**Spiral to the Stars** Laura Harjo, 2019-06-25 All communities are teeming with energy, spirit, and knowledge, and *Spiral to the Stars* taps into and activates this dynamism to discuss Indigenous community planning from a Mvskoke perspective. This book poses questions about what community is, how to reclaim community, and how to embark on the process of envisioning what and where the community can be. Geographer Laura Harjo demonstrates that Mvskoke communities have what they need to dream, imagine, speculate, and activate the wishes of ancestors, contemporary kin, and future relatives—all in a present temporality—which is Indigenous futurity. Organized around four methodologies—radical sovereignty, community knowledge, collective power, and emergence geographies—*Spiral to the Stars* provides a path that departs from traditional community-making strategies, which are often extensions of the settler state. Readers are provided a set of methodologies to build genuine community relationships, knowledge, power, and spaces for themselves. Communities don't have to wait on experts because this book helps them activate their own possibilities and expertise. A detailed final chapter provides participatory tools that can be used in workshop settings or one on one. This book offers a critical and concrete map for community making that leverages Indigenous way-finding tools. Mvskoke narratives thread throughout the text, vividly demonstrating that theories come from lived and felt experiences. This is a must-have book for community organizers, radical pedagogists, and anyone wishing to empower and advocate for their community.

**Bright Burning Stars** A.K. Small, 2019-05-21 "A compulsively readable story. I was breathless and battling tears up until the very last stunning turns onstage and beyond. A dazzling, heart-wrenching debut." –Nova Ren Suma, #1 New York Times bestselling author of *The Walls Around Us* Would you die for the Prize? Best friends Marine Duval and Kate Sanders have trained since childhood at the Paris Opera Ballet School, where they've forged an inseparable bond through shared stories of family tragedies and a powerful love for dance. When the body of a student is found in the dorms just before the start of their final year, Marine and Kate begin to ask themselves how far they would go for the ultimate prize: to be named the one girl who will join the Opera's prestigious corps de ballet. Would they cheat? Seduce the most talented boy in the school, dubbed the Demigod, hoping his magic will make them shine, too? Would they risk death for it? Neither girl is sure. But then Kate gets closer to the Demigod, even as Marine has begun to capture his heart. And as selection day draws near, the competition—for the Prize, for the Demigod—becomes fiercer, and Marine and Kate realize they have everything to lose, including each other. *Bright Burning Stars* is a stunning, propulsive story about girls at their physical and emotional extremes, the gutting power of first love, and what it means to fight for your dreams.

**The Call of the Stars** John Robert Kippax, 1914

**Half-Hours with the Stars** Richard A. Proctor, 2019-12-09 *Half-Hours with the Stars: A Plain and Easy Guide to the Knowledge of the Constellations* by Richard A. Proctor is a reference book to educate readers about the night sky. With charts and, at the time, cutting-edge information, this text allowed people with a casual interest in the sky to learn how to observe the stars and learn about their history, magic, and constellations. Even to this day, the book is essential reading for those who love the sky.

**The Girl and the Stars** Mark Lawrence, 2020-04-21 A stunning new epic fantasy series following a young outcast who must fight with everything she has to survive, set in the same world as *Red Sister*. In the ice, east of the Black Rock, there is a hole into which broken children are thrown. Yaz's people call it the Pit of the Missing and now it is drawing her in as she has always known it would. To resist the cold, to endure the months of night when even the air itself begins to freeze, requires a special breed. Variation is dangerous, difference is fatal. And Yaz is not the same. Yaz's difference tears her from the only life she's ever known, away from her family, from the boy she thought she would spend her days with, and has to carve out a new path for herself in a world whose existence she never suspected. A world full of difference and mystery and danger. Yaz learns that Abeth is older and stranger than she had ever imagined. She learns that her weaknesses are another kind of strength and that the cruel arithmetic of survival that has always governed her people can be challenged.

**The Formation of Stars** Steven W. Stahler, Francesco Palla, 2008-07-11 This book is a comprehensive treatment of star formation, one of the most active fields of modern astronomy. The reader is guided through the subject in a logically compelling manner. Starting from a general description of stars and interstellar clouds, the authors delineate the earliest phases of stellar

evolution. They discuss formation activity not only in the Milky Way, but also in other galaxies, both now and in the remote past. Theory and observation are thoroughly integrated, with the aid of numerous figures and images. In summary, this volume is an invaluable resource, both as a text for physics and astronomy graduate students, and as a reference for professional scientists.

**Stars** Rebecca Kraft Rector, 2019 Look up at the sky on a clear night-there are stars everywhere! And there are so many more out there that you cannot see. Stars are an amazing part of space, and there is a lot to learn about them. Take look at how stars form and then sizes, colors, and temperatures. You can also find out about constellations and the life and death of stars. A fun, hands-on activity shows why stars shine only at night. Book jacket.

*The Shadow and Night* Chris Walley, 2011-01-21 In the first book in the epic *Lamb among the Stars* series, author Chris Walley weaves the worlds of science and the spirit, technology and supernatural into something unique in science fiction. Twelve thousand years into the future, the human race has spread across the galaxy to hundreds of terraformed worlds. The effects of the Fall have been diminished by the Great Intervention, and peace and contentment reign under the gentle rule of the Assembly. But suddenly, almost imperceptibly, things begin to change. On the remotest planet of Farholme, Forester Merril D'Avanos hears one simple . . . lie. Slowly a handful of men and women begin to realize that evil has returned and must be fought. What will this mean for a people to whom war and evil are ancient history? Thus begins the epic that has been described as "If C. S. Lewis and Tolkien had written *Star Wars*." *The Shadow and Night* was previously published in two volumes: *The Shadow at Evening* and *The Power of the Night*.

*The Giver of Stars* Jojo Moyes, 2019-10-08 #1 NEW YORK TIMES BESTSELLER | A REESE WITHERSPOON X HELLO SUNSHINE BOOK CLUB PICK "A great narrative about personal strength and really captures how books bring communities together." —Reese Witherspoon From the author of *The Last Letter from Your Lover*, now a major motion picture on Netflix, a breathtaking story of five extraordinary women and their remarkable journey through the mountains of Kentucky and beyond in Depression-era America Alice Wright marries handsome American Bennett Van Cleve, hoping to escape her stifling life in England. But small-town Kentucky quickly proves equally claustrophobic, especially living alongside her overbearing father-in-law. So when a call goes out for a team of women to deliver books as part of Eleanor Roosevelt's new traveling library, Alice signs on enthusiastically. The leader, and soon Alice's greatest ally, is Margery, a smart-talking, self-sufficient woman who's never asked a man's permission for anything. They will be joined by three other singular women who become known as the Packhorse Librarians of Kentucky. What happens to them--and to the men they love--becomes an unforgettable drama of loyalty, justice, humanity, and passion. These heroic women refuse to be cowed by men or by convention. And though they face all kinds of dangers in a landscape that is at times breathtakingly beautiful, at others brutal, they're committed to their job: bringing books to people who have never had any, arming them with facts that will change their lives. Based on a true story rooted in America's past, *The Giver of Stars* is unparalleled in its scope and epic in its storytelling. Funny, heartbreaking, enthralling, it is destined to become a modern classic--a richly rewarding novel of women's friendship, of true love, and of what happens when we reach beyond our grasp

for the great beyond.

What Stars Are Made Of Sarah Allen,2020-04-02 An astonishingly bold and moving middle-grade debut about family, friendship and how it's OK to be different. I loved this book . . . A female 'Wonder'. - reader review This is a brilliant book. I don't think I've ever read anything like it. - reader review A celebration of difference, a masterclass of empathy - just a massive warm hug of a book! - reader review Libby wants to be a scientist when she grows up, just like her hero, the underrated astronomer Cecilia Payne. She'd also do anything for her family - and when her beloved big sister Nonny is in trouble, Libby comes up with the perfect plan to help her, and at the same time remind the world what stars are made of.

**How Many Stars in the Sky?** Lenny Hort,1997-01-20 Mama's away one night, and her son can't sleep. He tries to relax by counting stars, but the more of them he sees, the more determined he is to count every single one. Then the boy finds that Daddy can't sleep either. Together, the two of them set off on an unforgettable all-night journey of discovery.

**The Legend of the Earth Stars** Greg Zenk,2009-11 What was coming of age like for adolescents who lived during the time before the birth of the United States? Besides the seasons and global warming, how do we account for summer seasons' wild storms? And just where did lightning bugs come from? While today's youth are born into a world where scientists are able to explain many phenomena, really revealing the origin of things as simple as the weather and those magical little insects known as fireflies requires a master storyteller. The Legend of the Earth Stars is a spell-binding account of adventure and self-sacrificing love that will engage both youth and adults in an alternate explanation of some of our planet's everyday occurrences. Exposing the dangers of human greed, this legend offers a Rudyard Kipling-like vision of our natural world, with characters that readers will admire and despise, and a moral that will guide today's youth towards a deeper appreciation for their elders and their own responsibilities as new adult members of our society. This illustrated chapter book appeals to the Just So stories with which many adults are familiar, but in a package that will woo today's excitement-driven youth. The Legend of the Earth Stars divulges not only the importance of courage in the face of egomaniacal men and women, but of honoring the everyday natural world and its mysteries.
