

Steve Wozniak

Paul Freiberger, Michael Swaine

Steve Wozniak Rebecca Gold,1994 Steve Wozniak was only 25 years old when, along with his friend Steve Jobs, he founded Apple Computer Company. With Wozniak's genius and Job's determination, Apple became the most successful personal computer company in the world.

IWoz Steve Wozniak,Gina Smith,2006 In 1975, young engineer Steve Wozniak had an idea: What if you combined computer circuitry with a regular typewriter keyboard and a video screen? The result was the first true personal computer, a widely affordable machine that anyone could figure out how to use. Wozniak teamed up with another young friend, Steve Jobs, and Apple Computer was born. The Apple I and Apple II computers were the first to use a modern paradigm - a keyboard to enter text and data and a video screen to view it. Apple and Wozniak, the inventor of the Apple I and II, ignited the computer revolution and have been transforming our world ever since. Now, thirty years later, in iWoz, the mischievous genius with a low profile tells his story for the first time. Wozniak looks back at more, though, than his brilliant inventions. With his own typical, inimitable humor and style, he relates his countless pranks, his early days with the Electronics Kids and the Homebrew Computer Club, his stint as a concert promoter with the US Festivals, his near-death experience in a flight crash, his philanthropic activities, the decade he spent teaching fifth graders, and what it is like to be the Woz, a humanist inventor who considers engineering an art but never puts it before people and their needs.--BOOK JACKET.

Steve Jobs, Steve Wozniak and the Personal Computer Donald B. Lemke,2007 In graphic novel format, tells the story of how Steve Jobs and Steve Wozniak developed the personal computer--Provided by publisher.

IWoz Steve Wozniak,Gina Smith,2006 After 25 years of avoiding the public eye, Steve Wozniak breaks his silence and tells the full story of the Apple computer, from its conception to his views on the iconic cult status it enjoys today. But for Steve's dream to build himself a computer, Apple would never have happened. In June, it was just an idea. By that Christmas, he'd built something that his friend convinced him to sell, just for fun. The rest, as they say, is history. But this history is full of life lessons, critical decisions, huge triumphs and big mistakes, and all from a self-professed 'engineer's engineer'. Steve talks about his childhood, phone hacking pranks, working at Hewlett-Packard, the life-changing plane crash and teaching. I, WOZ offers readers a unique glimpse into the offbeat and brilliant but ethical mind that conceived the Macintosh. With the help of award-winning journalist Gina Smith, Steve sets the record straight.

All about Steve Wozniak Paul Freiberger,Michael Swaine,2017-12-14 The All about biography series continues with four new additions, introducing readers to individuals whose contributions to the world made an impact on history. Illustrations.

But in the most staggering burst of technical invention by a single person in high-tech history (BusinessWeek) Steve Wozniak invented the first true personal computer. Wozniak teamed up with Steve Jobs, and Apple Computer was born, igniting the computer revolution and transforming the world. Steve Jobs Matt Doeden, 2017-01-01 On October 5, 2011, the news of the death of technology innovator Steve Jobs rocked the world. The failing health of the Apple cofounder and Pixar CEO was no secret. Jobs had given up his role as Apple's CEO just a few months prior because of his struggle with pancreatic cancer. But his death still drew a huge reaction. From Apple employees and fans to political and business leaders, people honored Jobs's passing by reflecting on his prolific life that greatly influenced the way technology is used. In 1976, Jobs founded Apple Computer with Steve Wozniak. As the leaders of Apple, they developed concepts—such as navigating by using a mouse to click screen icons—that shaped the way we use and interact with computers. Jobs's forward-thinking engineering also influenced pop culture, bringing us a music revolution with the iPod, the ultimate communication device with the iPhone, and some of the first computer-animated films through Pixar. Called by some the da Vinci of our time, Jobs used his innovation and vision to help advance technology like no other. He lived his life following a simple premise: The only way to be truly satisfied is to do what you believe is great work. And the only way to do great work is to love what you do.

Detailed sidebars, a fact-filled timeline, and full-color photographs augment the engaging discussion.

Quicklet on The Charlie Rose Show: Steve Wozniak (CliffNotes-like Summary) Renee Lynn

Frojo,2012-02-24 ABOUT THE BOOK Steve Wozniak never had big aspirations to become famous or earn a lot of money — he just had great ideas and a partner with a vision. Several billion dollars, an autobiography, and many followers later, Wozniak is now a well-known public icon who is comfortably sitting in the limelight that his late partner helped create. Was Wozniak coerced into the public eye or did he always have it in him? Appearing on the Charlie Rose Show back in 2007, Wozniak, the lesser-known co-founder of Apple Computer Inc. and now Chief Scientist at Fusion-io, said he willingly kept a low profile. “I just wanted to be good at designing things better than anyone else,” he said on the show. His partner, Steve Jobs, on the other hand “wanted to study the greats and be one of them,” Wozniak added. MEET THE AUTHOR Renee is a multimedia journalist and photographer. She's also an avid explorer and adventurer, who recently returned from a year-long journey throughout Australia, India, Nepal, Southeast Asia and South America. Renee was a former healthcare reporter and editor in Washington, D.C. EXCERPT FROM THE BOOK Wozniak pointed out that the company needed both of the Steves to be successful. While he had the computer-building genius, Jobs wanted to make his ideas a success. “He wanted to change the world,” Wozniak said. But he also wanted to make a lot of money. In the end, Wozniak is convinced that what set their software apart was the fact that it was “so superior” to that of PCs. He attributes the rest of their success to the idea that Apple computers are “so much different” than PCs and has a large fan base in the creative industries — photography, design, video, and music. “It’s a tight group with a lot of passion,” Wozniak said. Towards the end of the interview, Wozniak mentioned that he wants to be a role model for young, creative tech geeks who want to build things. “Maybe they can’t impress anyone at school, but in their own head they feel good,” he said. “And I want them to see that there is a person like that that they can look up to.” Buy a copy to keep reading!

The Apple Revolution Luke Dormehl,2012-08-02 On 26 May, 2010 Apple Inc. passed Microsoft in valuation as the world's largest technology company. Its consumer electronic products - ranging from computers to mobile phones to portable media devices, not to mention its iTunes, iBook and App Store - have influenced nearly every facet of our lives, and it shows no sign of slowing down. But how did Apple - a company set up in the back room of a house by two friends, and one that always marketed itself as the underdog - become the marketplace leader (and the world's second largest company overall), and is it a good thing to have one company hold so much power? In *The Apple Revolution* Luke Dormehl shares the inside story of how Apple Inc. came to be; from the formation of the company's philosophies and user-friendly ethos, to the iPod moment and global domination, leaving you with a deep understanding of how it was created, why it has flourished, and where it might be going next.
