. In detail, this includes an analysis of the Virgin Galactic approach and its most promising competitors (Space Adventures, Benson Space Company, Space Access, Incredible Adventures, Rocketplane Limited, Starchaser Industries, and Blue Origin), as well as an analysis of the several spaceships and its manufacturers. Subsequently, the regulatory framework is illustrated at the example of the FAA (Federal Aviation Administration). In the end, results from market research projects are evaluated in order to explain the demand for suborbital flights. The study comes to the conclusion that the industry is still in an early pioneer phase, but nevertheless shows an enormous potential to grow.

TodHunter Moon, Book Three: StarChaser Angie Sage,2016-10-11 Almost one year ago, Alice TodHunter Moon left her PathFinder village to become Apprentice to ExtraOrdinary Wizard Septimus Heap. She learned that the Magyk of the Castle comes from the power of the great block of lapis lazuli beneath the Wizard Tower. But in faraway lands, the brilliant blue stone is crumbling to dust. Soon the destruction will spread to the Castle, and its Magyk will be destroyed. Tod sets off on a hazardous journey to find the ancient object that will reverse the UnRaveling, and save the world of Septimus Heap. “Rich world-building, endearing characters, and a plot that will keep readers guessing are only a few of the treats that await fans in this final installment of the trilogy.”— Kirkus Reviews

Star Chaser Mark Scheel,2020 These humans, who chase after the stars, are called poets.Mark Scheel's Star Chaser is a creative burst exploring the relationships among ancient legend, the life cycle, the autobiographical and modern day angst. Star Chaser is

divided into three sections: Yesterday, Today and Tomorrow. This division signifies the reality all of us must confront living our lives. Throughout the collection many of the poems are given an added richness and extended implication via the accomplished photography of Joseph Maino. Such is the scope and beauty of *Star Chaser*. While Mr. Scheel may still deem himself poetically a star chaser, it is clear that, like the Northern Lights themselves, he has illuminated our horizon with a book of poetry that transcends the emotionally empty and hollow halls of academe and reaches out, longingly and lovingly, to grasp and finally catch those faraway stars. -Glen Enloe, author of *When Cowboys Rode Away*.

Tourists in Space Erik Seedhouse, 2008-04-16 Recent surveys have provided new and updated information into public insights of the nascent space tourism industry. This book uniquely explores in detail the cutting-edge technologies, spacecraft capabilities, launch vehicles and the training that will define this commercial enterprise. The book also provides a manual for future suborbital and orbital private space explorers. Over half of the book is dedicated to providing for the first time essential training material for private spaceflight participants. This book provides a much needed, well-rounded understanding of what promises to be the most dynamic and exciting industry in the world.

Darkwind R. Dugan, 2019-12-03 The Middle Kingdom of Talheim has enjoyed peace for decades. But with the threat of war rising from the ruthless South, the dream of a quiet life is fading. And for the noble but naïve Princess Cistine, that means embarking on a dangerous quest to the Northern Kingdom, where she hopes to forge an alliance against their southern foes and save her people. But when Cistine is captured by an outlaw and his band of cutthroat warriors, she finds a more deadly adventure than she bargained for - and a greater power within herself than she ever knew. Swept up in the unpredictable tide of a tenuous and shadowy political climate, a ruthless land governed by the stars, and the unexpected revelations that come from her mysterious new companions, Cistine must learn how to fight, how to lead...and above all, how to trust herself. If the young princess can't be forged into a fighter, then her kingdom will fall.

Dawnstar Renee Dugan, 2020-06-23 A missing friend. A hunt for answers. A path to vengeance. With her Warden stolen, her hopes of an easy alliance thwarted, and her trust in her own kingdom shattered, Princess Cistine Novacek faces her greatest challenge yet: using wit and steel to bring down a wicked Chancellor and prove herself to the cabal's tentative allies in the Courts. As friendships are tested, bonds broken, and love put to the test, the princess must face the growing threats within the Northern Kingdom - and learn to rise a queen. Locked away in a desert prison, Asheila Kovar faces the struggle of her life: surviving the ruthless Blood Hive, returning to her princess, and avenging a betrayal against the heart of her kingdom. But there are more secrets and schemes than just hers lurking in the catacombs...and the struggle between powerful forces above and below the sands will test Ashe's loyalty in dangerous ways. Ways that may spell death for people the cabal cannot afford to lose.

Star Chaser: The Traveler Reiter, 2014-10-13 Welcome! You have just entered a new realm - a new Universe where there are worlds, races, powers, allies and enemies just waiting to be discovered. Your place may be with the wielders of Iro... or perhaps as a Traveler... it could be that your destiny lies on a ship flying through the stars... or straining your skills on a battlefield... maybe you're most suited to hours spent pouring over ancient tomes... or engaged in a game of chess that will shape the cosmos. Whatever your place - wherever your destination - you will find yourself... Beyond the Outer Rim In 'Star Chaser: The Traveler', the prelude to the series, we meet Z'GUNOK TEL DUNGAS, a Malgovi born without the ability to channel IRO, an ability inherent in the vast majority of

his race. As a member of a high-ranking family, he lived a life in-between... not truly an outcast, but never fully embraced. Often discounted and forgotten, Dungias was left to grow and learn primarily on his own. Yet the advantages of his family's name did not entirely protect him against those who considered him anathema. Through strength, daring, and unexpected cunning, Dungias created himself out of nothing - and worked toward the day when he could make changes... Little did he know just how far-reaching those changes would be! "A venturesome sci-fi/fantasy novel for readers who really want their action set where no man has gone before." - Kirkus Reviews

How to Make a Spaceship Julian Guthrie, 2016-09-20 A New York Times bestseller! The historic race that reawakened the promise of manned spaceflight A Finalist for the PEN/E. O. Wilson Literary Science Writing Award Alone in a Spartan black cockpit, test pilot Mike Melvill rocketed toward space. He had eighty seconds to exceed the speed of sound and begin the climb to a target no civilian pilot had ever reached. He might not make it back alive. If he did, he would make history as the world's first commercial astronaut. The spectacle defied reason, the result of a competition dreamed up by entrepreneur Peter Diamandis, whose vision for a new race to space required small teams to do what only the world's largest governments had done before. Peter Diamandis was the son of hardworking immigrants who wanted their science prodigy to make the family proud and become a doctor. But from the age of eight, when he watched Apollo 11 land on the Moon, his singular goal was to get to space. When he realized NASA was winding down manned space flight, Diamandis set out on one of the great entrepreneurial adventure stories of our time. If the government wouldn't send him to space, he would create a private space flight industry himself. In the 1990s, this idea was the stuff of science fiction. Undaunted, Diamandis found inspiration in an unlikely place: the golden age of aviation. He discovered that Charles Lindbergh made his transatlantic flight to win a \$25,000 prize. The flight made Lindbergh the most famous man on earth and galvanized the airline industry. Why, Diamandis thought, couldn't the same be done for space flight? The story of the bullet-shaped SpaceShipOne, and the other teams in the hunt, is an extraordinary tale of making the impossible possible. It is driven by outsized characters—Burt Rutan, Richard Branson, John Carmack, Paul Allen—and obsessive pursuits. In the end, as Diamandis dreamed, the result wasn't just a victory for one team; it was the foundation for a new industry and a new age.

George Blackwood (Star Chaser) Alex J. Anderson, 2021-03-18 George Blackwood (Star Chaser) Is a work of fiction created from my need to link real life events and turn them into stories that might just show why Campbell soldiers killed men of McDonalds in the Glen Coe Massacre and wondering where have Panthers gone and why? Are they extinct because humans have killed them off. I hoped they had found a safe place to live and then wondered is that place the hidden valley of the Clan McDonald, but if they are there, how did they get there and why have the McDonald Clan not made this known? That made me think, what if Panthers were mentally strong they could influence our human minds to obey and forget ever meeting them and what but humans could endanger their safety? That led me to create an extraterrestrial villain who fed on intelligence, who having emptied his own world of life, came here because of his need to survive. My only other question was to wonder how and why a single person might become aware of this extraordinary story and why has he not made the story public knowledge. I have taken on that task as a work of fiction that just might be credible enough to seem to answer all of those questions. Feel free to read but remember this is purely fiction.

Star Chaser in Time Martyn J. F. Haggett, 2015-06-18 Overprescribing modern antibiotic type medicines and so-called wonder drugs, together with modern intensive agricultural methods have ended in common viruses, such as influenza and others, that have

been able to be treated and controlled over the past decades are now spiraling out of control with new strains gaining a foothold in the world population. This being due to the body's natural immune system failing to fight these viruses. A crisis has developed all over the globe; therefore, a team from Worldwide Pharmaceuticals Ltd have been tasked with finding a solution in combating the out-of-control viruses and stop the plight and demise of mankind on earth. Meanwhile, a parallel team headed by Jim Kent at Transaerospace are working on the highly confidential Star Chaser 451 project for the United States and United Kingdom governments, which have been working secretly together on various scientific and military projects since the end of World War Two. On its completion, the Star Chaser craft becomes a valuable tool in helping to save mankind from its demise, in a very unsuspecting way.
